SMART STYLISH HARDSCAPES

THE ART OF OUTDOOR LIVING

WestBlock Systems has grown into a significant innovator in the field of concrete products, stemming from its early origins of masonry distribution and concrete product manufacturing companies.

WestBlock Systems has built upon this background through the design and licensing of innovative, durable and cost-effective concrete products for use in dry stack earth retention, outdoor living, fencing, architectural faces and manufacturing processes.

The WestBlock Systems licensed family of products now fills multiple market niches and includes dozens of products, patents and trademarks, which are manufactured and distributed by a geographically diverse network of concrete block manufacturers.

◆ Ideal for walls up to 2ft. high.

◆ Lightweight blocks with sidewall handholds make installation fast, safe and easy.

◆ Innovative design secures the block and provides the proper set-back with minimal effort.

◆ Blocks fit together snugly, eliminating gaps to ensure a finished, professional look.

◆ Beveled sides allow walls to form graceful curves.

NurseryStone® provides curb appeal, one of the most important aspects of landscape design. Ideal for walls up to 2 ft. high, NurseryStone® provides a finishing touch to any yard. Its lightweight construction and rear heel alignment system makes it a breeze to install.

◆ Gravity walls up to 4 ft. or taller with geogrid reinforcement.

◆ Taller terraced walls combine beauty and function.

◆ Sidewall hand holds provide safe and easy installation.

◆ Dry-stacked construction. Attractive stone texture.

◆ Builds strong and meandering walls with a professional finish.

Jumbo NurseryStone® provides the rugged performance you need and the aesthetics you crave. The mortar-less, dry-stack construction makes installations quick and easy. The beveled design allows you to create graceful curves and guide the eye to what lies beyond.

◆ Natural stone appearance enhances hardscape applications.

◆ Residential-scale stone delivers commercial-grade structural performance.

◆ Core filled unit augments long-term connection to geogrid reinforcement.

◆ Pin and trough alignment system simplifies installation for all skill levels.

A StoneWall® retaining wall system turns ordinary landscapes into creative expressions of timeless sophistication. Reflecting the grandeur of fine living, a wall built with StoneWall® blocks blends seamlessly with the surrounding environment. Its rough-hewn stone face suggests the structure has always been. While its unique commercial-grade construction ensures it will always be.

◆ Above and below grade hardscape features.

◆ Pre-designed outdoor living features.

◆ Columns, seating benches, firepits, BBQs, fireplaces.

◆ Optional textures and geometry.

◆ Durable, flexible, attractive.

◆ Vertical or battered alignment.

StoneWall®II is a outdoor living system used to create beautiful and durable hardscape features reminiscent of handcrafted stone. StoneWall®II provides a large variety of design options that allow creation of a backyard retreat that will be the envy of the neighborhood.

WESTBLOCK SYSTEMS®

WE'RE STACKED IN YOUR FAVOR

- Independent and family operated
- Complete line of SRW, hardscape and fence products
- Applicable for residential, commercial, and DOT
- Design Build Support
- Effective manufacturing and handling

With the WestBlock Systems family of products you can bring quality and beauty to any project. Cuts, fills, or steep slopes, WestBlock Systems has a product that will meet the needs of the job site and be architecturally beautiful while soundly engineered. We are building a better future for today!

SO SIMPLE. IT'S ADVANCED

- ◆ One product that utilizes two structural systems.
- ◆ Six structural solutions.
- ◆ One sq. ft. SRW Unit.
- ◆ Optional face geometry and textures
- ◆ Reversible Alignment Plug (RAP) allows Vertical or Battered Alignment.

GravityStone® Tradition is 1 product that utilizes 2 structural systems, empowering designers and contractors with 6 structural solutions. Core is designed to construct MSE and small gravity structures. The modular components can build large gravity structures without geogrid. Hybrid designs can be created by interconnecting the 2 systems. Slide Stop® is the solution for narrow footprint, poor soil sites. BarrierWall creates double-sided, free-standing walls, fences, and parapets.

SO SIMPLE. IT'S ADVANCED

- ◆ Easy Installation following MSE construction.
- ◆ Flexible Design & Construction.
- ◆ Durable Performance.
- ◆ Variety of Face Textures and Colors.
- ◆ Concrete Alignment Nubs (CAN) eliminates the need for pinned alignment.

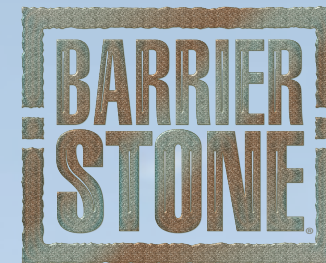

GravityStone® EnCore is an Earth Retention System that provides solutions to a variety of site needs and project requirements. The system creates graceful and durable retaining walls that can be built serpentine, straight, single height or tiered. Economical and easy to install, EnCore in conjunction with geosynthetic reinforcement creates durable, soil reinforced walls.

SO SIMPLE. IT'S ADVANCED

- ◆ More economical and flexible than other SRW or machine-laid products.
- ◆ Uses above and below grade.
- ◆ 1.33 sq. ft. per unit and 15% less weight than traditional 1 sq. ft. SRWs.
- ◆ Optional Textures and Geometry.
- ◆ Flexible Alignment Options.

GravityStone Edge® puts Precast Modular blocks at a significant disadvantage. With this 1.33 sq. ft. unit, 6 structural solutions can be created within 1 product. Utilizing MSE and Modular structural systems, Fills, Cuts, and above grade structures are easily built. Multiple face geometries and textures can be formed using Forged Face (N.E. Face®) the look of wet cast made on a block machine, or using the most efficient face on the market, Abraded Face®.

CLOSING THE GAP
BETWEEN FORM AND FUNCTION

- ◆ Create beautiful and functional fences, privacy and sound walls.
- ◆ Enhance the surrounding environment.
- ◆ Reduced installation cost.
- ◆ Select from a variety of colors and texture.

BarrierStone® combines the art and science of manufactured fence systems. BarrierStone® provides an efficient and effective way to enhance anotherwise bland, and purely functional structure. Complimenting nature rather than competing with it, BarrierStone® is the contractor's choice.
