ABOUT US

STRUXURE

INNOVATORS OF THE MODERN-DAY LOUVERED ROOF

"WE SPECIALIZE IN BRINGING THE INDOORS OUT AND CHANGING THE WAY PEOPLE LIVE THROUGH DESIGN AND INNOVATION EVERYDAY"

StruXure, Inc. was founded in 2011 by CEO and Chief Product Architect, Scott Selzer. As a former middle school teacher with a part-time remodeling company, Scott specialized in building decks, pergolas, basements and other home improvements projects. Inspired by his students to follow his dream to become a full-time entrepreneur, Scott started Adjustable Patio Covers, a company specializing in outdoor spaces.

With a large demand for patio covers that would allow shelter from inclement weather conditions while receiving maximum airflow, Scott began distributing Louvered Structures, an adjustable cover originating from Australia. As the first company to bring this product to the east coast, popularity grew around the louvered structures and Scott quickly found ways to re-design, innovate and patent a higher quality version of the product to provide to his local customer base, The StruXure System.

Engineered and designed to withstand all types of weather conditions, the StruXure Pivot was the new company's first offering in 2011. Since then, StruXure has become one of the fastest growing privately held companies in the United States. This growth led us to move into a new state-of-the-art manufacturing facility and corporate headquarters in North Georgia. We expanded our operations from the Southern California office and manufacturing facility to a larger West Coast manufacturing facility, located in Nevada, Fall of 2017. We opened additional distribution facilities to keep up with our growing national dealer network. With StruXure dealers from Canada to the Caribbean, we are poised and ready to lead the way to more innovative outdoor living across North America.

In addition to being a smart louvered structure manufacturer, we also specialize in technology and design with a focus on architectural innovation. Our 'smart structures' continue to evolve and provide an adjustable atmosphere for your outdoor living needs. We strive to continue updating our products and really changing the way people enjoy the great outdoors throughout the entire year.

GROWTH

As with any company or product, the proof is in the pudding, and StruXure is no different. We have experienced incredible growth as people discover what a louvered structure is, and how the StruXure system can change their lifestyle. We often see jaws drop when they see an StruXure system for the first time. We were recently awarded a spot on the Inc 5000 fastest growing companies.

MISSION

We want to help homeowners enjoy their corner of the world and businesses profit from the addition of dependable spaces for their customers, while still allowing them to enjoy the outdoors. StruXure strives to help Architects and Designers create amazing natural spaces and Dealers and Builders the ability to provide something their customers will love.

Designed, Fabricated & Assembled by American Craftsmen

TO YOUR EXACT SPECIFICATIONS

StruXure luxury systems are manufactured entirely in the U.S. by American workers who take great pride in what they do. Our team of people really care and are passionate about building the best system made — and that dedication shows in the beauty and quality of all our products.

Each StruXure system is engineered to exceed all standards and expectations. They're designed to meet Florida's stringent hurricane codes, as well as withstand heavy snow loads in the cold of winter. Plus, each StruXure system is fabricated and powder coated to order, made to exact specifications, which makes for a better fit and finish and a cleaner looking system.

Ideal for any outdoor living areas, such as patios, decks, lanais, verandas, entryways, courtyards, outdoor kitchens, swimming pools and spas. It's a perfect enhancement for patron comfort at Country clubs, restaurants, hotels, resorts, theme parks and sports venues. Select from a variety of available colors, materials and finishes to complement any architectural style and conform to your aesthetics.

craftsmanship at StruXure.com

Pivot

The original StruXure system has been improved and perfected since its inception in 2011. Its award-winning pivot design gives a full 135° range of motion to provide a cool oasis, regardless of the sun's position. Now available with StruXure myLink™ technology, the Pivot can intuitively control the effects of the weather to enhance your outdoor lifestyle.

CLOSED

When closed, the patented louver design interlocks, providing a solid shelter from rain. Water is pitched into the system's 360° integrated gutter.

