FIRE ROCK
BUILDING MATERIALS

NATURAL BEAUTY PROVEN PERFORMANCE

Hand-crafted in Birmingham, Alabama, FireRock's line of architectural-grade concrete pavers adds timeless elegance to your home with limitless design possibilities. The unique, hand-crafted finishing process mimics the look of natural stone with the consistency and performance of a manufactured product, giving you the best of both worlds.

- ✓ 4 BEAUTIFUL COLORS TO CHOOSE FROM
- ✓ 3RD PARTY TESTED FOR DURABILITY & SAFETY
- ✓ APPROVED FOR INDOOR & OUTDOOR USE

ENSURE YOUR HOME CAN STAND THE TEST OF TIME

MAKE IT A FIREROCK HOME

OYSTER

Our lightest color is named for the long tradition of using oyster shells as building materials.

- Our closest paver color to white
- Great for modern & Mediterranean designs

STEEL

Our gray is named after the industry sparking Birmingham's rapid growth in the 1900s.

- Affordable alternative to slate or bluestone
- Great for more contemporary architecture

CLAY

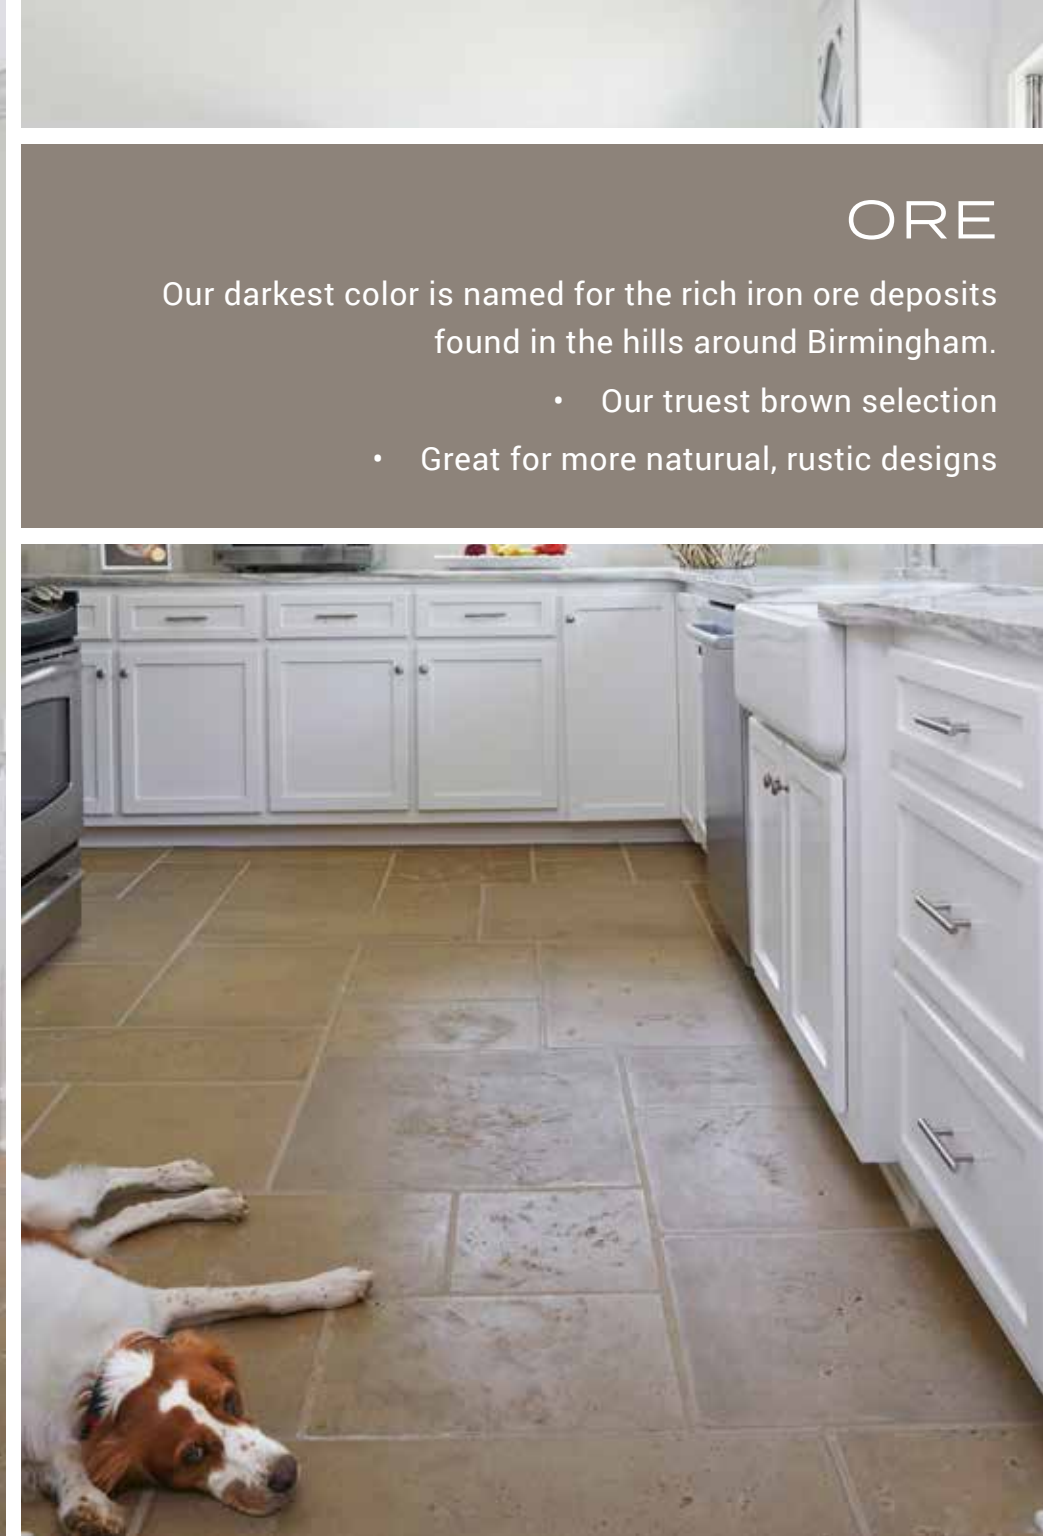

Our color that most closely resembles travertine; named for the mud found along quarry waterways.

- A neutral taupe that pairs with most designs
- Great for nearly any architectural style

ORE

Our darkest color is named for the rich iron ore deposits found in the hills around Birmingham.

- Our truest brown selection
- Great for more natural, rustic designs
