

SafeHoof

Top-Tier Equestrian Barn Surfacing

SafeHoof is an innovative flooring solution designed to enhance the safety and well-being of your horses and equestrian facilities.

SafeHoof provides the necessary support and weight-bearing capacity for horses entering and exiting the stable and can also be installed in horse stalls, thanks to its porous and non-slip properties. We use a thicker material to ensure durability, longevity, and cushioning for your barn. Say goodbye to slipping hazards and cold floors during winter with SafeHoof.

Product Features

KEY PROPERTIES & BENEFITS

- **Durability**

SafeHoof is built to withstand the weight and movement of horses, making it an ideal choice for barns. It resists wear and tear, ensuring a long-lasting surface.

- **Seamless**

Our innovative design eliminates seams, providing a smooth and continuous surface. SafeHoof can be installed over uneven bases, ensuring safe and hassle-free walking transitions for your horses.

- **Porous & Non-Slip**

SafeHoof's porous and non-slip surface enhances safety for horses, preventing slips and reducing the risk of injury.

- **Comfort & Cushioning**

The thicker material of SafeHoof provides comfort and cushioning for horses, promoting their well-being and comfort in the barn.

- **Water Management**

SafeHoof can be sealed, creating a watertight surface that allows water to run off smoothly in wash stalls, directing it to drains. This feature ensures cleanliness and hygiene while simplifying maintenance routines.

- **Anti Microbial**

For enhanced hygiene, SafeHoof can include an anti-microbial additive. This effectively combats bacteria and microbial growth resulting from horse urine and manure, and promotes the health and well-being of your horses.

SafeHoof

APPLICATION AREAS

- **Barn Aisles**
- **Horse Stalls**
- **Barn Common Area**
- **Wash Stalls**

INSTALLATION

SafeHoof is professionally hand-troweled by our experienced installers. This meticulous installation process guarantees a safe and durable surface. SafeHoof gives your barn a state-of-the-art appearance that sets it apart from other barns using traditional concrete surfaces.

CUSTOMIZATION

SafeHoof is not just about safety; it's about style too. You have the option to add 10-20% EPDM or TPV-coloured rubber granules, giving your flooring a touch of personality while maintaining its durability. Customize your flooring to match the aesthetics of your facility, making it as visually appealing as it is practical.
