

THE **AMERICAN**
SERIES

The American Series

The Most Versatile Wood Burning Fireplaces

ACUCRAFT
Fire Reimagined.

The All-New American Series - Define Every Moment Inside or Out

The attraction and warmth of a wood burning fire is an indelible part of the fabric of America. It has provided solace, comfort, and a place for friends and family to gather for generations. To honor this natural attraction to fire and to celebrate the moments and memories to come, Acucraft has revolutionized the wood burning fireplace with the all-new American Series, available in indoor and indoor/outdoor models.

Indoor/Outdoor

Timeless Design, Modern Performance

The American series was inspired by Acucraft customers, architectural partners, and the iconic look of an open-hearth fireplace that has forever been the heartbeat of the American home. Featuring a timeless look, clean structural lines, robust fixtures with modern innovation, and the most advanced firebox performance possible.

Fire Your Way

The captivating sound, look, and feel of a natural wood fire has never felt more alive or been more in your control. Whether you choose the indoor series or the indoor/outdoor American series, you'll enjoy complete combustion control and efficiency for the longest possible burn time, and the unmatched versatility to enjoy it with the door(s) closed, open, or completely removed for a true open-hearth feel.

An Exhibition of Steel and Flame

The Indoor American series revolutionizes wood burning fireplaces with a bold design and a tall, unobstructed flame view that brings the natural beauty of a wood fire to the forefront.

- Large, single swing door
- Reversible opening preference
- Tall, unobstructed flame view
- Advanced combustion control
- Deep, oversized firebox
- Door closed, open, or off operation
- Horizontal or vertical log stacking
- 100% outside air for combustion
- Designed and built in the USA

Rugged Beauty Inside and Out

The I/O American series brings our unmatched viewing versatility and revolutionary burn control to a fireplace that seamlessly blurs the lines between what's inside and out.

- Operate from inside or out
- Allows for cleaner outside loading
- Doors closed, open, or off operation
- True open-hearth burning capability
- Direct pass-through viewing
- Large, single swing doors
- Reversible opening preferences
- Tested and certified for US and CAN
- Advanced combustion control
- Deep, oversized firebox
- Horizontal or vertical log stacking
- 100% outside air for combustion
- Designed and built in the USA

Expand Your Point of View

Enjoy both sides of a natural wood burning fire inside your home with our American conversion system that transforms the indoor/outdoor series to a two-sided indoor fireplace.

- Expand the look and feel indoors
- Operate and enjoy from either side
- Two-sided adjustable air flow venting
- Doors closed, open, or off operation
- True open-hearth burning capability
- Direct pass-through viewing
- Large, single swing doors
- Reversible opening preferences
- Tested and certified for US and CAN
- Advanced combustion control
- Deep, oversized firebox
- 100% outside air for combustion
- Designed and built in the USA

American strength to the core

Our revolutionary American Series wood burning fireplace is true to its namesake — it’s designed in America and built in America. Every sheet of thick gauge steel, and every welded seam is assembled by our craftsman in the hard-working community of Big Lake, Minnesota, and then backed by our Lifetime Warranty and 100% Product Satisfaction Guarantee.

Feel the flow

The Acucraft American Series uses two separate air flow systems:

1. *Combustion: doors are closed, brings air from outside to provide combustion and is then vented outside.*
2. *Room Air Circulation: room air comes into the firebox, is heated up and then blown out through the top heat vents of the fireplace.*

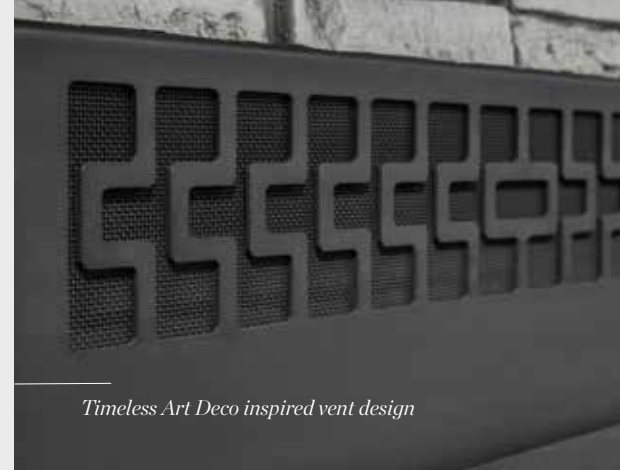

The intake venting directions are defined by the arrows and are color coded according to temperature.

The air is pulled into the firebox, brought down through our airwash system keeping your glass clean.

Outside air is brought in through the combustion air intake.

The air then circulates through the firebox and harmful gases are expelled up the flue and exhausted outside.

Timeless Art Deco inspired vent design

Safe-to-touch, easy operation door handle

Discreet control handle to adjust airflow
