

SafeSplash

WITH

Soft and Slip-Resistant Splash Pad Surfacing

SafeSplash & Water Flecks® are premium splash pad surfacing solutions. SafeSplash combines EPDM rubber with our chlorine resistant aliphatic binder, and Water Flecks® combines high-quality UV resistant thermoplastic rubber granules and a two part chlorine resistant aliphatic binder. Together these components are made to withstand long term exposure to chlorinated water. Designed for children of all ages, both products create a fun and slip-resistant surface that enhances safety and fun during water play. With a wide array of colour combinations and design possibilities, SafeSplash and Water Flecks® offer limitless creativity for your project!

Product Features

KEY PROPERTIES & BENEFITS

- **Safety**

Safety is paramount, and SafeSplash delivers. It offers a slip-resistant surface that minimizes the risk of accidents, ensuring children can play without worries.

- **Durability**

SafeSplash and Water Flecks® are engineered to withstand the rigors of splash pad use, resisting chlorine damage and wear and tear to maintain their integrity and appearance. Add on an anti-microbial additive to help prevent bacterial growth.

- **Porous**

The porous nature of both options prevents water from pooling, eliminating slippery areas and making it safer for children to play.

- **Creativity**

With a wide range of colour combinations and design options, SafeSplash allows you to create a unique and visually appealing splash pad that stands out from the rest.

- **Low Maintenance**

SafeSplash requires minimal maintenance, semi-annual pressure washing. Inquire about SafeSealer every 3-5 years. Water Flecks® typically requires less maintenance than SafeSpash due to its chemical make up.

- **Chlorine Resistant**

SafeSplash is resistant to the effects of chlorine within normal limits, for excessive chlorine levels Water Flecks® is recommended. For added peace of mind, consider optional additives like anti-microbial additives to suit your specific needs.

SafeSplash

APPLICATION AREAS

- **Splash Pads**
- **Water Parks**
- **Amusement Parks**
- **Aquatic Facilities**

INSTALLATION

SafeSplash is a blend of rubber granules combined with binder on-site and installed by certified installers resulting in a seamless finish that is aesthetically appealing. The attention to detail, precision in application, and proper curing process all contribute to creating a high-quality surface that exceeds your expectations and requirements.
