SNOW BRACKET SNOW GUARD

SNOW BRACKET / SNOW GUARDS

TRA Snow and Sun Snow Brackets™ (AKA snow guards or snow clips) are engineered with a safety factor determined by when the entire system fails, not just when the Bracket fails. Many other competitors will tell you they “engineer” their products when all they do is test their device. But we test the entire system to find the fail point, then provide you with a layout designed for your unique project that is safe, strong and reliable.

SO LET IT SNOW!

PRODUCT HIGHLIGHTS

- Snow Brackets™ - available for **every roof type**
- Superior Strength - **Tested** from the sheathing up in the field and in our testing facility
- Most reliable system on the market
- Easily installed on **existing and new construction**
