

THE RSF BUILT-IN ADVANTAGE

RSF's Built-in Advantage offers you the heating performance of a high efficiency wood stove with the aesthetic appeal of a fireplace. Whether you're searching for a wood stove to heat your home or a fireplace to add ambiance and warmth, RSF has you covered.

Freestanding stove

- Heats a room efficiently
- An exposed appliance
- A range of budget and style choices
- Space heating
- Can increase insurance
- Adds little to the value of the home

RSF Fireplace

- Heats up to 3,000 square feet
- A built-in fireplace
- Comparable pricing and style choices
- Central heating options
- Won't increase insurance*
- Adds ~12% to a home's resale value

* Most insurance companies do not increase rates with the installation of a fireplace, but do for the installation of a freestanding stove.

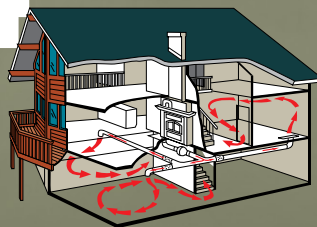

6 styles of EPA certified fireplaces

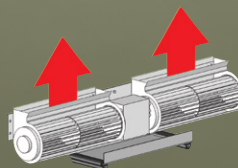

4 certified fireplaces with a clean face option

4 ways to distribute heat throughout the home

3 sizes of blower

2 mobile home approved units

1 Delta Fusion EPA certified at 1.3g/hr

A brand built on **quality**, **innovation**, and **originality**

THE RSF COMFORT ADVANTAGE

Feeling a chill? Feeling too warm? Customize the airflow in your home.

An RSF fireplace can duct heat to the room of your choosing, including the basement or from the room with the fireplace itself.

The RSF Comfort Advantage allows you to:

- Heat up to 3,000 square feet
- Use ductwork and fans to move heat to other rooms
- Heat the basement from the living room
- Use a thermostat to automatically move heat away when it gets **too hot**
