Custom Orders Welcome

What makes Durable GreenBed™ the BEST raised garden bed on the market?

“It’s the Walls™”

Drainable

Our porous walls drain if soil becomes too wet.
Metal, plastic or wood does not.

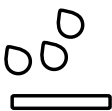

Breathable

Oxygen exchange to the root zone encourages fine root hair development for higher nutrient uptake

No slugs

Our walls’ texture repels these voracious garden pests

Doesn’t wick water

Less water usage: water does not wick through our walls as it does through solid wood and concrete

Non-toxic

Woodchips, lime fortified Portland cement, clay minerals, that’s all

20-25+ year life

We have buried samples underground for 25 years with minimal degradation

Sit to garden

Comfortably sit on the walls of our raised bed

Keep Your CCRC residents **active** and
healthy with Durable GreenBed™
Raised Garden Beds

“Our community garden in Greenville, North Carolina purchased several Durable GreenBeds™ and everyone was truly impressed with how easy to assemble and well-built they were.”

Paul White, North Carolina

Windsor Meade CCRC
Williamsburg, Virginia

Custom 2' wide beds
Bar Harbor, Maine

Del Webb Community
Florida

“We had a need to construct a new community garden after it was determined our 8 year old existing garden had to be razed for building expansion. After a comprehensive search, we chose Durable GreenBed™. The 42 raised garden bed kits (4'x8'x2') were shipped directly to site and were easy to assemble. Half way through our first season, we're very pleased with our decision to purchase this product.”

Patrick Kerr, Dir. of Maint. & Engineering
WindsorMead CCRC, Williamsburg, VA
