HADDONSTONE

Trusted specialists in high-specification
architectural stonework

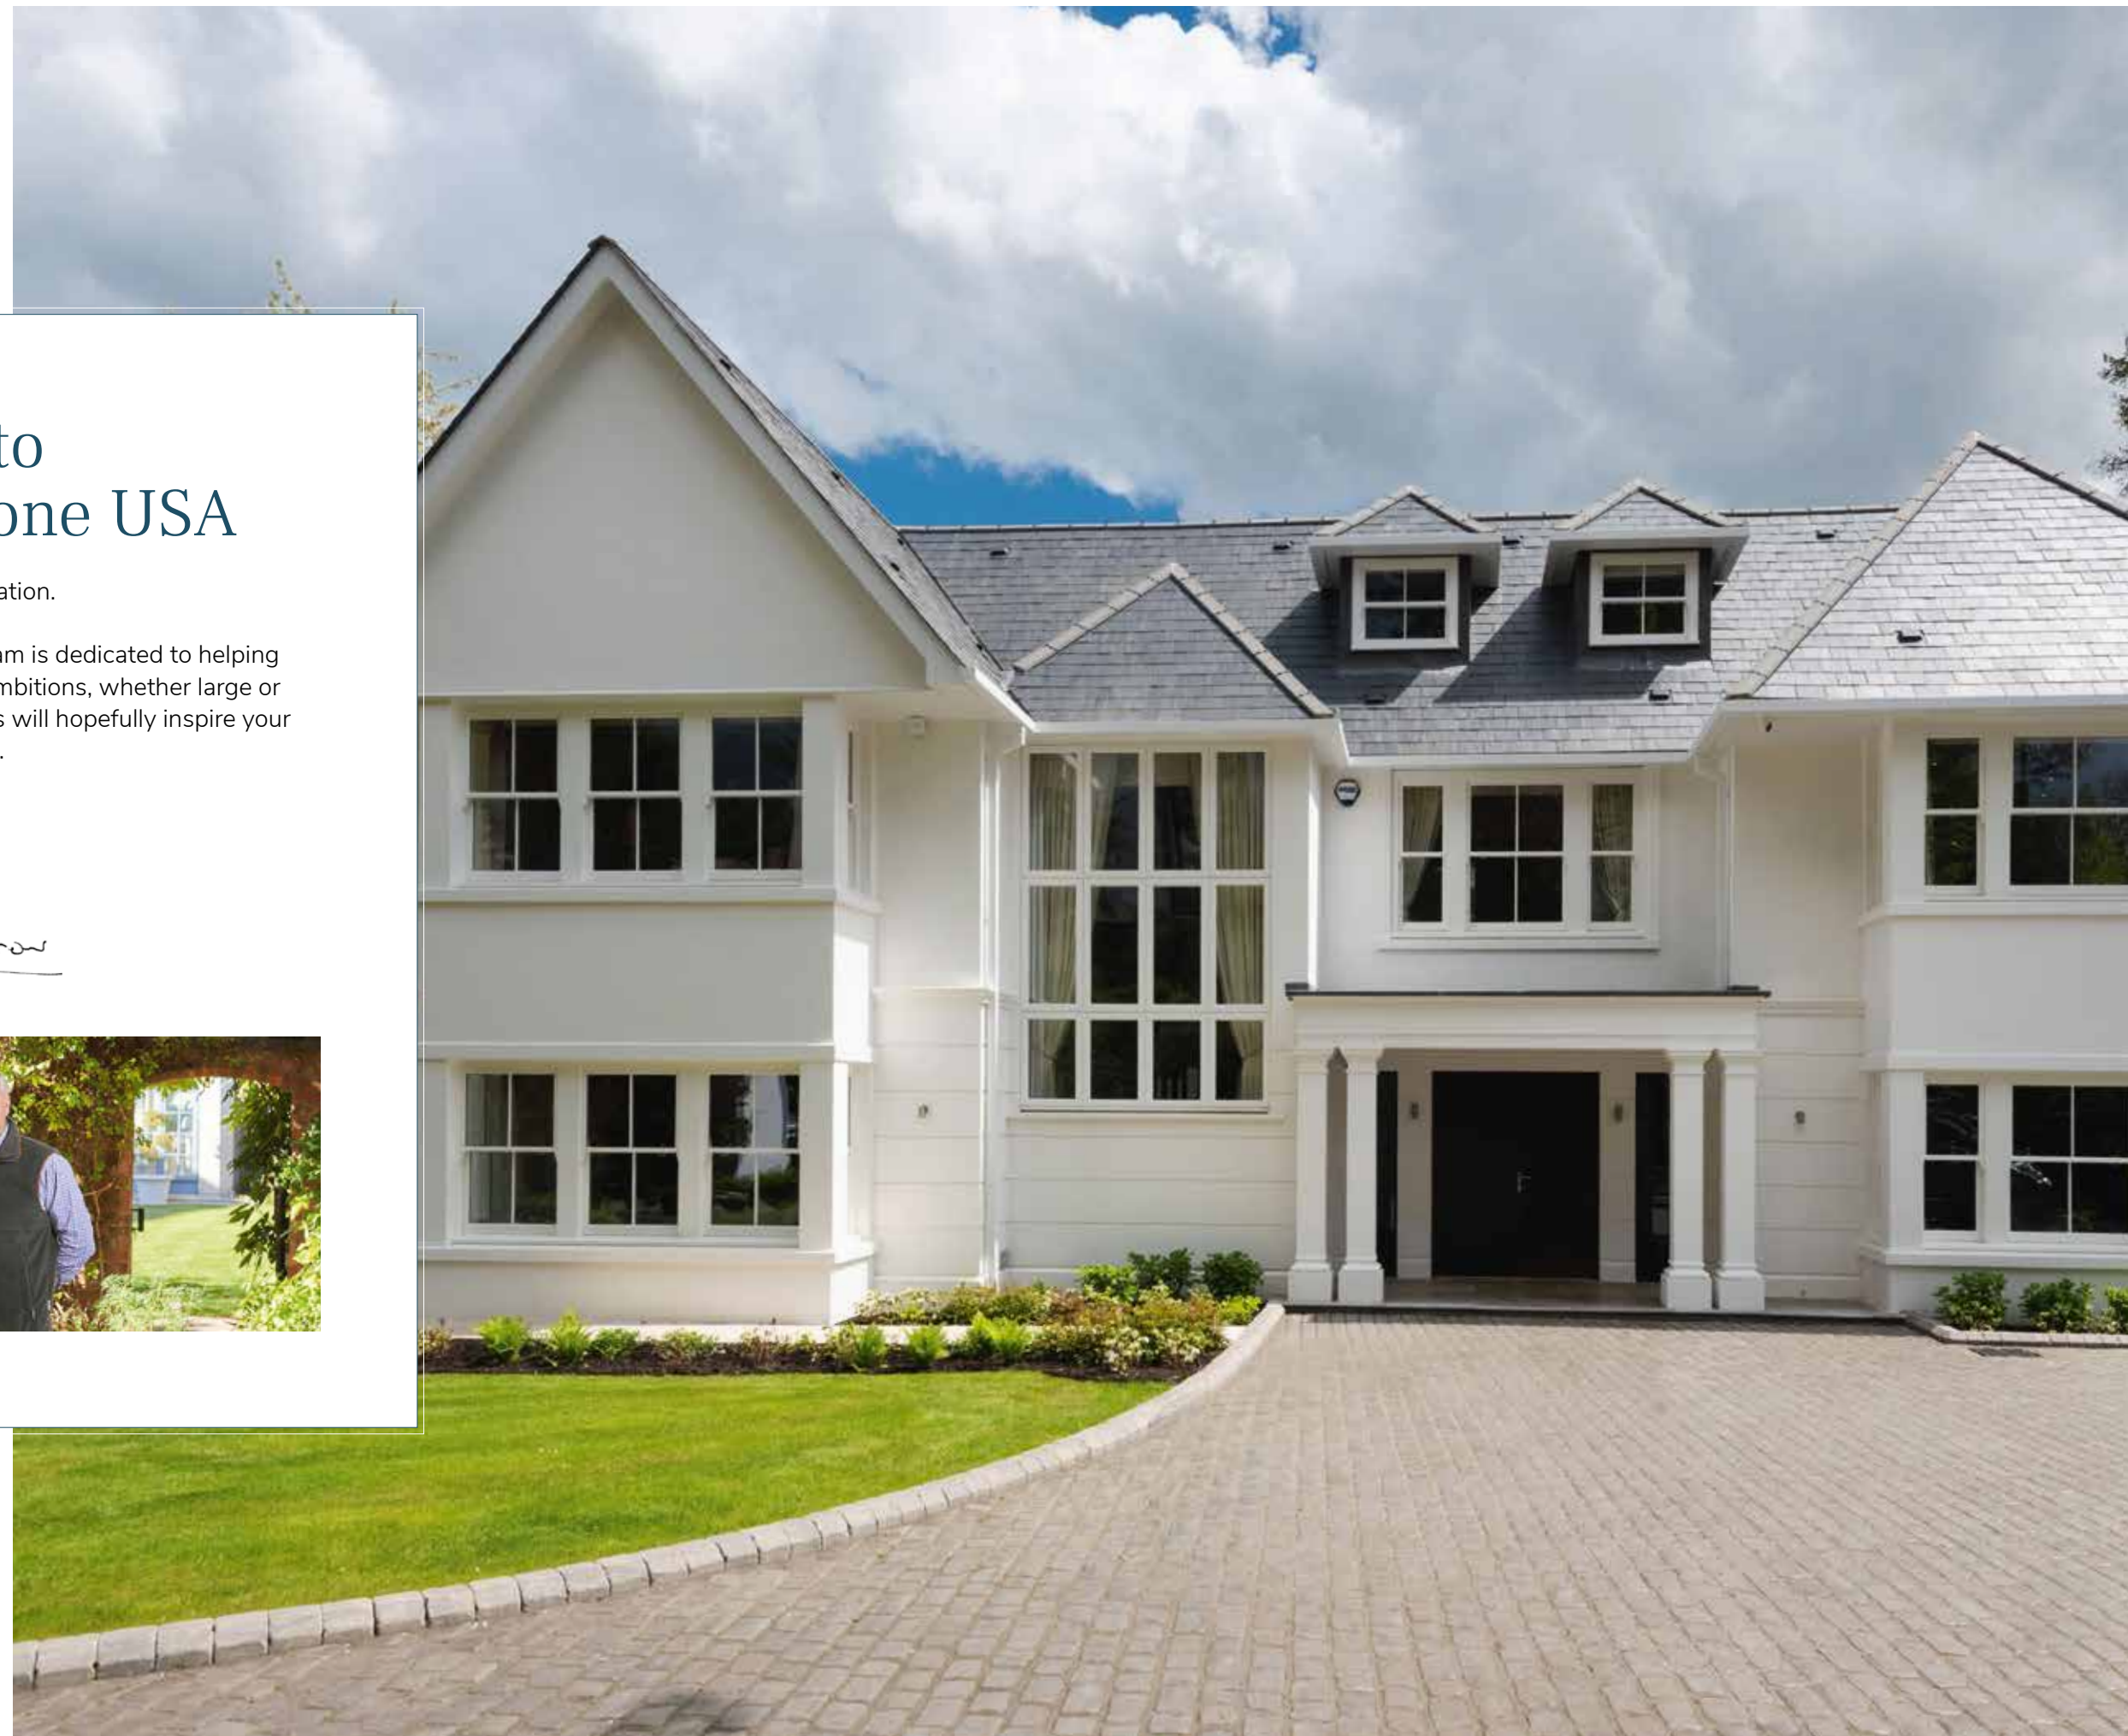

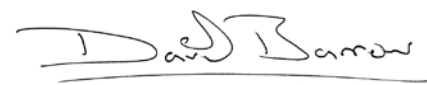

Welcome to Haddonstone USA

A business 50 years in creation.

Our vastly-experienced team is dedicated to helping you achieve your project ambitions, whether large or small. The following pages will hopefully inspire your journey with Haddonstone.

David Barrow,
Global CEO

Our story

Haddonstone was founded by Bob Barrow in 1971, with the aim of producing high-quality decorative cast stonework. Working out of his garage in Northamptonshire, UK, Bob handcrafted a modest range of seven garden designs – six of which continue to be bestsellers today.

Twenty-five years later, Haddonstone USA was established in Pueblo, Colorado. This allowed us to extend our global reach and to offer the highest-quality cast stone designs across the United States and Canada.

More than half a century later, the Haddonstone collection has grown to include over a thousand standard designs, including an enviable range of architectural components and the ability to create custom cast stonework.

World-leading cast stone

The demand for our premium cast stone architectural designs has enabled us to significantly expand our portfolio.

