

## Infinity Canopy Magnetic Latch & Handle Installation Manual

## Overview

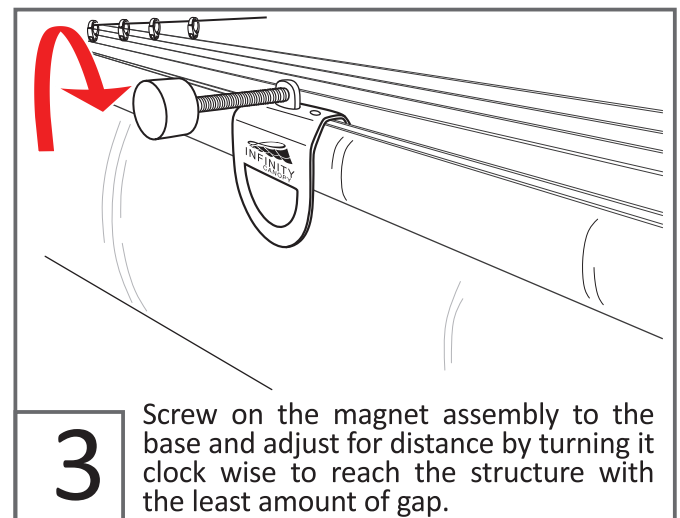

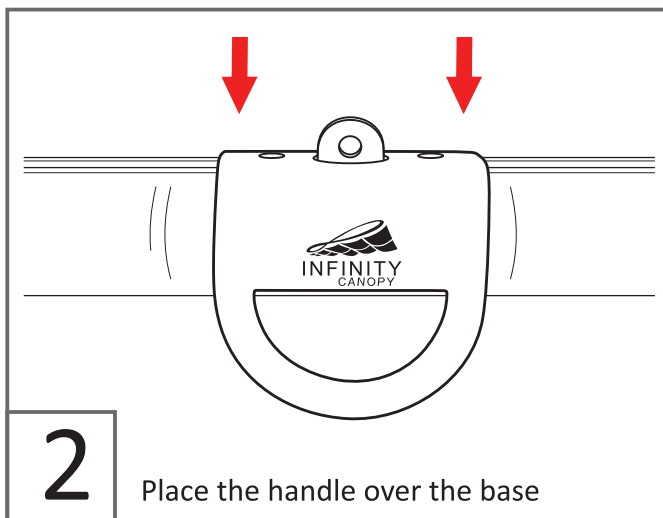

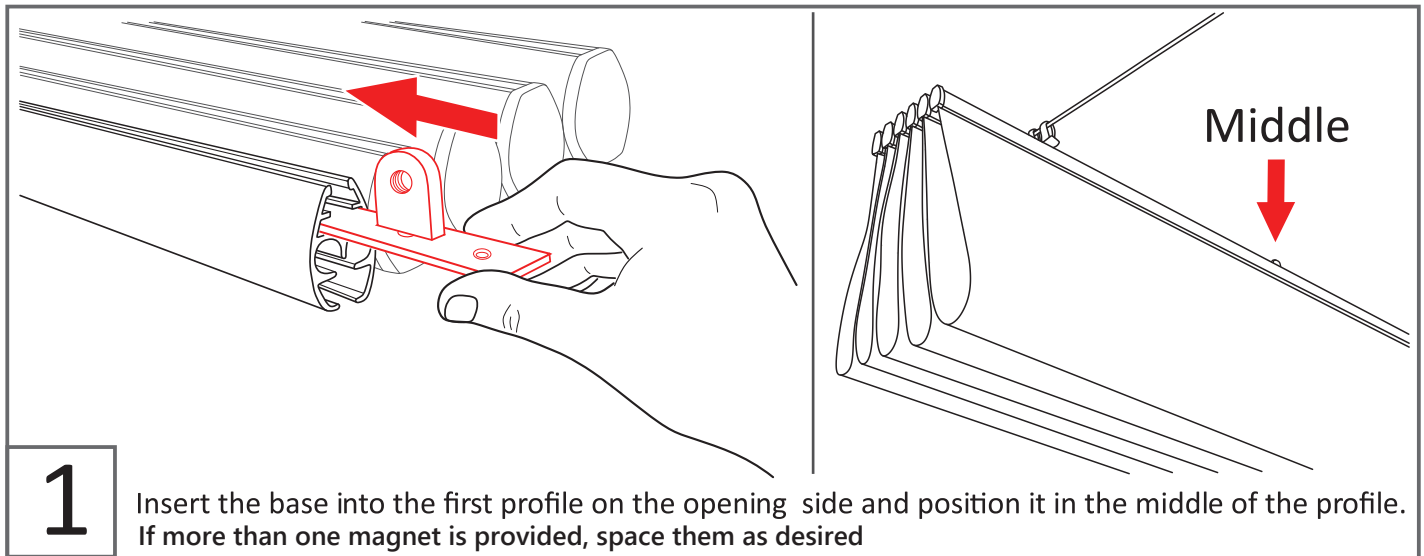

The Infinity Canopy magnetic latch and handle attach to the profile on the opening end of the canopy and provide a handle for pulling and pushing the canopy back and forth as well the magnetic latch to keep the canopy in the open position. The magnet's distance from the strike can be adjusted and the magnet's strength can be decreased if desired. During windy conditions the magnet gets detached from the strike plate reducing wind resistance and protecting your canopy and structure.

