SPLASHSAFE

A Sealed Surface Application Customized To Your Needs

SplashSafe™ is a unique and innovative coating that provides a sealed surface that is resilient and safe. For optimum results, SplashSafe™ is applied to a SealFloor™ surface which is unique product to the industry as it provides an aesthetically pleasing surface for our clients that is made of 100% recycled rubber crumb materials, all of which is locally sourced. SplashSafe™ is not limited to splashpads and pool surrounds; other applications include equestrian areas, animal enclosures and shower rooms.

What makes SplashSafe™ Unique?

SplashSafe™ combines the best of sealed rubber surfacing with environmental and aesthetic quality. This application along with our pour in place surfacing complies with LEED requirements, which means your facility could qualify for Municipal Tire Stewardship Grants. Additionally, SplashSafe™ can be customized based on your surface. Whether you want to design your area with unique colors or feature your corporate logo, Softline Solutions can turn your vision into reality.
