CLASSIC DESIGN MEETS VERSATILITY

Since 2008, the Metro Collection has been one of Ex-Cell Kaiser's most popular receptacles. These self-contained recycling stations feature a classic, tapered design that compliments both traditional or contemporary décor and adds visual interest to any space.

Versatility and functionality are achieved with this collection of recycling stations available in 1, 2, and 3 streams. The Metro Collection XL further enhances the offering with 1 or 2 stream units of almost identical capacity, but a slightly smaller footprint. These varying capacities and streams allow a consistent look to function across the diverse needs of any facility.

Other features include all steel construction, individual plastic liners, rubber feet to keep unit elevated. Each unit comes with 3 removable, interchangeable tops to keep up with customers' changing needs and a set of 7 waste stream identifier decals. The units come standard with either a hammered copper powder coat finish or in stainless steel, however custom colors and graphics are available and the large surface area makes these units ideal for big, bold logos.

The Metro Collection's adaptable, stylish design can help customers achieve exactly what they want from their recycling program.
