Fire Reimagined.

For more than 40-years, Acucraft has been designing, developing, and perfecting the fireplace experience. Our fireplaces are handcrafted and custom built by a team of engineers and craftsmen who are committed to quality and performance. At Acucraft, we create the most unique, distinctive, and highest quality custom gas and wood burning fireplaces in the world.

Real Custom Fireplaces

Many other fireplace manufacturers sell "custom" fireplaces by simply offering different viewing area sizes, or customized finishing options. At Acucraft, we take your design and make it a reality. Every custom fireplace is built specifically for you and your project, no one else. When we say custom, we mean truly one-of-a-kind fireplaces.

We are the fireplace experts.

When it comes to delivering the absolute best custom fireplace experience, there are no shortcuts. Our commitment to working with you, listening to your needs, and then creating a unique, one-of-a-kind fireplace with unsurpassed quality and performance is our promise. Nobody does it better and our customers agree.

"Over the past 20 years, I've installed hundreds of fireplaces and Acucraft is the best...they're stronger, more robust, and really heavy-duty."

- Lou Ramirez, Chim-TeX Construction

"I was looking for something that would be a game changer for a new Starbucks in Blaine, WA. Acucraft created something better than I could have ever imagined...made in the USA by people who really listen." - Michael Hill, Otis Investments LLC

Custom Gas Fireplaces

From luxury residential properties and multi-family dwellings to restaurants and sports stadiums, we have done it all. Unlike mass-produced fireplaces, every custom gas fireplace Acucraft builds is for a specific customer and project — backed by our Lifetime Guarantee.

Flame First Design

You can always spot an Acucraft fireplace by looking at the full, towering flames. Our Fireplace Engineers will design your fireplace with a flame first approach ensuring you receive the tallest, fullest flames on the market— average flame height of 8"-12".

Heat Management System

There's nothing more relaxing than the cozy ambiance of a fireplace. Not only can you enjoy the traditional tall, dancing flames of a fire, but with our Heat Management System, you'll experience supplemental warmth, providing the perfect gathering space for endless conversations.

Room Air is Pulled from Your Space into the Internal Heat Exchanger

Heated Air is Vented into Your Space

Insulated Panel System

Custom Burner Styles

Many other fireplace manufacturers think custom fireplaces simply means offering linear fireplaces in different lengths and heights. At Acucraft, we make truly one-of-a-kind custom fireplaces, and that includes our burners. Some of our most popular burner styles include: linear, circular, square, h-shaped, tiered, curved, logset, teepee, torch, rectangular, pole, and multiple-burners.

Custom Fireplace Styles

Custom fireplace designs are often just as unique and bold as the dreamers who desire them. And these days, custom fireplace options seem endless. At Acucraft, if you can dream it, our expert craftsmen can make it. Popular styles include: 4-sided, circular, front & side view, see-through, panoramic, peninsula, single-sided, indoor fire pit, open view, gas logs, and indoor/outdoor.

Linear Gas Fireplaces

Whether you're designing a custom home, new restaurant, hotel or commercial building, a linear fireplace provides the perfect gathering space.

Linear gas fireplaces come in an array of sizes and styles including: single-sided, open-view, or front and side view.

Multi-view Gas Fireplaces

Captivate your audience, seamlessly connect two spaces, or simply provide a warm & inviting gathering space with a multi-view fireplace. Popular styles include: see-through, indoor/outdoor, peninsula, panoramic, indoor fire-pit, and 3-sided.

Seamless view Gas Fireplaces

Experience fire the way you're meant to, with a 360° unobstructed view combined with the tallest, fullest flames available. Create something one-of-a-kind, or choose from popular styles including: four-sided, circular/round, indoor fire-pit, and open (no glass).

Outside air is drawn into the channel between the panes of glass and is pulled into the firebox for combustion

Dual Pane Glass Cooling System

Our dual pane glass cooling system is perfect for any residential or commercial space. With its innovative design, you can enjoy the cozy warmth of a fire without worrying about any safety hazards.

Plus, our system is incredibly versatile and can be installed in almost any space, making it the perfect choice for both residential and commercial applications.

