EVERITE  [®]
RAISE YOUR EXPECTATIONS [™]

Raise Your Expectations™

Superior Detail

Every Everite door is handmade. We use state-of-the-art equipment to produce the industry's best edge detail and finish. Most models are free from exposed nails or fasteners.

Fine Materials

The best products come from the best materials. Everite sources the best quality kiln dried lumber and composites from all over the world.

Deep Mortise & Tenon Joints

Everite uses the tried-and-true wood joining techniques that have stood the test of time.

Beveled Bottom Rail

Charles River and North County models feature inset paneling with a beveled edge on the bottom rail, eliminating water collection grooves. Water rolls off harmlessly.

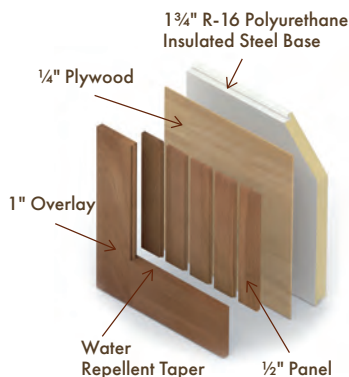

True Divided Lites Standard

Simulated divided lites have become the industry norm. At Everite, true divided lites remain the standard.

North Country CUSTOM SERIES

Built on a Garaga Standard+ R-16 insulated steel base, with its industry leading thermal break between each section, wood end blocks and minimal heat transfer from back to front, the North Country Custom door combines high quality thermal characteristics with the look of real custom wood. Everite offers the highest insulation value and the best construction methods of any wood door in the business.

Warranty: 2 Years

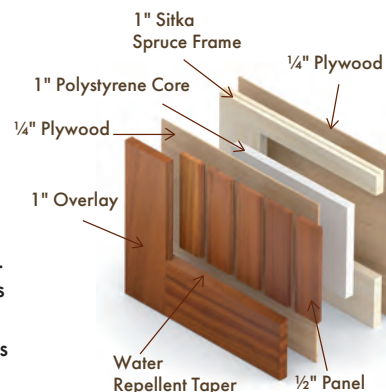

Paint Grade	Stain Grade
Extira, Tricoya, MDO	Doug Fir, Meranti, Radiata Pine, Sapele, Spanish Cedar, Western Red Cedar and others

Charles River CUSTOM SERIES

Built on a stout frame of Sitka Spruce and packed with 1" of polystyrene insulation, these custom models feature time-tested construction details. Overlays are affixed with industrial adhesive and screwed from the backside. No plugs, nails or fasteners show from the front. The beveled bottom rail ensures water runs off harmlessly. Its thoroughly engineered design produces the lightest, strongest and most weather resistant custom doors in the industry.

Warranty: 2 Years

Morano BUILDER SERIES

Built on the same sturdy frame as the Charles River Series, craftsmen attach high quality, 1/4" plywood on both sides of the frame. Inside is 1" of polystyrene insulation creating an R value of 6. Paint grade overlay materials include Extira, a water resistant engineered wood, fine quality marine grade Meranti plywood and Tricoya. Stain grade materials include Sapele with marine grade Sapele plywood. Morano are a great option for cost conscious consumers wanting a well constructed carriage door.

