A Trail Application Surface Customized To Your Needs

FlexiStep™ is a unique and innovative trail application surface that is resilient, safe, and minimizes the fatigue muscles encounter when walking on trails. FlexiStep™ is unique to the industry for providing aesthetically pleasing surfaces for our clients that are made of 100% recycled rubber crumb materials, all of which are locally sourced. FlexiStep™ can also be used as permeable pavement for sensitive landscape environments.

What makes FlexiStep™ Unique?

FlexiStep™ combines the best of rubber surfacing with environmental and aesthetic quality. Our trail application surface complies with LEED requirements, which means your facility could qualify for Municipal Tire Stewardship Grants. Additionally, FlexiStep™ can be customized based on your trail surface. Whether you want to design your walking trail with unique colors or feature your corporate logo on your courtyard, Softline Solutions can turn your vision into reality.

Custom design options available
