

SafePave

Premium Rubber Paving Solution

Robust, porous, and durable SafePave offers long-lasting performance for driveways, walking trails and more. SafePave's strength lies in its blend of high-density granules and stone with a specially formulated, paving-hard polyurethane binder. This winning combination provides exceptional durability, toughness, and weather resilience.

Product Features

KEY PROPERTIES & BENEFITS

• Durable

SafePave is engineered to withstand heavy foot and vehicle traffic, making it ideal for areas like driveways and garages. It resists wear and tear, ensuring a long-lasting surface.

• Permeable

SafePave allows water to run through the pores of the surface to avoid any pooling.

• Weather Resilient

SafePave is designed to handle various weather conditions. Say goodbye to winter hassles, as SafePave remains ice-resistant in cold conditions.

• Slip Resistant

The rubber surface offers excellent slip resistance, reducing the risk of accidents. SafePave keeps things dry on top, reducing puddles and the risks of slippery surfaces.

• Customizable

Add borders, inlays, and designs to customize a surface that complements your property's aesthetics. SafePave is also available in a vibrant range of colours with SafePave Plus.

SafePave

APPLICATION AREAS

- Driveways and Garages
- Recreational Paths
- Walking Trails
- Accessibility Pathways
- Golf Course Paths

INSTALLATION

The blend of EPDM, SBR rubber, and/or stone is combined with binder on-site by certified installers, resulting in a seamless finish. The attention to detail, precision in application, and proper curing process all contribute to creating a high-quality surface that exceeds your expectations and requirements.

ECO-FRIENDLY

SafePave's SBR rubber is made from recycled rubber tires which are a significant source of non-biodegradable waste. Repurposing them diverts this waste from landfills and protects the environment.