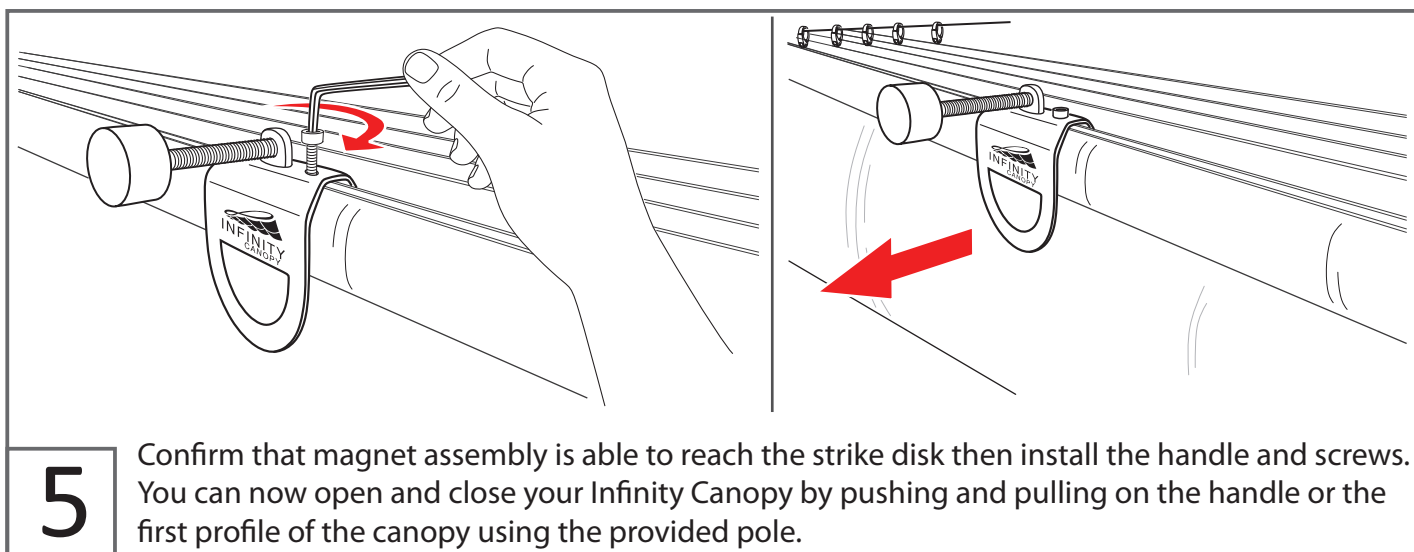

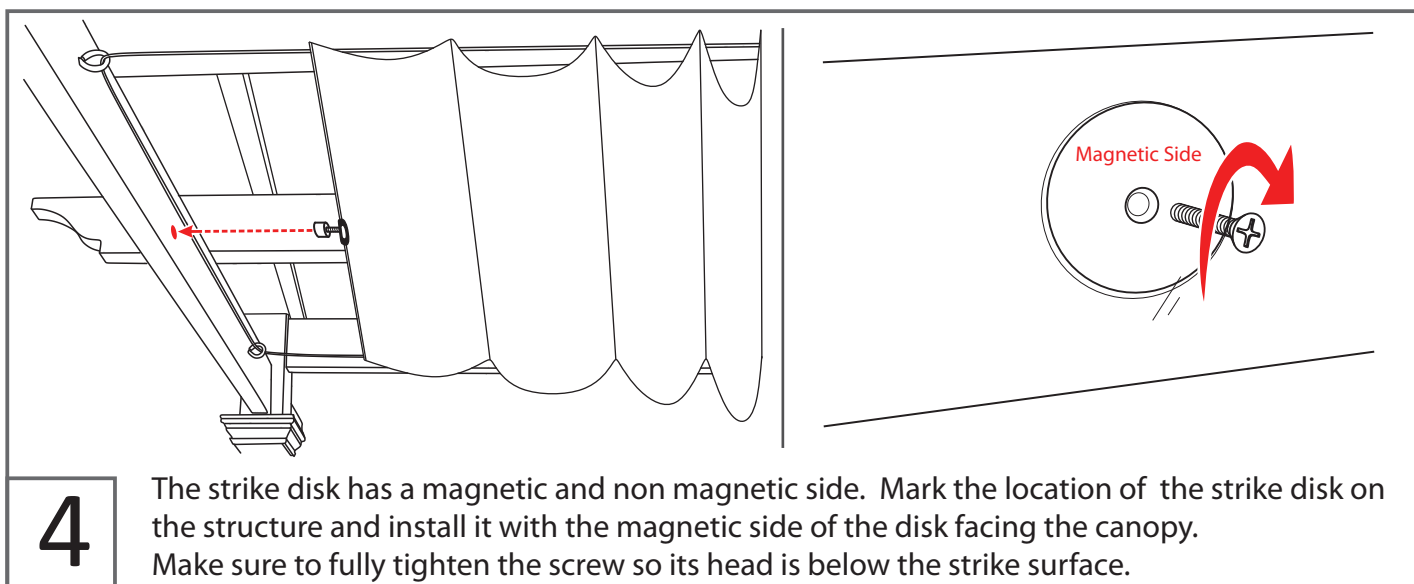

## PARTS LISTING

1. Handle and screws
2. Base
3. Magnet assembly
4. Magnetic strike disk
5. L wrench

## INSTALLATION

**Make sure the magnet assembly and magnetic disk attract and not repel each other.** If repelling open the assembly and flip the magnets inside the cap to correct the polarity. Be careful when handling the magnets, they are very strong and brittle.