Warranty: 1 Year

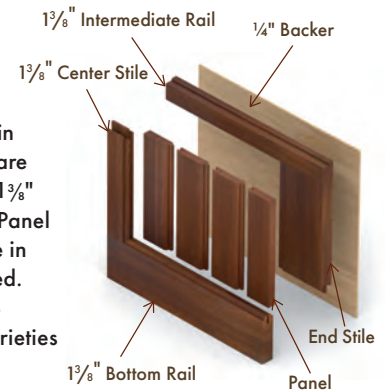

Paint Grade	Stain Grade

Extira	Sapele

Allegheny River SEMI-CUSTOM SERIES

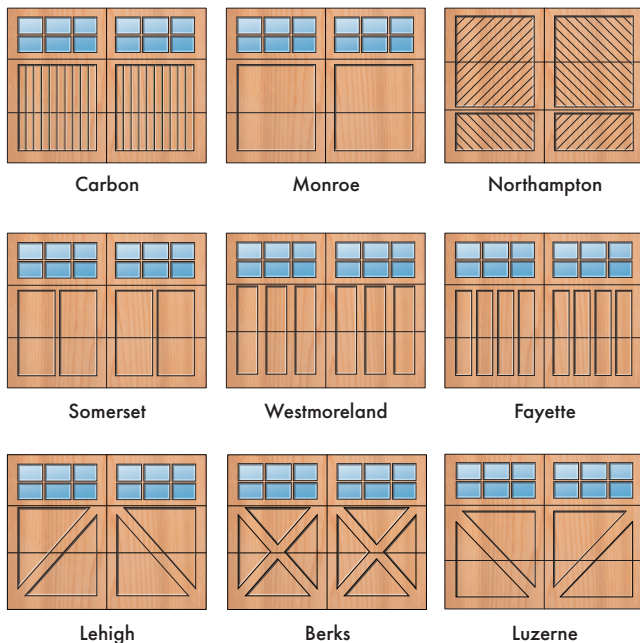

The Allegheny River Semi-Custom Series offers an attractive price for a true carriage door look. These doors are available in paint or stain grade. They are built using Everite's noted 1 3/8" stile and rail frame, cubic. Panel options include flat, tongue in groove, v-grooved or raised. Semi-Custom doors can be made using other wood varieties shown below.

Warranty: 1 Year

Models

Models

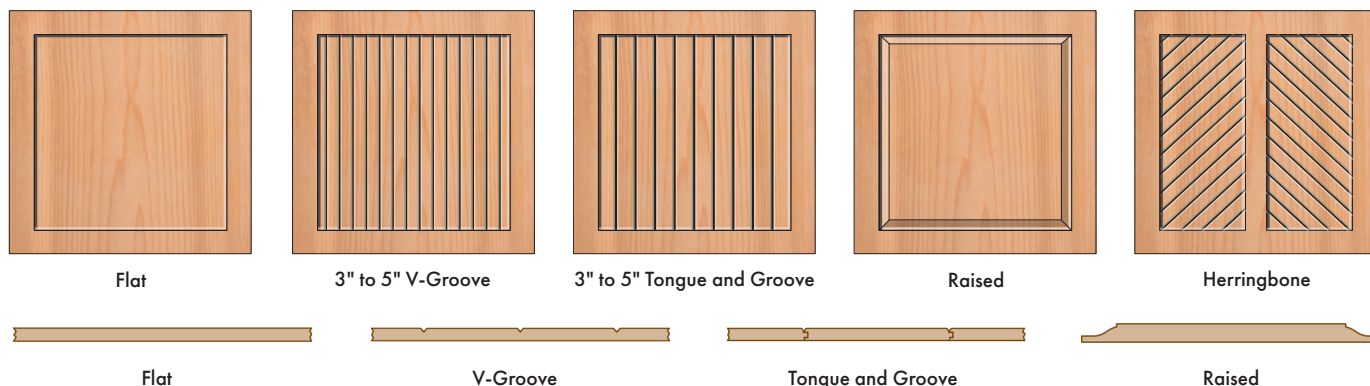

*Raised Panel Model

Panel Type

Panel designs can add depth and character, creating a rich and unique design for your carriage house door.

Windows

Windows provide much more than natural light. They allow you to further customize your garage door.

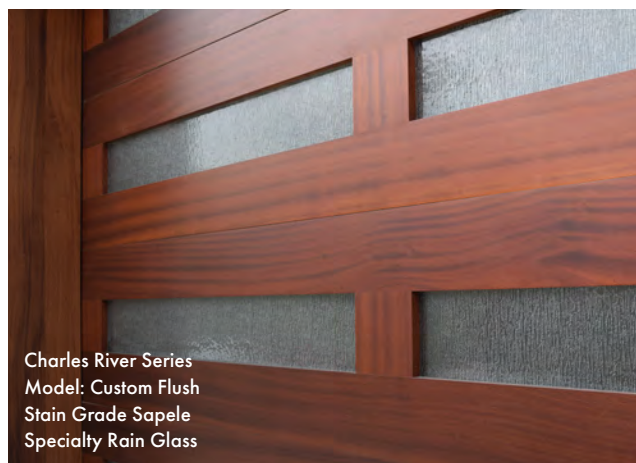

Length Options

Glass Options

- Clear
- Seedy
- Satin
- Tempered
- Rain Glass
- And more
- Safety
- Low E

All of the above are available in insulated or other specialty glass. True divided glass is standard for single pane DSB and most specialty glass. Simulated divided glass, with muntins on exterior side of glass, is standard for Insulated and tempered glass. Interior muntins are available for simulated divided lites.

