

YEARLY FIELD MAINTENANCE PROGRAMS

Maximize and protect
your investment.

shaw[™]
SPORTS TURF 

Synthetic fields have commonly been promoted as maintenance-free. The truth is synthetic fields do significantly reduce the amount of maintenance. However, it is important for an owner to be realistic about what is necessary to maintain a playing surface to ensure its longevity, performance and safety.

REGULAR MAINTENANCE SHOULD BE PERFORMED TO PREVENT THE FOLLOWING:

- » Premature degradation of fibers
- » In high traffic areas, infill can migrate or displace, resulting in uneven surfaces and unsafe impact levels
- » Compaction of infill resulting in a “packed down” surface that is too hard or slippery
- » Build-up of foreign debris in turf surface collected over time

Shaw Sports Turf’s service after the sale is second to none. Our automated system tracks maintenance needs and will issue a reminder when it is time for important maintenance milestones.

MAINTENANCE

Shaw Sports Turf has designed a multi-tiered maintenance program to support facility operators in the proper care and maintenance of their synthetic surfaces.

There are two levels of formal maintenance programs. They include the Shaw Sports Turf Basic Plan and the Shaw Sports Turf Plus Plan. Each plan will include field inspection and a maintenance summary report at each visit.

		SHAW BASIC	SHAW PLUS
FIELD INSPECTION	Infill Depth	X	X
	Seam Inspection	X	X
	Visual Fiber Wear Analysis	X	X
	Edge Detail Inspection	X	X
	Monitor High Use Areas	X	X
	Inspect Inlays	X	X
GROOMING	Level Infill	X	X
	Brush Fibers Upright	X	X
	Deep Clean Infill		X
	Infill Decompaction		X
SUMMARY REPORT	Field Inspection Documentation	X	X
	Suggested Repairs	X	X
	Checklist and Maintenance Plan	X	X
	Infill Depth Measurements	X	X
	Additional Recommendations	X	X

TWO TYPES OF GROOMING (DEPENDING ON SELECTED PLAN)

1. Standard Grooming

- » Utilize synthetic turf equipment to level the infill and brush fibers upright for the entire field.

2. Premium Grooming

- » Utilize synthetic turf equipment for deep cleaning to remove foreign debris and contaminants. During this process, we utilize equipment with a large magnet to remove all ferrous metal from the field.
- » Utilize synthetic turf equipment to de-compact infill material. This will loosen the infill material to increase the shock absorbency and support the upright fiber.
- » Deep cleaning removes dirt and contaminants and also improves surface drainage.
- » Utilize synthetic turf equipment to level the infill and brush fibers upright for the entire field.

WRITTEN MAINTENANCE SUMMARY REPORT INCLUDES:

- » Detailed documentation of the field safety inspection performed
- » Detailed documentation of the repairs needed
- » Thorough checklist of the maintenance plan provided
- » Infill depth measurements at 10 locations from before and after grooming
- » Ongoing maintenance recommendations
- » Final inspection and walkthrough with the customer

Maintenance Service Plan Provided

Basic: ☐

- ☐ Field Inspection
- ☐ Level the infill
- ☐ Maintenance Summary Report
- ☐ Final inspection and walkthrough with customer

Plus: ☐

- ☐ Field Inspection
- ☐ Deep cleaning to remove trash/debris/metal
- ☐ De-compact infill
- ☐ Level the infill
- ☐ Maintenance Summary Report
- ☐ Final inspection and walkthrough with customer
