

PLANT-BASED ARTIFICIAL GRASS

*Certification applies to select products only.

SYNLAWN IS THE FIRST
ARTIFICIAL GRASS PROVIDER TO OFFER
USDA CERTIFIED
BIOBASED PRODUCTS

Our uncompromising dedication to environmental responsibility includes using renewable resources and recycled materials to offer eco-friendly synthetic landscaping products our customers can feel good about using.

SAME QUALITY, SAME PRICE, NO COMPROMISES.

The POWER of SOYBEANS

Soybeans pack a lot of punch into a tiny seed pod. They harvest energy from our sun, capture carbon and nitrogen from the air, then transform it into valuable nutrients for the earth. Soybeans also produce resources for things you use every day such as furniture, cleaning supplies, ink, paint, carpet and even artificial grass.

Our mission each day is to leave the world a better place. Working with U.S. Farmers to foster a culture of sustainability is a gift we believe will carry on far longer than we will.

| SYNLAWN®

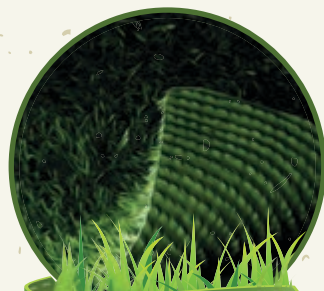

TRULY 'GREEN' GRASS

RENEWABLE
