EIDEINDUSTRIES.COM

QUALITY SINCE 1938

When Stan Eide started his awning business in the 1930s, he immediately understood that low-cost products were more expensive in the long run. The Eide family built their reputation on the design and manufacturing of premium awnings using state-of-the-art fabrics for customers who appreciated the long-term value of quality.

Today, Eide's experience in high-quality metal and fabric structures is second to none. Whether your project starts on a napkin, CAD or virtual platform, our integration of engineering, fabrication and installation is your guarantee that our products are built to last.

- Fabric and Metal Structures
- Kinetic Shade Systems
- Architectural Shade Structures
- Canopies, Awnings, Cabanas
- Tension Structures
