

ACUCRAFT 

VAPOR

» What is VAPOR?
A fusion of water and light
creating the illusion of a
natural, lifelike flame.

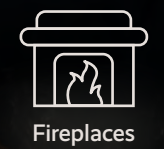

An LED lighting system allows you to select from an array of colors to match your vibe.

Control the flame height, color, and intensity effects via remote control.

Custom

Acucraft is renowned for delivering the tallest, fullest flames on the market, now reimagined in water vapor with our patent-pending MaxFlow™ technology.

By mastering every aspect of airflow – distribution, volume, exhaust, and flame dynamics – we've created an experience unlike anything else.

With patent-pending MaxFlow™ Technology, Acucraft delivers the tallest, fullest, most realistic vapor flames that are safe to touch and powered by precision airflow.

FEATURES + BENEFITS:

Safe to touch

No venting required

Only water + electricity
needed to operate

Installation made easy

Realistic flame illusion

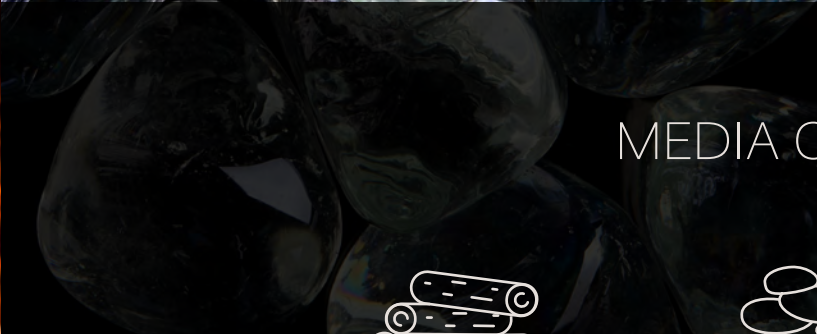

Eco-friendly and
sustainable

» Endless media options
to match your vision.
From natural logs and stones to
modern glass and gems.
