- 18" Height

Rubber Rounded & Rubber Corner Guard

- High-impact virgin rubber
- Long lasting and cost-efficient
- Reflective tape increases visibility

Corner Sentry™

- Flexible EVA material
- Tapered & low profile
- Easy to install with fasteners or straps
- 42" Height

Removable & Permanent Flexible Bollard Options

Gorilla Post™

is a removable & flexible bollard or signpost with a unique magnetic mounting system.

- Lightweight
- Secures quickly in place
- Virtually impossible to remove without special tool

The tamper-proof Gorilla Post™ was developed for:

- Sidewalks • Parking Lots • Parking Garages • Factory Floors
- Concourses • Pedestrian Pathways • Drive-Through Lanes

Flexible Bollard

- Reduce maintenance & replacement costs for bent bollards & posts
- Post Guard cover over a galvanized steel post mounted with spring-driven hardware
- Super flexible when hit from any angle
- Many colors & heights available

FlexBollard XL uses a galvanized steel post and a durable spring that allows super flexibility when it's hit from any angle. Plus, a Post Guard cover makes it look great! FlexBollard XL is available in many different heights and colors.

SlowStop®

Absorbs Energy / Reduces Damage

- Energy of impact is absorbed by elastomer in the bollard's base
- After the impact, the bollard returns upright
- Powder coated yellow steel • Installs on concrete only
- 3", 4", 5" & 6" Dia.

Speed & Parking Control

Rubber Parking Curb

- *Helps reduce damage to low, front end cars*
- *Safer & more durable than concrete*
- *6' long curb weighs only 34 lbs. – one person installation*
- *Molded-in reflective tape available in yellow or white*

Rubber Parking Curb features:

- *Excellent for indoor or outdoor parking*
- *Will not chip, crack, warp or fade*
- *High visibility at night*
- *Temporary or permanent installation*
- *Does not require heavy machinery*
- *Virtually maintenance-free*
- *Available:*
 - *with anchoring spikes or lag bolts*
 - *in 4' & 6' lengths*

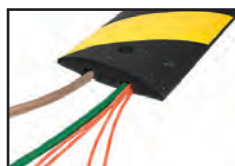

Our smooth riding traffic control products are simple to install and made from rubber.

Rubber Speed Bump

Rubber Speed Bumps help make parking lots safer for pedestrians and motorists by reducing vehicle speeds to 2-5 mph. The channeled bottom facilitates drainage and can cover cabling or piping. Their flexible design conforms to the contour of virtually any road surface and is available in 4' and 6' lengths.

- End caps are available to enhance the appearance and smooth ride.
- Rubber Speed Bump and Rubber Speed Hump can be easily removed for storage or relocation.

Rubber Speed Hump

Rubber Speed Humps are designed to slow traffic to 10-15 mph while maintaining a continuous traffic flow. The rubber hump is perfect for schools, parking lots, crossings, playground areas and hospitals. The interlocking tongue and groove system allows Rubber Speed Humps to be linked together to cover various widths.

Column Protection helps prevent expensive damage

Unlike other less expensive products on the market, these Sentry protectors can take many repeated hits without needing replacement.

Column Sentry® protectors use a cushion of air to help prevent damage by forklifts

Column Sentry® protector is molded from low-density polyethylene and surrounds interior building columns with a cushion of air. Air-vent chamber allows air to escape during an impact.

- **Tough**
- **Safety Yellow – Highly visible**
- **Easy to install**
- **Cost-effective**
- **Air-vented protection**
- **Various column sizes – 42" Height**

Park Sentry® helps protect columns and vehicles with a special material

Park Sentry® adds a thin layer of scratch-resistant material around concrete columns. It can fit any square or rectangular column and is easy to install. Park Sentry

lets drivers park closer to the columns and covers the "splash zone" preventing corrosion from salt.

- **Improves appearance**
- **1.6" thick plank for low-profile**
- **Interlocking pieces create one-piece column wrap-around**
- **Oil, chemical, water and flame resistant**

Column Sentry FIT adjusts to different columns

Column Sentry FIT is a 4-part product designed to FIT exactly around a building column to provide superior protection. The adjustable parts slide into place to create a custom fit for every column:

- **Small FIT:**
4"x 4" to 8"x 8" columns

- **Medium FIT:**
8"x 8" to 12"x12" columns

Cushion hard surfaces and reduce vehicle scratches and dents!

BOLLARD GUARD

Bollard Guard is a cushioned nylon sleeve that helps protect vehicles from bollards, posts and poles.

Bollard Guard is used in parking garages, banks, restaurants, gas stations, warehouses, retail stores and drive-thru locations.

- Custom made to fit any size bollard.
- Easily installs in seconds!

GATE ARM GUARD

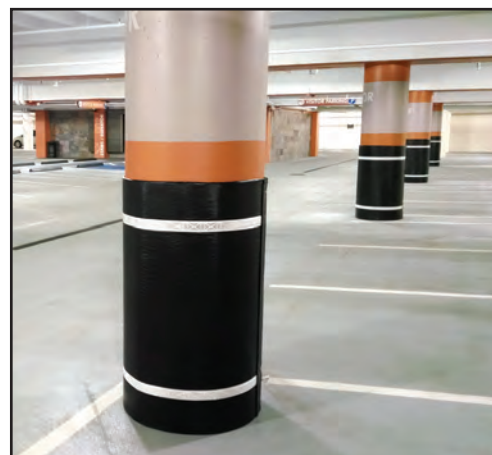

Gate Arm Guard is a cushioned sleeve that helps protect vehicles and pedestrians from contact with a moving gate arm.

- Custom made to fit straight or folding gate arms.
- End caps are available.

COLUMN GUARD

Column Guard is a cushioned sleeve that wraps around support columns to help protect vehicles from minor damage. Perfect for cement columns in parking structures.

Decorative Bollard Covers add style to plain bollards

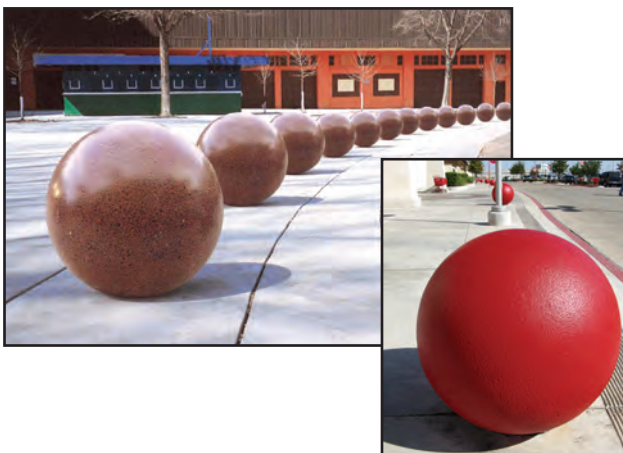

Stainless Steel Bollard Covers

- #304 & #316
- Polished to a #4 Finish
- Cap styles: Flat, Dome & Slant
- Custom Made to Specifications
