The QuickFold Difference

1 Million+ Cycles

Durable and Reliable

Low Maintenance

Easy Access/No Proprietary Parts

UL325 Listed

Safety Tested

Easy Installation

Delivered Fully Assembled

Fast & Secure

As fast as 8 second 90° Opening

Space Saving

No headroom required

Visible to Drivers

Reduce Car Strikes

USA PRECISION.
USA STEEL.
PROUDLY MADE IN CA USA

QUICKFOLD™ VEHICLE GATE SYSTEMS

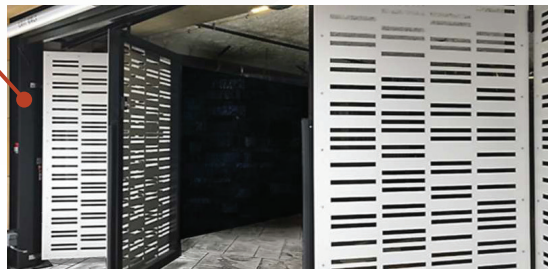

QuickFold + Model 3 Operator

- Architect's choice
- Up to 24' opening
- Heavy-duty motor and gearbox
- All components in single, secure operator tower
- Custom built. Custom sizes and colors.
- Small footprint (smaller than a large pizza box)

Quick Fold XL + Model 6 Operator

- Industrial use
- Up to 40' opening
- Super heavy-duty motor and gearbox
- Components in secure, industrial operator towers
- Custom built. Custom sizes and colors.
- Footprint proportionate to gate

TORXUN: Then and Now

TORXUN, as we are known today, has evolved like most successful companies. TORXUN's founder started an automatic gate installation and service company in 1975 and is known as one of the pioneers in the industry. Through the years, he saw a need for something new—a space-saving gate—and in 1984 his company built and installed the first folding gate system. The second system came a few years later replacing a troublesome roll-up grille. Both are still in operation today. These folding gate systems evolved into TORXUN's QuickFold folding gate system.

Then, in 1998, development of what became the Model 3 swing gate operator began. This unique patented gate operator is a custom formed post that acts as the gate hinge post and also contains electronics and a very strong drive mechanism. The post style gate operator also provides security not found in other drive systems.

Today, TORXUN continues to grow, not only making QuickFold systems and tower operators, but also manufacturing other quality products like the Perform Preformed Splice-Free Loop, SensorVaults for delicate photo eyes, and the AutoPed, the only outdoor rated, UL325 listed, pedestrian gate and door operator on the market. TORXUN offers gate fabrication services by its skilled team of metal fabricators, and, along with TORXUN's team of engineers and draftspeople, helpful sales team and support staff, TORXUN will continue to bring the gate industry new and exciting products into the future. Thanks for your consideration and support. We value the relationships that we get to build along the way and we look forward to working with you.