Haddonstone's architectural stonework has been used in the construction and renovation of a broad range of prestigious buildings and projects across the USA, Canada, the UK, and worldwide.

With representation through an increasing group of international distributors, we are also able to fulfil orders globally.

Growing facilities

From modest beginnings, Haddonstone USA now comprises a 10-acre purpose-built complex in Pueblo, Colorado, including facility, design studio, extensive mold shop, laboratory and vapor curing chamber.

Over the years our premises have been extended, developed and modernized on multiple occasions. This ensures that Haddonstone remains at the forefront of technological advances in the design and manufacture of cast stone products.

Over the years, our values have always remained the same. Our team is dedicated to producing the finest-quality cast stone designs and providing you with exceptional service.

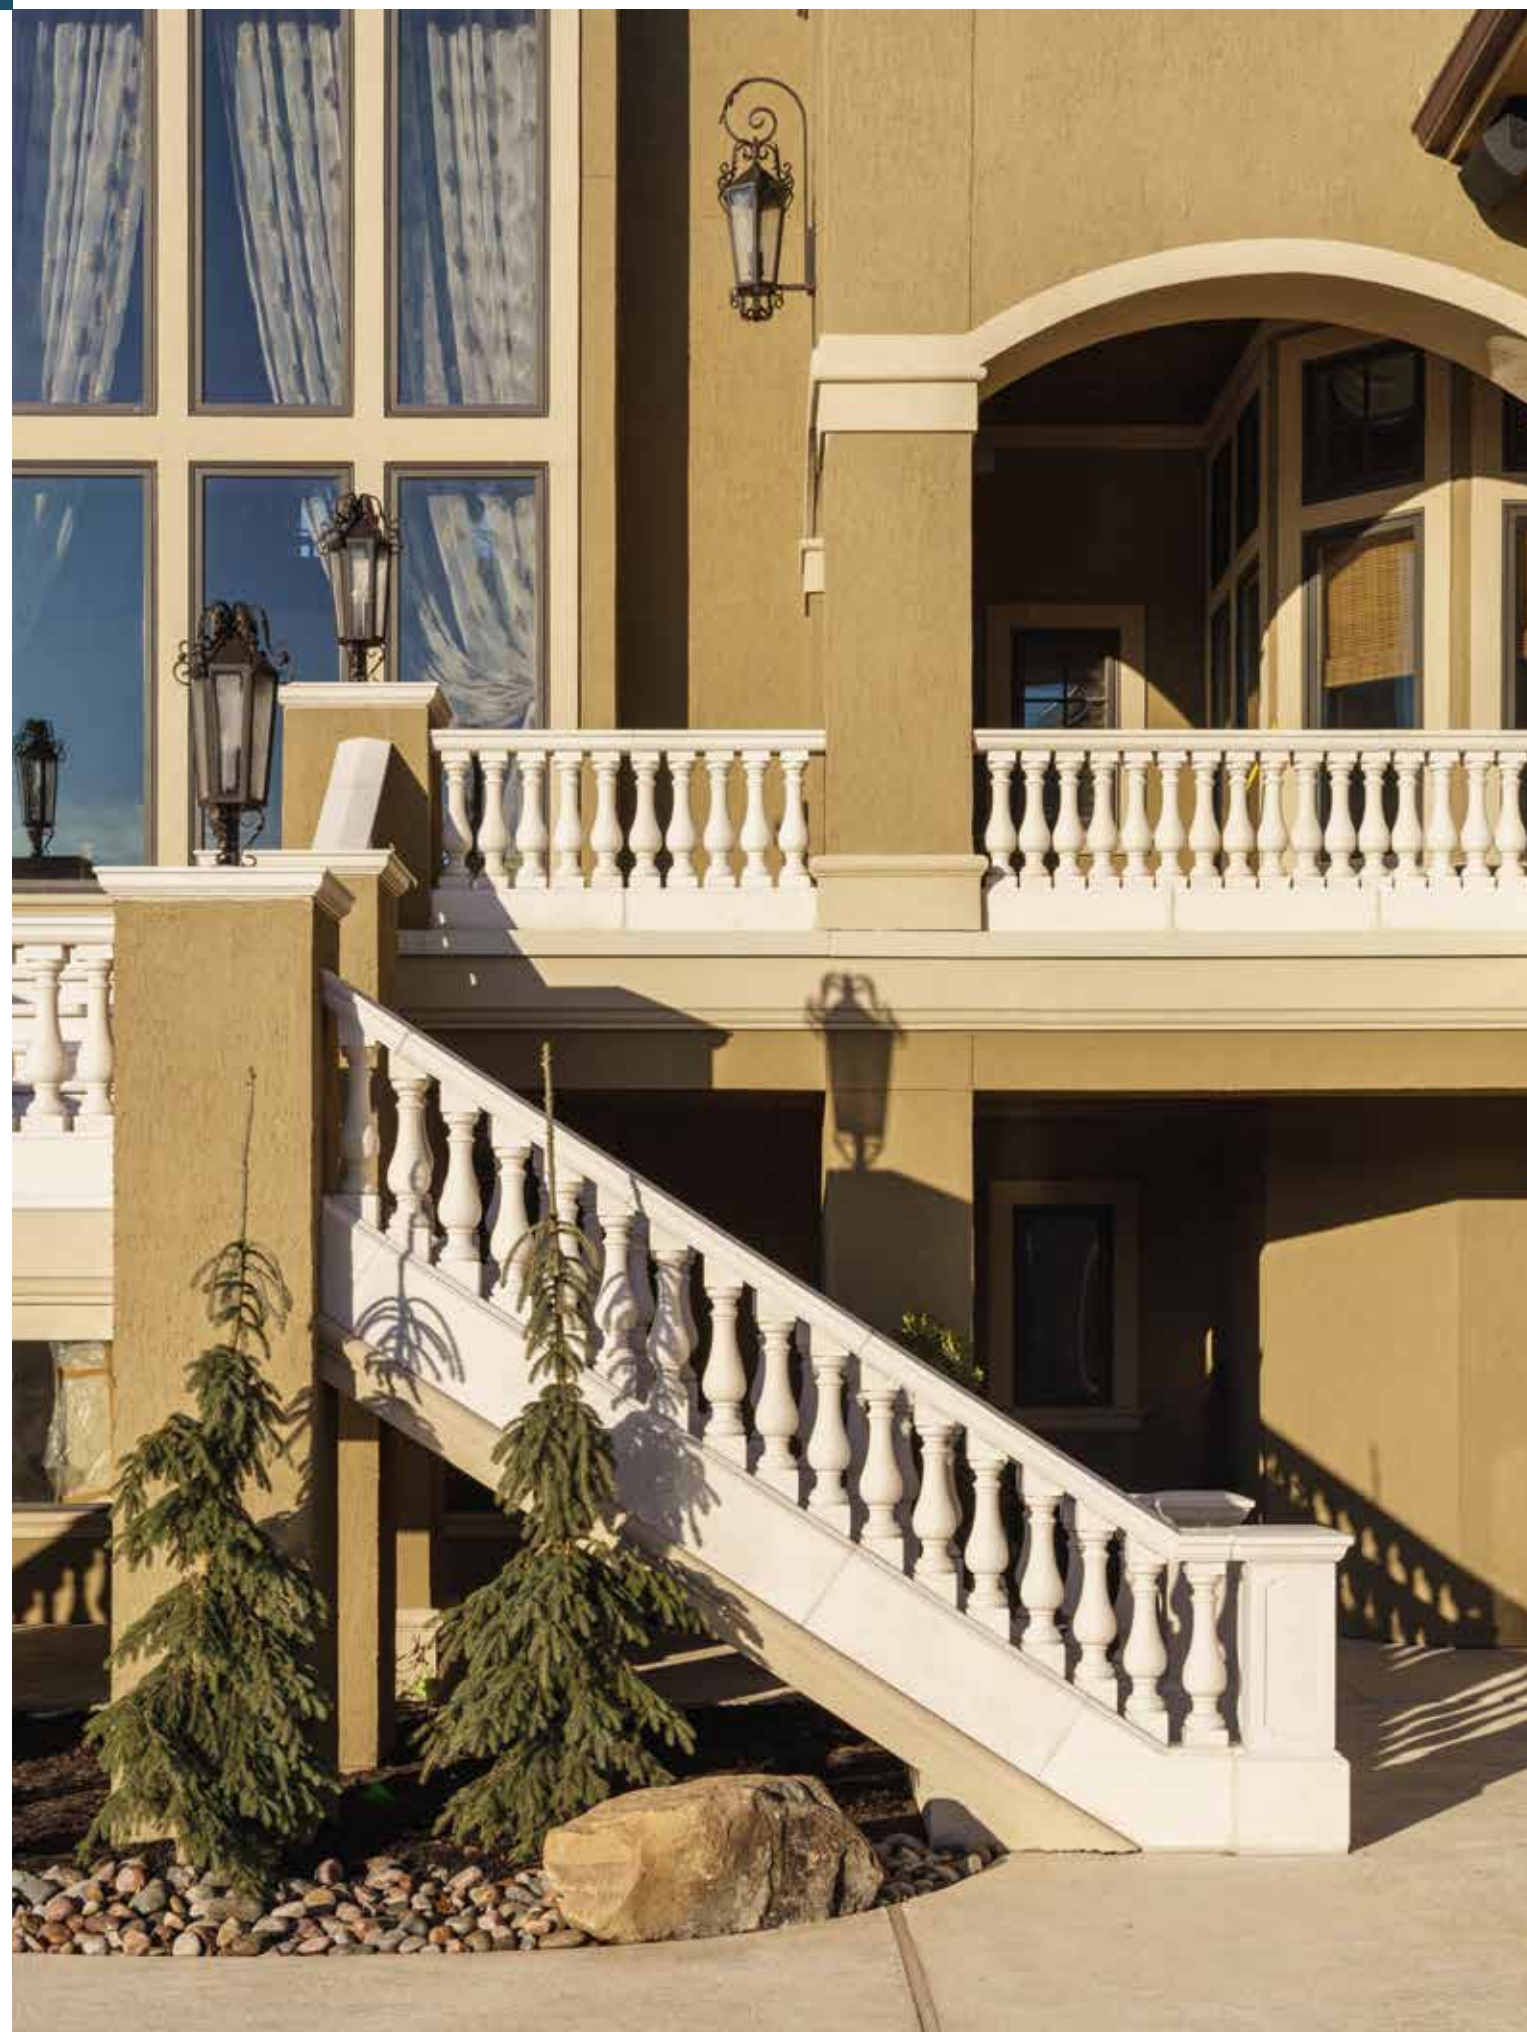

First-class capabilities

We work with architects, developers, contractors and private clients to help them achieve their vision.

Our unrivalled expertise and production facilities enable us to cater for everything from lightweight retrofit designs to large structural units.

Specialists in custom stonework

