Fire Reimagined.

For more than 40-years, Acucraft has been designing, developing, and perfecting the fireplace experience. Our fireplaces are handcrafted and custom built by a team of engineers and craftsmen who are committed to quality and performance. At Acucraft, we create the most unique, distinctive, and highest quality custom gas and wood burning fireplaces in the world.

We are the fireplace experts.

When it comes to delivering the absolute best fireplace experience, there are no shortcuts. Our commitment to quality and performance is handcrafted into every fireplace that bears our nameplate. Built in Big Lake, Minnesota, by true craftsmen who know how to conquer the cold and deliver a fireplace that performs as good as it looks. Built from heavy-gauge US Steel and backed by a Lifetime Warranty and a 100% Satisfaction Guarantee, nobody does it better.

CERTIFIED

Signature series fireplaces are ANSI Z21.97 / CSA 2.41-2017 and ANSI Z21.50 / CSA 2.22-2019 certified.

CUSTOMIZED

Acucraft works directly with you to create a truly unique fireplace experience.

HANDCRAFTED

Never mass-produced, each fireplace is meticulously, custom built.

WORLDWIDE

Built in America and shipped directly to you, anywhere in the world.

WARRANTY

Keep the fire burning, each Acucraft firebox is backed by a Lifetime Warranty.

Hy-Vee Partnership

ACUCRAFT
Fire Reimagined.

HyVee
EMPLOYEE OWNED

Since 2019, Acucraft has partnered with midwest grocer, Hy-Vee on their new Fast & Fresh Locations. Designed for the customer on-the-go, Hy-Vee wanted to provide quality, ready-to-eat meals along with an inviting space to enjoy a quick meal. You'll see more and more Acucraft fireplaces popping up in new Hy-Vee Fast & Fresh locations around the midwest!

 Non-Modular: your fireplace ships in one piece.