ANGLED IN

Shaded space provides protection from the harmful effects of the sun. The Pivot provides SPF protection and allows you to spend more time outdoors without added sun exposure.

OPENED

Allow maximum light into your space with the louvers fully opened. Minimizes resistance and uplift in high winds.

ANGLED OUT

Angled louvers provide cool shade and air flow without blocking your blue sky view.

Pivot to create shade or shelter from the elements.

THE AWARD-WINNING PIVOT DESIGN IS CHANGING HOW WE LIVE OUTDOORS, WITH A FULL 135° RANGE OF MOTION.

Basic Components

The Complete StruXure System In Its Simplest Form

THE CONCEPT

The louvers open to allow sunlight in, and close to provide shade and shelter. Water is directed from the louvers to gutters, and down through downspouts either independent or incorporated into columns. While it seems simple, there are a lot of pieces that have to come together seamlessly to make it all work perfectly. In this section, you can see a complete StruXure system in its simplest form, with the basic components or building blocks that make it work.

BASIC COMPONENTS

- ① Post *Post Bases & Bracket
- ② Beams & Connections
- ③ Gutters
- ④ Louver *Pivot & track bar
- ⑤ Additional Hardware
- ⑥ Operation Options

Basic Components

/ POST / POST BASES & BRACKET

POST

- A** Column 4" x 4" x .125"
Column 4" x 4" x .250"
- B** Column 6" x 6" x .125"
Column 6" x 6" x .250"
- C** Column 8" x 8" x .250"

POST BASES & BRACKET

- D** Post Bracket 4" x 4"
- E** Post Bracket 6" x 6"
- F** Post Bracket 8" x 8"
- G** Post Base Bracket 6" x 6" and 8" x 8"

Basic Components

/ BEAMS / CONNECTORS

P Post Bracket 6" x 6"

Q Beam Corner Connector

R U-Channel Connector

Basic Components

/ GUTTERS

GUTTERS

S Corner Gutter

T Pass Through Gutter

GUTTERS

- U Gutter (Standard)
- V Gutter (Commercial)

Pivot: 2 x 8 beams, 2 x 8 beam connectors,
with the 5 ½" gutter

Pivot XL: 2 x 10 beams, 2 x 10 beam connectors,
with the 7 ½" gutter

Commercial Gutter has three (3) times greater rain water capacity
than StruXure's existing industry leading Standard Gutter

The unique louver profile allows the louvers to interlock, creating the largest rain channels in the industry. Thus, allowing for more water to flow freely into our 360 degree integrated gutter system. StruXure's patented Pass Through Gutter technology allows for rain water to pass from one independent zone to the next allowing for superior drainage performance.

Basic Components

/ LOUVER / PIVOT & TRACK BAR / MOTOR

- W Louver
- X Pivot Pin
- Y Track Pin
- 1 Track Bar
- 2 Cap Bar
- 3 Pivot Bar
- 4 Motor

- 12 Extension tube sealing ensuring IP67
- 13 RF (Radio Frequency) Remote
- 14 High quality DC motor:
 - Ultra sonically welded plastic cover
 - Quiet, reliable, self locking acme screw
 - Low noise lubricated for life gear
- 15 Motor mount
Custom StruXure Bracket for easy installation

Accessories

ACCESSORIES:

Lighting & Fans, Corbels, Cornice Trim

LIGHTING & FANS

Accent lighting can be included with your pergola, enhancing the look and feel of your patio. Outdoor rated fans are selected by the client or designer and StruXure can provide proper fan beams for connection. These roof accessories would either hang below the louvers or reside in a corner or perimeter area of your patio cover. Either way, they are installed in a way that does not interfere with the adjust-ability of the roof's louvers. Your louvers will still be able to rotate fully and close up completely. There are many practical benefits to these features. When just shade isn't enough to ward off heat waves, a ceiling fan will circulate the air around your patio, forcing hot air out and stirring up refreshing summer breezes.

