

GravityStone Edge®

SO SIMPLE. IT'S ADVANCED

An Engineered Earth Retention Product

The 1-2-6 Advantage

- One product
- Two systems
- Six Structural Solutions

"During my 25 years of site remediation I have not found a more economical, innovative and flexible system than GravityStone® Edge"

- Ty Gillis, GradeSolutions

■ IMPROVING SRW SOLUTIONS:

- 33% more product and 15% less weight than traditional one square foot SRW's
- GravityStone® Edge is more economical and flexible than other SRW or machine-laid products

■ BELOW GRADE:

- Fills: Geogrid Reinforced (MSE)
- Cuts: Modular System
- Poor Soils: Slide Stop
- Sustainable Sites: Green Walls

■ ABOVE GRADE:

- Barriers/Parapets
- Columns
- Planters

■ AESTHETICS:

- Optional Textures and Geometry

■ ALIGNMENT:

- Reversible Alignment Plug (RAP)
- Concrete Alignment Nub (CAN)

Edge: 24" x 8" x 10.5"

Mini Cell: 24" Deep

Single Cell: 37" Deep
+27" each additional Cell

Two Systems

MSE: "Fill" sites typically are best served by Core combined with Geogrid reinforcement (MSE).

Modular: Assemble the components and place the aggregate, it's that easy. Modular's narrow footprint typically requires 30% less depth than MSE, allowing a fit on tight sites, minimizing excavation, and allowing for all weather construction.

Structural Solutions

GravityStone® MSE

With Geogrid (MSE) reinforcement for use in "Fills"

GravityStone® Modular

Components assembled into "Cells," form narrow walls ideal for "Cuts"

Vertical Hybrid

Combine the two systems above or below

Lateral Hybrid

Combine the two systems side by side

Slide Stop®

When soils are weak and the wall must be narrow

Barrier/Parapets/Columns

Create above grade features using Modular components
