

Raised beds loved by landscape architects and contractors.

19 models available in 1' and 2' sizes

Or call us to place a custom order for your job.

Project managers like the fact that Durable GreenBeds install quickly allowing your field crew to be more efficient. When you install a large Durable GreenBed™ garden, your landscape company will **enjoy higher profit margins and faster turnaround** compared to constructing wood beds.

5 Reasons why installing Durable GreenBeds are the right choice for landscape contractors

1. Durable ● GreenBed wall panels will last 20+ years due to their unique, mineralized woodchip-cement composition.

2. Attractive ● Unlike wood, metal or plastic beds, our Durable GreenBeds won't need replacement or upkeep. They look great for decades.

3. Horticulturally Superior ● Unique walls provide aeration and drainability unlike anything else on the market.

4. Made in the USA ● Preserving manufacturing jobs in America.

5. Versatile and Easy to Assemble ● Our raised beds can be installed on concrete, grass, gravel or bark. Kits come ready to assemble. Typical kits take less than 2 hours to set up provided the site is level and prepared.

"What makes Durable GreenBeds last 20+ years?"

It's the walls™. They are made from a patented woodchip-cement composite that was invented in Europe over 75 years ago. The walls are rot-free, non-toxic (due to the unique mineralization of the wood fiber) and porous allowing for aeration to the root zone and drainability.

"Why are they a great choice?"

Durable GreenBeds come in numerous shapes and sizes, prefinished and ready to install. Setup takes 2 hours or less for most designs (longer rectangular beds take more time). They are available in 1' and 2' sizes and can be custom ordered to fit your landscape needs.

"Where can I place a Durable GreenBed™?"

Our beds can be placed on nearly any surface: dirt, gravel, bark, grass, and even concrete. Our revised structural design has eliminated staking into the ground—perfect for the popular roof-top garden movement.

"Can you customize my order?"

We can quickly produce custom layouts for you.

“What does a Durable GreenBed™ kit include?”

- GreenBed™ woodchip-cement panels
- Rust-free, aluminum brackets, finished with architectural-grade paint, and powder coated aluminum caps
- Beautifully finished cedar, or no-maintenance TimberTech™ composite trim, tuck under the cast aluminum caps that plug into the top of the brackets
- Clear instructions for assembly
