Field Area

Total Sq Ft + 15% (+/-) for waste Total Sq Ft: ____

1/2 Square Cartons Cartons: ____

ArrowLine Shake ArrowLine Slate Infiniti Generations
Color: _____

Calculate total area as normal, factor in an additional 15% for waste. With excessive Hip and Valley, it may be necessary to increase waste percentage to as much as 17%. If you are calculating a material list from a blueprint, it is necessary to factor the roof pitch. NOTE: Minimum pitch requirement is 4/12.

4/12 = 1.054	7/12 = 1.158	10/12 = 1.302
5/12 = 1.083	8/12 = 1.202	12/12 = 1.414
6/12 = 1.118	9/12 = 1.250	

Hip/Ridge Assembly Calculate total linear footage. Add 5%, and divide by 10 for number of pieces. **Vented Ridge** will require three components: Trimline Venting, Ridge Starter Base and Hip/Ridge Caps. Fasten with 2" Hex Head screws. **Non-Vented Ridge/Hips** require two components: Starter Base with Foam and Hip/Ridge Caps. Fasten with 1-1/2" Hex Head screws.

Roll-over: Calculate entire perimeter of roof area, add 5%, and divide by 10 for number of pieces. No Rake starter & J-Channel will be used.

Rake Starter & J-Channel: Calculate total linear footage of gable roof edge, add 5% and divide by 10 for number of pieces. Always use equal number of pieces of Rake Starter and J-Channel. (NOTE: This application requires the combination use of Eave Starter, Rake Starter and J-Channel.)

Valley Assembly Calculate the total linear footage of valley and divide by 10 for number of pieces. Consider overlap and overhang in your measurements. **Open Valley** requires 2 pcs Valley Starter Strip per Valley Flashing. Measure length of valley and divide by 10'. Add enough waste for cuts and laps. **Closed Valley** requires three components: Valley Flashing, Valley Cap, and Filter Foam. Measure length of valley and divide by 10'. Add enough waste for cuts and laps.
