

SafeFlex

Durable and Flexible EDPM Rubber Surfacing

SafeFlex is a premium pour-in-place surfacing solution that combines EDPM rubber and a high-quality binder to create a soft yet incredibly durable surface. Its porous properties allow for water drainage and guarantee non-slips. Hand-troweled by certified installers, SafeFlex is designed to provide a soft, safe, and strong bond between the material and its subsurfaces. It is a versatile solution suitable for various applications, including pool decks, patios, entryways, retirement facilities, and pathways.

Product Features

KEY PROPERTIES & BENEFITS

- **Durable**

SafeFlex is engineered to withstand heavy foot traffic, making it ideal for high-use areas like pathways and pool decks. It is resistant to wear and tear, ensuring a long-lasting surface, and designed to withstand the expansion and contraction of concrete during freeze-thaw cycles.

- **Safety**

SafeFlex provides a cushioned surface that reduces the risk of injuries, making it a great solution for areas where safety is a priority, such as pool decks and gyms.

- **Temperature Control**

SafeFlex allows for heat to dissipate through the gaps in the granules, making it a cooler surface than any stone counterparts.

- **SafeSealer**

To maintain its original look and extend its lifespan, we recommend a SafeSealer application by a professional technician every 3-5 years. This process rejuvenates the surface and adds an additional layer of protection.

- **Customizable**

SafeFlex comes in a range of colour, inlay, and border options, allowing you to customize a surface that complements your property's aesthetics.

SafeFlex

APPLICATION AREAS

- **Pool Decks**
- **Patios**
- **Pathways**
- **Entryways**
- **Changerooms**

INSTALLATION

SafeFlex is professionally installed by certified installers, the hand-troweling process ensures a precise and even application, resulting in a flawless surface.

MAINTENANCE

Routine maintenance for SafeFlex is straightforward. Periodic pressure washing helps maintain its appearance and cleanliness, while SafeSealer applications every 3-5 years restore the surface's original look and protect it for an extended period.

Safety in every step.