Alongside offering a broad range of standard architectural stonework, we are delighted to create custom products that meet our clients' individual design criteria.

With an in-house team of dedicated, vastly experienced mold-making specialists and trainees, as well as an extensive mold shop and facility, we can produce custom architectural stonework to almost any specification.

We offer a standard range of cast stone colors and can offer a custom color and material match service.

Our team will help you to meet your project goals, whether large or small.

High-specification stonework for all projects

Using technical drawings, or simply a photograph, we will work directly with you, your architect, builder or estate manager.

From private residential new-build homes, extensions and renovations to large-scale commercial developments, our architectural solutions can meet almost any project requirements, whilst always meeting today's rigorous design, strength and safety standards.

It was a great pleasure working with Haddonstone and their teams in the USA and the UK.

My client first suggested the idea of building a nursing home in Japan which was modeled on the 16th century Manor House Hotel in the Cotswolds, England. I initially started designing a typical Cotswolds-style building, however, it was challenging to create an authentic design that met my client's expectations.

Our USA supplier, Pac-Rim Building Supply, Inc., recommended Haddonstone, so my client visited their UK head office to review the quality of their products and to view their Show Gardens.

Once the building design was finalized, Haddonstone's USA team was very accommodating and their communications were outstanding.

With Haddonstone's superior products and their excellent team, the project resulted in a great success. When we hear the many compliments about the building, and how people think that it "looks like an English manor house", we know that we have successfully executed our vision.

Many thanks to Haddonstone!

NOBU ARCHI DESIGN Co.,Ltd.

The benefits of cast stone

Cast stone provides multiple benefits for builders, developers and architects alike.

A cost-effective alternative to natural stone, cast stone is chosen for its durability, versatility and strength, as well as its beautiful appearance.

Our materials explained

Haddonstone (semi-dry cast limestone)

Haddonstone is a high quality semi-dry cast stone, consisting of over 50% limestone aggregate. With a surface texture similar to Portland stone, Haddonstone is a favorable alternative to natural stone.

