

10 Reasons to Buy Durable GreenBeds

1. Eco-Friendly Materials

- Made from recycled, non-toxic materials with 82%+ recycled clean wood chips in panels and 25%+ recycled content in aluminum brackets. All components, including the stain on the trim wood, are non-toxic.

2. Exceptional Durability

- Unlike other raised bed solutions, Durable GreenBeds panels do not rot, crack, peel, rust, or splinter. They are designed to last 20+ years or more, providing a long-term raised bed gardening solution built to last!

3. Proudly Made in Oregon, USA!

- Supporting the local economy through local manufacturing, providing blue-collar American manufacturing jobs, and promoting American craftsmanship.

4. Enhanced Gardening Comfort

- The wide trim edge allows gardeners to sit on all edges allowing for much easier planting, harvesting, and weeding providing a comfortable gardening experience. The height also reduces the need for bending, hunching, kneeling, or squatting.

5. Versatile & Simple Setup

- Most models can be set up in under 1 hour with easy-to-follow instructions. Kits include all necessary components, making assembly quick and straightforward.
- They can be set up quickly anywhere thus immediately enhancing the outdoor spaces, increasing property value, and offering better control over soil and drainage.

6. Enhanced Drainage and Breathability

- Durable GreenBeds offer excellent drainage thanks to porous walls, preventing water-logged soil and plants. Also, Raised bed soils are much easier to keep from compacting, one of the worst problems in most gardens.

7. Repels Snails & Slugs

- The height and texture repel snails and slugs, one of gardeners biggest problem pests. They just hate the texture of our walls!

8. Increased Productivity

- Perfect for square-foot gardening, GreenBeds are noticeably more productive as conventional gardens. The multiple sizes and heights cater to various gardening needs and ease of access.
- Raised beds allow for earlier planting in the season due to warmer soil.

9. Customizable Designs

- Kits offer endless design options and can be joined together in custom shapes and site-specific layouts, including multiple elevation gardens. The tiered design is perfect for child-adult gardening.

10. Year-Round Gardening

- Allows for winter harvesting in many climates by simply adding a cold frame, extending the gardening season and productivity.