Open View (No Glass)

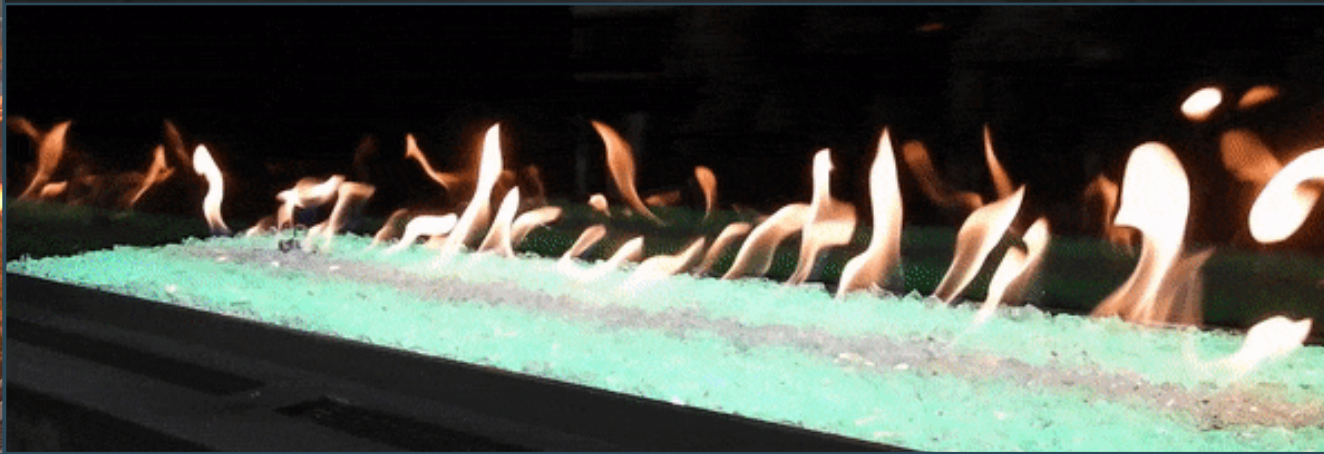

Experience the best of both worlds with our custom fireplaces that blend traditional open-hearth charm with modern sophistication. Our open (no glass) design lets you bask in the warmth of the fire while ensuring your guests remain safe thanks to the firescreen.

Frameless Design

With unparalleled views of the tallest and fullest flames available, this fireplace can be installed flush with a wall and can be surrounded by any non-combustible material of your choice. Whether your style is rustic or contemporary, a frameless fireplace is the perfect addition to any home or commercial space.

Media Options

Every custom gas fireplace comes with premium black reflective glass media to beautifully reflect your flames; but if you're looking for something different we have an array of glass media, stones, and lava rock in a variety of styles & colors.

-1/4" Glass Media -1/2" Glass Media -River Rock -Lava Rock -Polished Stones -Semi-Polished Stones -LED Lighting with Remote

Interior Options

Transform your fireplace into a stunning masterpiece with our black porcelain reflective panels. These panels are designed to reflect the mesmerizing flames and create an infinite flame effect that will leave you awestruck. Alternatively, you can opt to add a mesh backer to the interior of your firebox and finish it with any non-combustible material of your choice, giving you the flexibility to customize your fireplace according to your taste. With these options, you can create a warm and inviting space for endless conversations.

Logset Burners & Logs

Looking for an impressive way to enhance the ambiance of your space? Look no further than our custom logset burners, available in both natural gas and propane options. With our towering flames and hyper-realistic log options, including driftwood, weathered oak, and charred weathered oak, you'll be transported to a cozy cabin in the woods with just the flip of a switch. Whether you're looking to add warmth to your living room or create a cozy atmosphere on your patio, our logset burners are the perfect addition to any home or commercial space.