Accent lighting will let you relax outside even after the sun sets. You can get a ceiling fan that features a light fixture in its center or install separate fans and lights. You may want more than one fan or one fan and multiple lights. Plus, you'll need to determine what style of fan blade most interests you. Wood, aluminum or plastic? Paddle-shaped or leaf-shaped? The possibilities are limitless! Both fans and built-in lighting are great for entertaining and patron comfort, since they allow you to utilize your deck or patio no matter the temperature or time of the day.

Our system can support a vast number
of outdoor fans from different vendors.

Our system can support a vast number of outdoor fans from different vendors

Fan to be selected and provided by client or designer. Outdoor rated fans must be selected and come in a variety of options

Post Trim Kit

Smart Automation

- Remote Control with WIFI APP (Use both together)
- Automation compatibility
- Use the same controls to automate both the pergola/structure and motorized screens
- More Sensors: Rain, Wind, Snow/Ice, Freeze
- Voice Control (Amazon Alexa Integration)
- Programmability (Different times of the day)
- Full range of radio controls: 10+ color choices
- Technical Support
- Training Support
- 5 year full warranty

MOTOR CONTROL SENSORS

Our system is the most durable louvered structure on the market today! It has been specifically engineered to withstand hurricane force winds, heavy snow loads and everything in between

OPTIONAL SENSORS REACT TO WEATHER CONDITIONS

SOLAR

RAIN

WIND

HURRICANE

SNOW

AUTOMATION APP

At StruXure, when we offer myLink technology, we knew that simply attaching a sensor didn't necessarily make it "smart." That's why we concentrated on integrating meaningful, necessary technology that incorporates automation while also enhancing ease and functionality. The myLink technology provides users a variety of options for programming and controlling their StruXure systems. Operations Managers can program their structure to open and close at certain times of the day, choose preset positions, and re-open to its last known position, guaranteeing the perfect position every time. myLink technology can also automatically open and close your structure depending on conditions such as rain and wind. If excessive wind speeds are detected, Hurricane Mode will override all functions and open the louvers to allow for air to freely flow through the louvers.

myLink AppTM

Available for free download in the Apple and Google Play stores, the myLink app by StruXure provides the ultimate control of your outdoor living environment all from the palm of your hand.

Color Options

COLOR OPTIONS:

Complement Any Space

The StruXure system features five standard color options that can enhance almost any architecture. For unique instances where standard won't do, we are able to provide thousands of custom colors for the perfect match. A chemical textured powder coat makes a more scratch-resistant surface, while giving it a matte finish that is extremely on-trend for outdoor design today.

Material & Protective Coating

MATERIAL

Aluminum 6063-T6. StruXure, Inc. MSDS

SUBCATEGORY

6000 Series Aluminum Alloy; Aluminum Alloy; Metal;
Nonferrous Metal

COMPOSITION NOTES

Aluminum content reported is calculated as remainder. Composition information provided by the Aluminum Association.

KEY WORDS

UNS A96063; ISO AIMg0.5Si; Aluminium 6063-T6; AA6063-T6

COMPONENT	WT. %	COMPONENT	WT. %	COMPONENT
Al	Max 97.5	Mg	0.45 - 0.9	Si
Cr	Max 0.1	Mn	Max 0.1	Ti
Cu	Max 0.1	Other, each	Max 0.05	Zn
Fe	Max 0.35	Other, total	Max 0.15	

Material Notes: Data points with the AA note have been provided by the Aluminum Association, Inc..

PROTECTIVE COATING

The premium Powder Coating Process is aesthetically pleasing, produces a durable uniform finish, and can be custom formulated for a range of finishes, including the on trend matte finish.

This extensive line of Powders is manufactured to meet the increasing demands of the appliance and industrial markets. They are the ideal solution for smoothness, low-bake, durability, and physical property requirements. An unsurpassed application development program enables consistently friendly use on a variety of substrates, including extruded aluminum. The coating gives:

- Excellent Exterior Durability
- Available in a Wide Range of Colors
- Good Chemical Resistance
- VOC's are Essentially Zero

Protective Coating

From the world leading powder
coat manufacturer.
