RECEIVED

Attention: Mr. Don Rodwancy

Dear Mr. Rodwancy:

Based upon your request, a technical representative of the Department of State (DOS) witnessed the vehicle crash test at Calspan Corporation Transportation Sciences Center Buffalo, New York on March 28, 2006 and has since evaluated the Calspan Test Report 8796-01. The Autogate Perimeter Barrier Gate VPL-CB-24 has been determined to meet the DOS certification criteria for vehicle barriers. Under the provisions of SD-STD-02.01, Revision A, *Test Method for Vehicle Crash Testing of Perimeter Barriers and Gates*, dated March 2003, the barrier is hereby certified with a K8 rating which will stop a 15,000 pound vehicle traveling at a speed of 40 mph with less than one meter penetration of the cargo bed.

The Autogate Perimeter Barrier Gate VPL-CB-24 will be placed on the DOS list of certified equipment that is available for use by architects and planners. Your product still has to compete with other bidding manufacturers who are certified with the same classification. We cannot guarantee that your product will be chosen by architects that design the facilities.

Thank you for your interest and endeavors in protecting our personnel and facilities overseas.

Sincerely yours,

Deborah P. Glass
Director
Physical Security Division
Bureau of Diplomatic Security