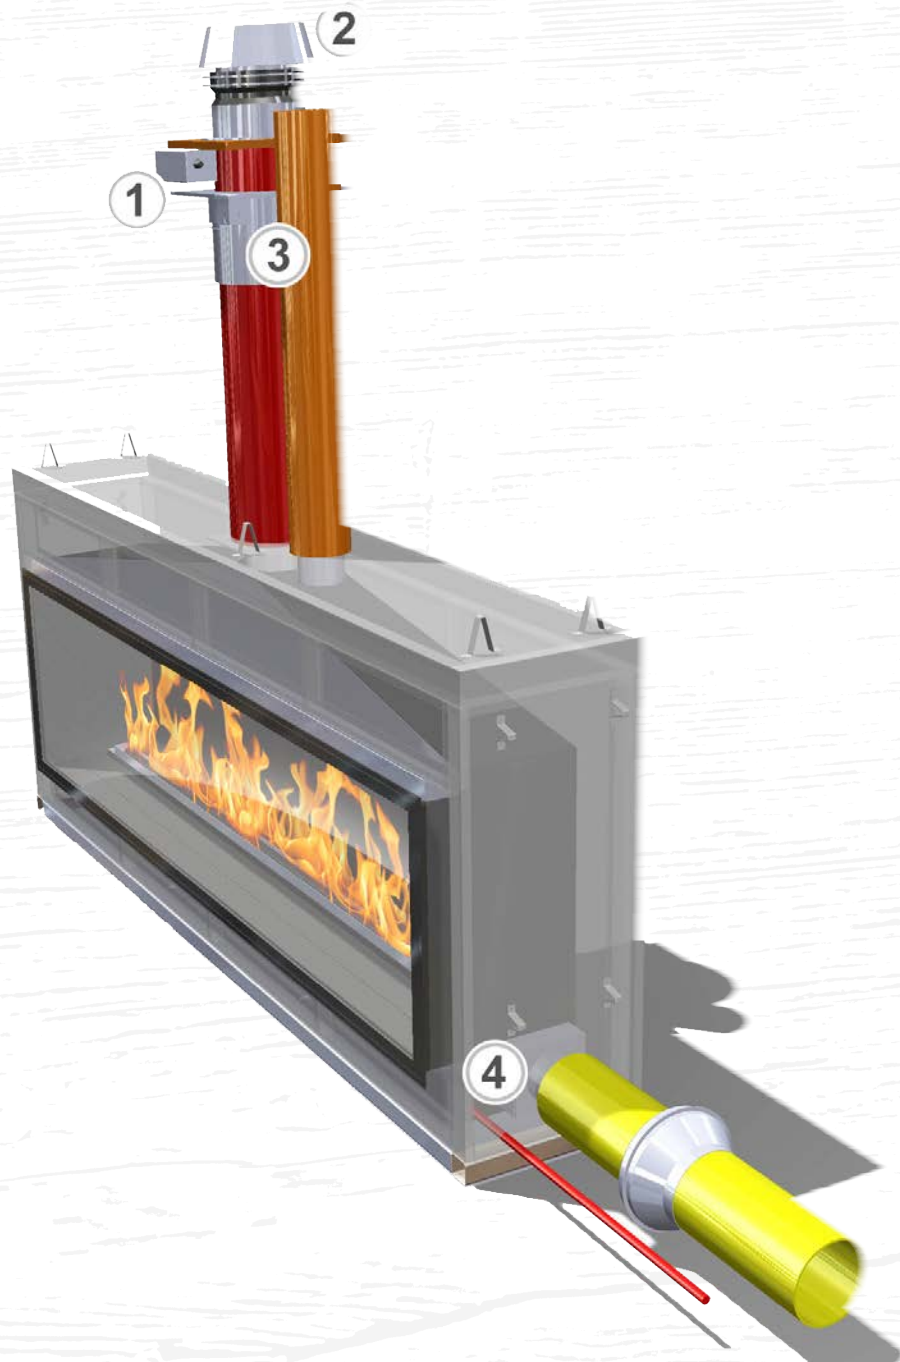

Safety & Certification

Acucraft fireplaces are never mass-produced. Every custom gas fireplace is tested and certified; comes with a custom manual, and a custom 3rd Party label for your one-of-a-kind install.

Nothing leaves our facility without meeting and exceeding our safety standards.

- Exclusive in-house test lab
- Certifying your custom fireplaces to ANSI and CSA standards
- Including sealed (with glass) and open (no glass) options

Gas Fireplace Safety

Our custom gas fireplace systems are designed with multiple safety checkpoints, each of which needs to be met before the system will ignite:

Step One: when the fireplace is turned on it sends a signal to the automatic draft system which opens the damper

Step Two: the exhaust fan engages

Step Three: the proven draft system ensures positive exhaust of flue gases

Step Four: the gas valve opens, signaling the spark ignition, and the flame sensor provides combustion.