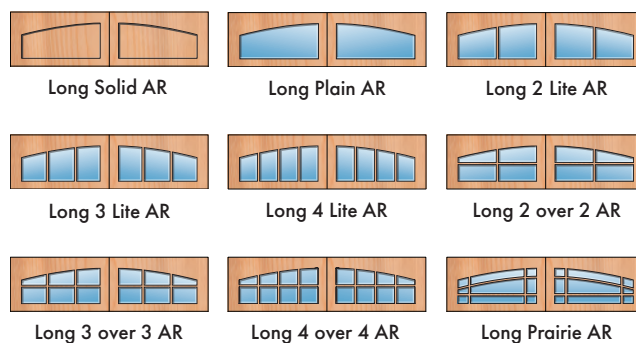

Styles*

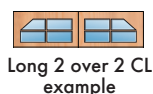

Square (SQ)

Arched (AR)

*Clipped (CL) styles are also available.

Materials

DOUGLAS FIR is native to North America. It is known for its light rosy color and straight grain. Its color reddens over time when exposed to light. Designers appreciate its rich visual texture, grain pattern and its beautiful response to fine craftsmanship and finishing.

EXTIRA is a paint grade, non-structural, engineered wood product suitable for many environments. It is designed to resist damage from moisture, rot and insects. It is solid, dimensionally stable, free of knots or voids, and resists checking, splitting and cracking. Extira cannot be stained.

HEMLOCK is native to North America and is known for its fine texture, straight grain, and stiffness. Its color darkens slightly with age and can be painted or stained.

MERANTI is a medium-to-coarse textured wood native to Southeast Asia. Meranti is one of a collection of species marketed as Philippine mahogany. Its light and dark red varieties produce ranges in color from pale pink to brown and reddish brown.

RADIATA PINE is native to California and is farmed extensively. It's natural color is pale yellow-brown and is generally straight grained. Compared to other pines, there is little contrast in the appearance of growth rings, contributing to its even and uniform texture.

SAPELE is known for its durability and beautiful graining. Native to Africa, the wood has a dark red brown color similar to mahogany. Sapele's excellent response to stain and its color, texture and grain make it a favorite among customers.

SPANISH CEDAR is a close relative of and resembles Honduras Mahogany. Its coloration is light red or pinkish orange with a straight, but wavy, grain. The wood has a moderately coarse texture. Its insect repelling resin adds to its durability.

TRICOYA is a water-proof, paint grade composite panel material designed for extreme weather conditions. Tricoya is the lightest, most dimensionally stable, weather-resistant composite available. Tricoya has an expected life of 50 years. Most paints applied over Tricoya last longer than if applied on conventional composites.

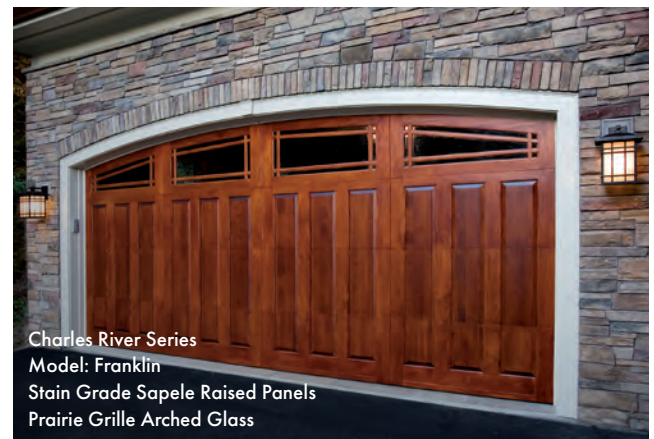

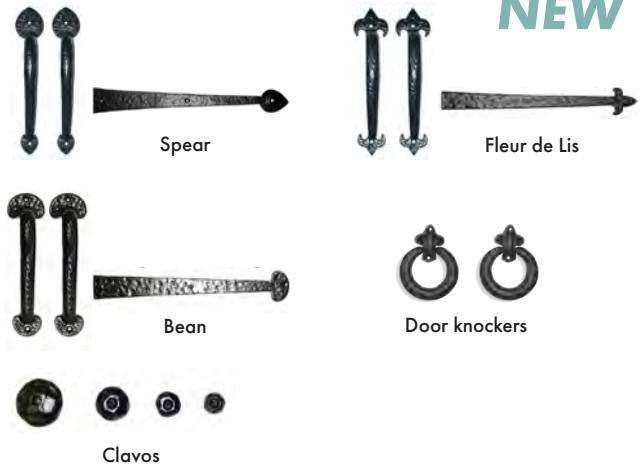

WESTERN RED CEDAR is an American wood with a soft red-brown color and a tight, straight grain with few knots. It can be finished to a smooth, silky surface with little effort. Lightest in weight, it is valued for its distinct appearance, aroma, and its high natural resistance to decay.

Finishing

Ask about factory finishing! Sikkens Door & Window products used for stained doors; Benjamin Moore products for painted doors. Extends the factory warranty by one year. Doors arrive ready to install. Ask about our extended warranties.
