Creating safer, healthier, and more effective public spaces

SAFETY SURFACES & RUBBER MOLDED PRODUCTS

Softline Solutions

Our Products

FIRSTBASE

IPEMA certified safety surfacing - designed with safety in mind, FirstBase surfacing will keep children safe and happy.

SEALFLOOR

SPLASHSAFE

Our impermeable surfacing reduces slip hazards for spray parks and pools, and can be customized with different colours and designs.

FLEXISTEP

A comfortable and durable pathway system, FlexiStep surfacing is maintenance free, comfortable to walk on, and looks attractive.

PHYSISURFACE

A high wear and impact absorbing system, PhysiSurface minimizes fatigue while increasing surface traction.

FASTTRACK

FastTrack, our running track surfacing, is machine laid and is a durable system that will reduce athletic fatigue.

VISTALINE

Vistaline Products are unique landscape and playground elements for your progressive design project.

We are committed to providing the safest surfaces for children's play spaces. This is why Softline has taken the extra step in ensuring its surfaces meet ASTM and other standards and are certified by the International Playground Equipment Manufacturers Association (IPEMA). Visit www.ipema.org to verify our certification.

Our Project Process

**"Transparency is key.
We'll make sure you're
kept informed at every
stage of your project."**

Design Help

We will combine your vision with our product experience to create a great design, and facilitate using our products in your design.

Kickoff

We care that the project is completed correctly the first time. Before starting, we'll make sure that all the key project details are confirmed and correct.

Build

Our crew will complete the work professionally with minimal interference to you. The project manager will maintain contact with you throughout the project.

Completion

Upon completion of your project, we will inspect the site with you to make sure you are happy and satisfied with our work.

Additional

Ongoing Maintenance

Our products are guaranteed with a 6 year warranty - contact us for further details.

Change Orders

Project details can change. We ensure that change orders are understood and agreed upon by all parties.

ATB Plaza

"Limited site access, with a winter deadline - despite the challenges, the project turned out well"

The Project:

This courtyard playground project features our FirstBase playground surfacing and PaintTop designs to create a fully customized theme. With the site below road level and limited access, Softline craned in materials and equipment, and completed this project during the winter.

Highlights:

- Site was 25 ft below road level, in a sunken courtyard. We overcame this challenge by craning in materials and equipment.
- Built on a suspended concrete slab with special attention to drainage.
- Project was completed during the winter using heating and hoarding.

Broadmoor Playground

"The workmanship led directly to the success of the Broadmoor Spray Park and Playground"

The Project:

A turnkey, complete project package. This park build included our FirstBase and SealFloor surfacing to create amazing designs that complement the theme and design of the playground. Softline also completed the necessary groundwork, landscaped the surrounding area, and installed all play equipment.

Highlights:

- The EPDM rubber surfacing designs complement the park's theme.
- Unique rubber mounds add play value.
- A spray deck, natural play area, and playground all in one public space.

Broadmoor Playground

Fultonvale Playground

"The rubber surface ensures that children playing at heights are safe and protected"

The Project:

Everyone, regardless of disabilities can experience the power of play with FirstBase. This project required a safe surface with great accessibility. FirstBase fit the requirements, providing a seamless and safe surface that individuals with disabilities can use. This project used pigmented FirstBase which complements the play area design.

Highlights:

- Uses pigmented resin, our new colour surfacing option. This system is a cost effective colour design option.
- Vertical joining details between FirstBase and sand areas of the playground.

Potash Corp Playland

"A bright and inspiring surface that adds play value and encourages interactive play"

The Project:

This park design exemplifies the aesthetics and play value that is created by our surfacing. The project included climbing hills for active play, and rubber surfacing on the concrete steps to add colour and increase traction.

Highlights:

- FirstBase installed on embankments and on steps.
- Bright colours and circular designs.

Redstone Park

"Helping to build a new community by creating a fun and bright playground surface"

The Project:

With our capability to create unique surface designs, the developer designed this park surface to reflect the Redstone Community logo. As a centerpiece for the surrounding landscape, our FirstBase playground surface highlights the playground .

Highlights:

- Complex design using 4 different colours, with curved design patterns.
- This surface design depicts the Redstone Community logo

Legacy Centre

"Innovation in action. A rooftop playground with rubber mounds, playful designs, and artificial turf"

The Project:

Built to commemorate the wildfires that swept through the area, our products and services played an integral part in the Legacy Centre playground. Constructed on a rooftop, this playground features our rubber mounds, artificial turf and design patterns to add play value to the area.

Highlights:

- This rooftop playground project was only possible due to Softlines adaptable construction methods.
- 3D rubber mounds with tunnels and mounted play equipment.
- Artificial turf surfacing enhances the tactile experience.

Calgary Golf & Country Club

**"The perfect way to
revitalize an old, worn
path and upgrade the
landscape quickly"**

The Project:

This FlexiStep surface was laid over a cracked and crumbling asphalt surface, resulting in a cost effective solution to quickly bring new life to this path. FlexiStep was also installed on the raised balcony in full colour EPDM.

Highlights:

- Attractive and effective solution to revive a cracked and worn asphalt or concrete path.
- Provides better comfort and safety to users.
- More aesthetic appeal than standard asphalt or concrete.

Milk River Pool

"Extending the pool deck life while providing a safe, non-slip surface with bright colours"

The Project:

SealFloor was installed over an existing cracked concrete pool deck. SealFloor enhanced the pool surround with a safe and colourful surface that was much more cost effective than breaking out and replacing the concrete pool surround.

Highlights:

- Improved the look of an existing swimming pool.
- Extended the life of the pool deck 10-15 years.
- A non slip, fall-safe surface.
- Reduced the threat of falling or tripping over uneven concrete.

Make Your Playground Project Stand Out.

Vistaline Rubber Molded Products.

Rubber Products

**"VistaLine Products
make your landscape
and playground
projects stand out"**

The Overview:

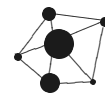

Vistaline Products are unique landscape and playground components manufactured from recycled rubber. Multiple product ranges are available to suit your landscape or playground project.

The Benefits:

- Vistaline Products are lightweight, which allows for faster install and transport times.
- Can meet safety standards for falls from up to 6ft
- Endless design combinations.

VistaLine Rubber Products

Design Ranges

Rocky

Bring the wilderness into your project with our Rocky range. Available in multiple sizes and finishes.

Foothills

Inspired by natural boulders, the Foothills range is available in multiple sizes and finishes.

Giant Games

Add some fun to your project with our Giant Games range: dice, blocks, and more!

Enchanted Forest

Link play zones together or create unique seating areas. We offer many sizes and combinations of tree stumps and logs.

Shapes

Let your imagination run wild with our modular shapes range. Combine them together to create your own unique design.

Custom

We offer custom finish options and bespoke molded products. Contact us to see how we can assist with designing your project.