The Signature Series

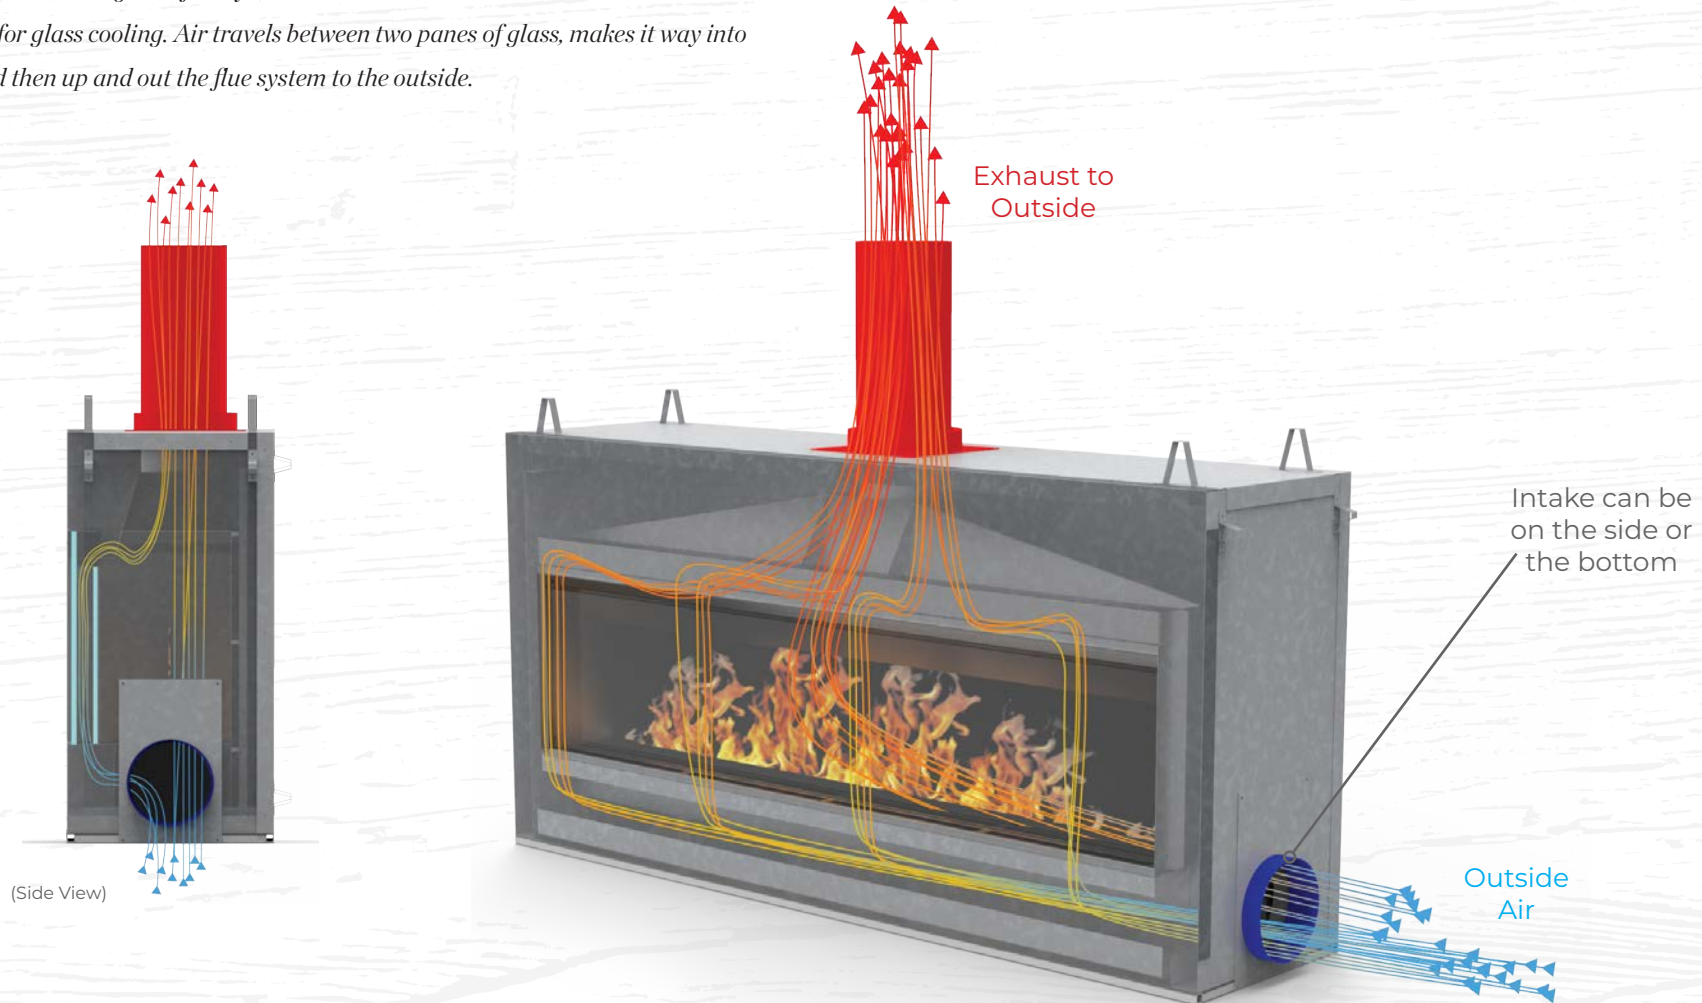

Cooling Glass

Acucraft's Signature Series Glass Cooling System pulls air in from outside into the firebox.

The air then splits into two paths providing combustion and safe-to-touch glass.

The first is for combustion. Air is pulled up through the mesh burner tray for combustion & is then exhausted through the flue system to the outside.

The second is for glass cooling. Air travels between two panes of glass, makes it way into the firebox and then up and out the flue system to the outside.

The Signature Series
