Presenting BORCON™ Steel Technology

BORCON™ is a unique metal composition designed to provide an aesthetic rust look. It is a beautiful material and is being used in residential and commercial properties for its warm, weathered and lasting natural look.

Because of its unique “natural” and long lasting finish, BORCON™ will become the preferred alternative to current metal edging products such as galvanized steel, aluminum, plastic and / or powdered coated.

What Properties Does BORCON™ Steel Have?

BORCON™ steel weathering properties has increased resistance to atmospheric corrosion in comparison with other steels. The pH factors that destroy aluminum are not present with BORCON™.

This is due to the protective layer the steel forms on its surface under the influence of the weather.

By forming a patina film of dark brown oxidation BORCON™ Weathering Steel successfully resists the corrosive effects of weather conditions such as rain, snow, and ice.

In this way, the protective layer prohibits deeper penetration of the elements and eliminates the need for painting and the expense of rust-prevention maintenance over the years, saving both money and time.

Landscape Architects and Designers will appreciate BORCON™ weathering steel due to the following:

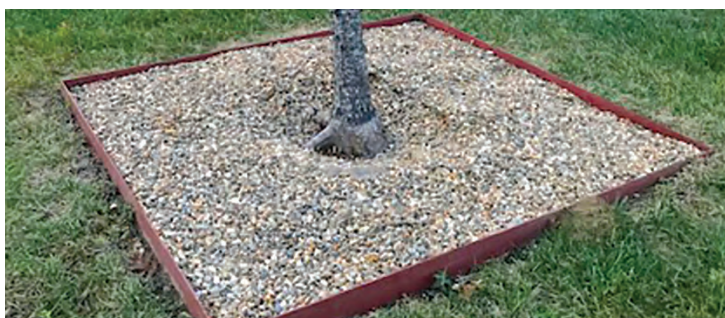

- Combination of strength and durability with minimal thickness, resulting in the creation of fine, elegant solutions for the outdoor space.
- Natural, warm, and specific hues, which easily blend into the overall landscape and add to the identity of a unified site.

BORCON™ Key Differentiators

- Lasts 5.4x longer than regular steel
- Dynamic appearance and texture
- Beautiful patina
- Increased flexibility and workability
- Long-term performance / long-lasting (Longer lasting & less expensive than aluminum)
- Less expensive vs. comparable products
- Low-maintenance
- Save time and money without having to touch up or re-paint
- Perfect for LEED projects
- Made from over 60% Recycled Steel
- Environmental benefits
- Made in the USA

ALL BORCON™ PRODUCTS SPECIFICATIONS AND SCHEMATICS ARE AVAILABLE ON CAD DETAILS

BORDER CONCEPTS, INC.
 WAS FOUNDED IN 1990 TO
 MANUFACTURE STEEL EDGING.
 BCI HAS DEVELOPED OVER
 12 SEPARATE PRODUCT LINES
 AND FOCUSES ON SUPPLYING
 QUALITY PRODUCTS TO THE
 ENTIRE GREEN INDUSTRY.