Standard Gas Fireplaces

If you're looking for something unique but don't want a fireplace that is custom-designed from the ground up, then our standard gas fireplace options may be the perfect fit for you!

Our Signature Series offers both open and sealed views in a modern, frameless design. Meanwhile, our Timeless Series combines function and form featuring realistic logs and towering flames, available in various sizes and styles to fit your needs.

The Signature Series

The Signature Series is the only gas fireplace that can be operated either with a traditional glass seal or as an open-flame hearth. Choose from single sided, see-through, or indoor/outdoor in 4', 5', 6', 7', or 8' lengths.

The Timeless Series

Enjoy the enduring allure of a classic wood burning fire in just seconds. The Timeless series combines the convenience of gas with our incredibly realistic logsets to produce the tallest, fullest, and most authentic flame front anywhere.

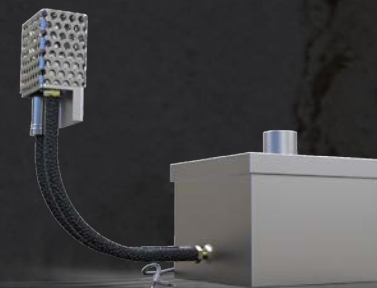

Custom Outdoor Fire

While other outdoor fireplace manufacturers may cut corners with mass-produced, low-quality products, Acucraft takes pride in crafting truly custom fire features designed specifically for your project. Our commercial grade components ensure durability and longevity, making our products worth the investment. After all, quality doesn't come cheap.

Bulletproof Ignition System

When it comes to lighting up your outdoor fireplace, our Bulletproof Ignition System has you covered! With the ability to withstand rain, wind (up to 50mph), and even snow, you can relax knowing your fireplace will ignite effortlessly. Whether you prefer natural gas or propane, our system provides up to 500,000+ BTUs of warmth. Choose from a variety of control and safety options available, including dial timer, remote, and emergency shut off, for ease of mind.

Flexible Options

Our definition of custom means creating fireplaces that are truly unique. No two are alike. We specialize in designing and constructing outdoor fireplaces that are tailor-made to accommodate your requirements, regardless of size or style. Our skilled engineers will customize your fireplace to fit perfectly into any outdoor area. Whether you're working on a complicated commercial project or a lavish residential property, count on Acucraft to make your vision a reality.

Custom Outdoor Burners

We can help you complete your own one-of-kind open-flame concept. Whether you have an existing structure or are fabricating a new one, we can custom design and manufacture a burner to your specific needs - each handcrafted and tested to the same standards as our custom fireplaces.

Safety & Certification

Acucraft fireplaces are never mass-produced. Every custom gas fireplace is tested and certified; comes with a custom manual, and a custom 3rd Party label for your one-of-a-kind install.

Nothing leaves our facility without meeting and exceeding our safety standards.

- Exclusive in-house test lab
- Certifying your custom fireplaces to ANSI and CSA standards
- Safety, wind and even rain testing to ensure proper operation

Standard Wood Fireplaces

We are the definitive experts in wood burning fireplaces. For more than 40-years, Acucraft has been designing, developing, and perfecting the world's best wood burning fireplaces. Our commitment to customer driven designs and satisfaction is only equaled by our commitment to quality and performance.

The American Series

The American Series was inspired by Acucraft customers, architectural partners, and the iconic look of an open-hearth fireplace that has forever been the heartbeat of the American home. Featuring a timeless look, clean structural lines, robust fixtures with modern innovation, and the most advanced firebox performance possible.

— Available in single-sided or indoor/outdoor

The Hearthroom Series

There's nothing quite like the sound and warmth of an open hearth fireplace. With a Hearthroom the choice is yours - doors closed, open, or completely removed - the flame is always perfect. Available in 36", 44", and 48" viewing areas with optional removable firescreen for protection from sparks and embers.

Safety & Certification

Every Acucraft wood burning fireplace is designed and built in America. Every sheet of thick gauge steel, and every welded seam is assembled by our craftsmen in the hard-working community of Big Lake, Minnesota. Nothing leaves our facility without meeting and exceeding our safety standards.

- Exclusive in-house test lab
- Certifying your wood burning fireplaces to UL and CSA standards
- Lifetime Warranty
- 100% Product Satisfaction Guarantee

The Acucraft Difference.

The World's Best Fireplace Experience.