TecStone (wet cast limestone)

Comprising over 60% natural limestone, TecStone is denser than Haddonstone with a higher compressive strength. When combined with structural reinforcement and cast-in fastenings, TecStone is suited to projects where high-performance criteria is required.

TecLite (glass fiber reinforced)

Although the finish of TecLite closely resembles that of stone, the use of thin wall construction and high strength-to-weight ratio means that the component weight is significantly reduced when compared with solid pieces. TecLite is ideal for retrofit, renovation and timber frame build projects.

A team of passionate experts

We love what we do – and it shows. Every member of the Haddonstone team shares our core values to provide unrivalled expertise and outstanding levels of skill and craftsmanship.

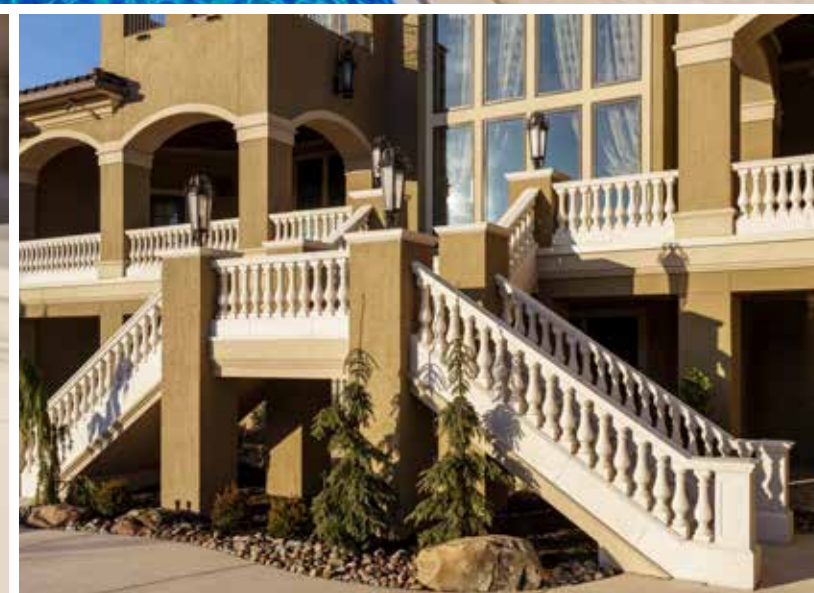

Many of our colleagues have been with us for over 20 years, helping to deliver the cast stone products that our clients know and love.

All our products are handcrafted to order by our dedicated team. This means we maintain full control throughout the manufacturing process, so that you receive the very best stonework on the market today.

"Haddonstone was the perfect partner for the stonework needs on our latest residential build. The Haddonstone staff enthusiastically accepted our construction documents. They were able to produce a detailed drawn assembly of their stone products and a custom stone profile I requested, to achieve the functionality and aesthetics our high-profile project required."

Haddonstone's high quality stonework came and installed beautifully as designed. I can't imagine having completed our project, and the collaboration it required, with any stone company other than Haddonstone."

Rob Morrissey,
President, Arch Design, Overland Park, Kansas

■ Above all, we're passionate about creating products that will inspire you and last for many years to come.

We have grown to become the international market leader. However, to this day we continue to be a family-owned and managed company, and our values remain the same.

Our commitment to you

Providing you with a personalized service and the very best cast stonework is at the heart of everything we do.

Our Building and Construction team is renowned for its care and technical expertise. Dedicated project managers will ensure the smooth running of your project from day one and will assist you throughout your entire journey with us.

"We have been working with Haddonstone for many years and they have always delivered on all their order commitments to us. Cory and Kathleen are exceptionally great to work with and their customer service is one to admire. We hope to continue working with them for many years to come, using their amazing products."

Mario Morales,
Project Manager, North Shore Architectural Stone, Glen Head, New York

Restoration and replication stonework

Whether your project is residential or commercial and a remodel or a restoration, our experts are on hand to assist.

Regardless of style or age, we can help bring any structure back to life.

Using the latest in 3D technology, as well as more traditional techniques, our experienced team has assisted in the renovation and restoration of many historic and listed buildings worldwide.

■ Over the years we've helped restore multiple city projects, hotels, private residences and listed buildings.

Landscaping

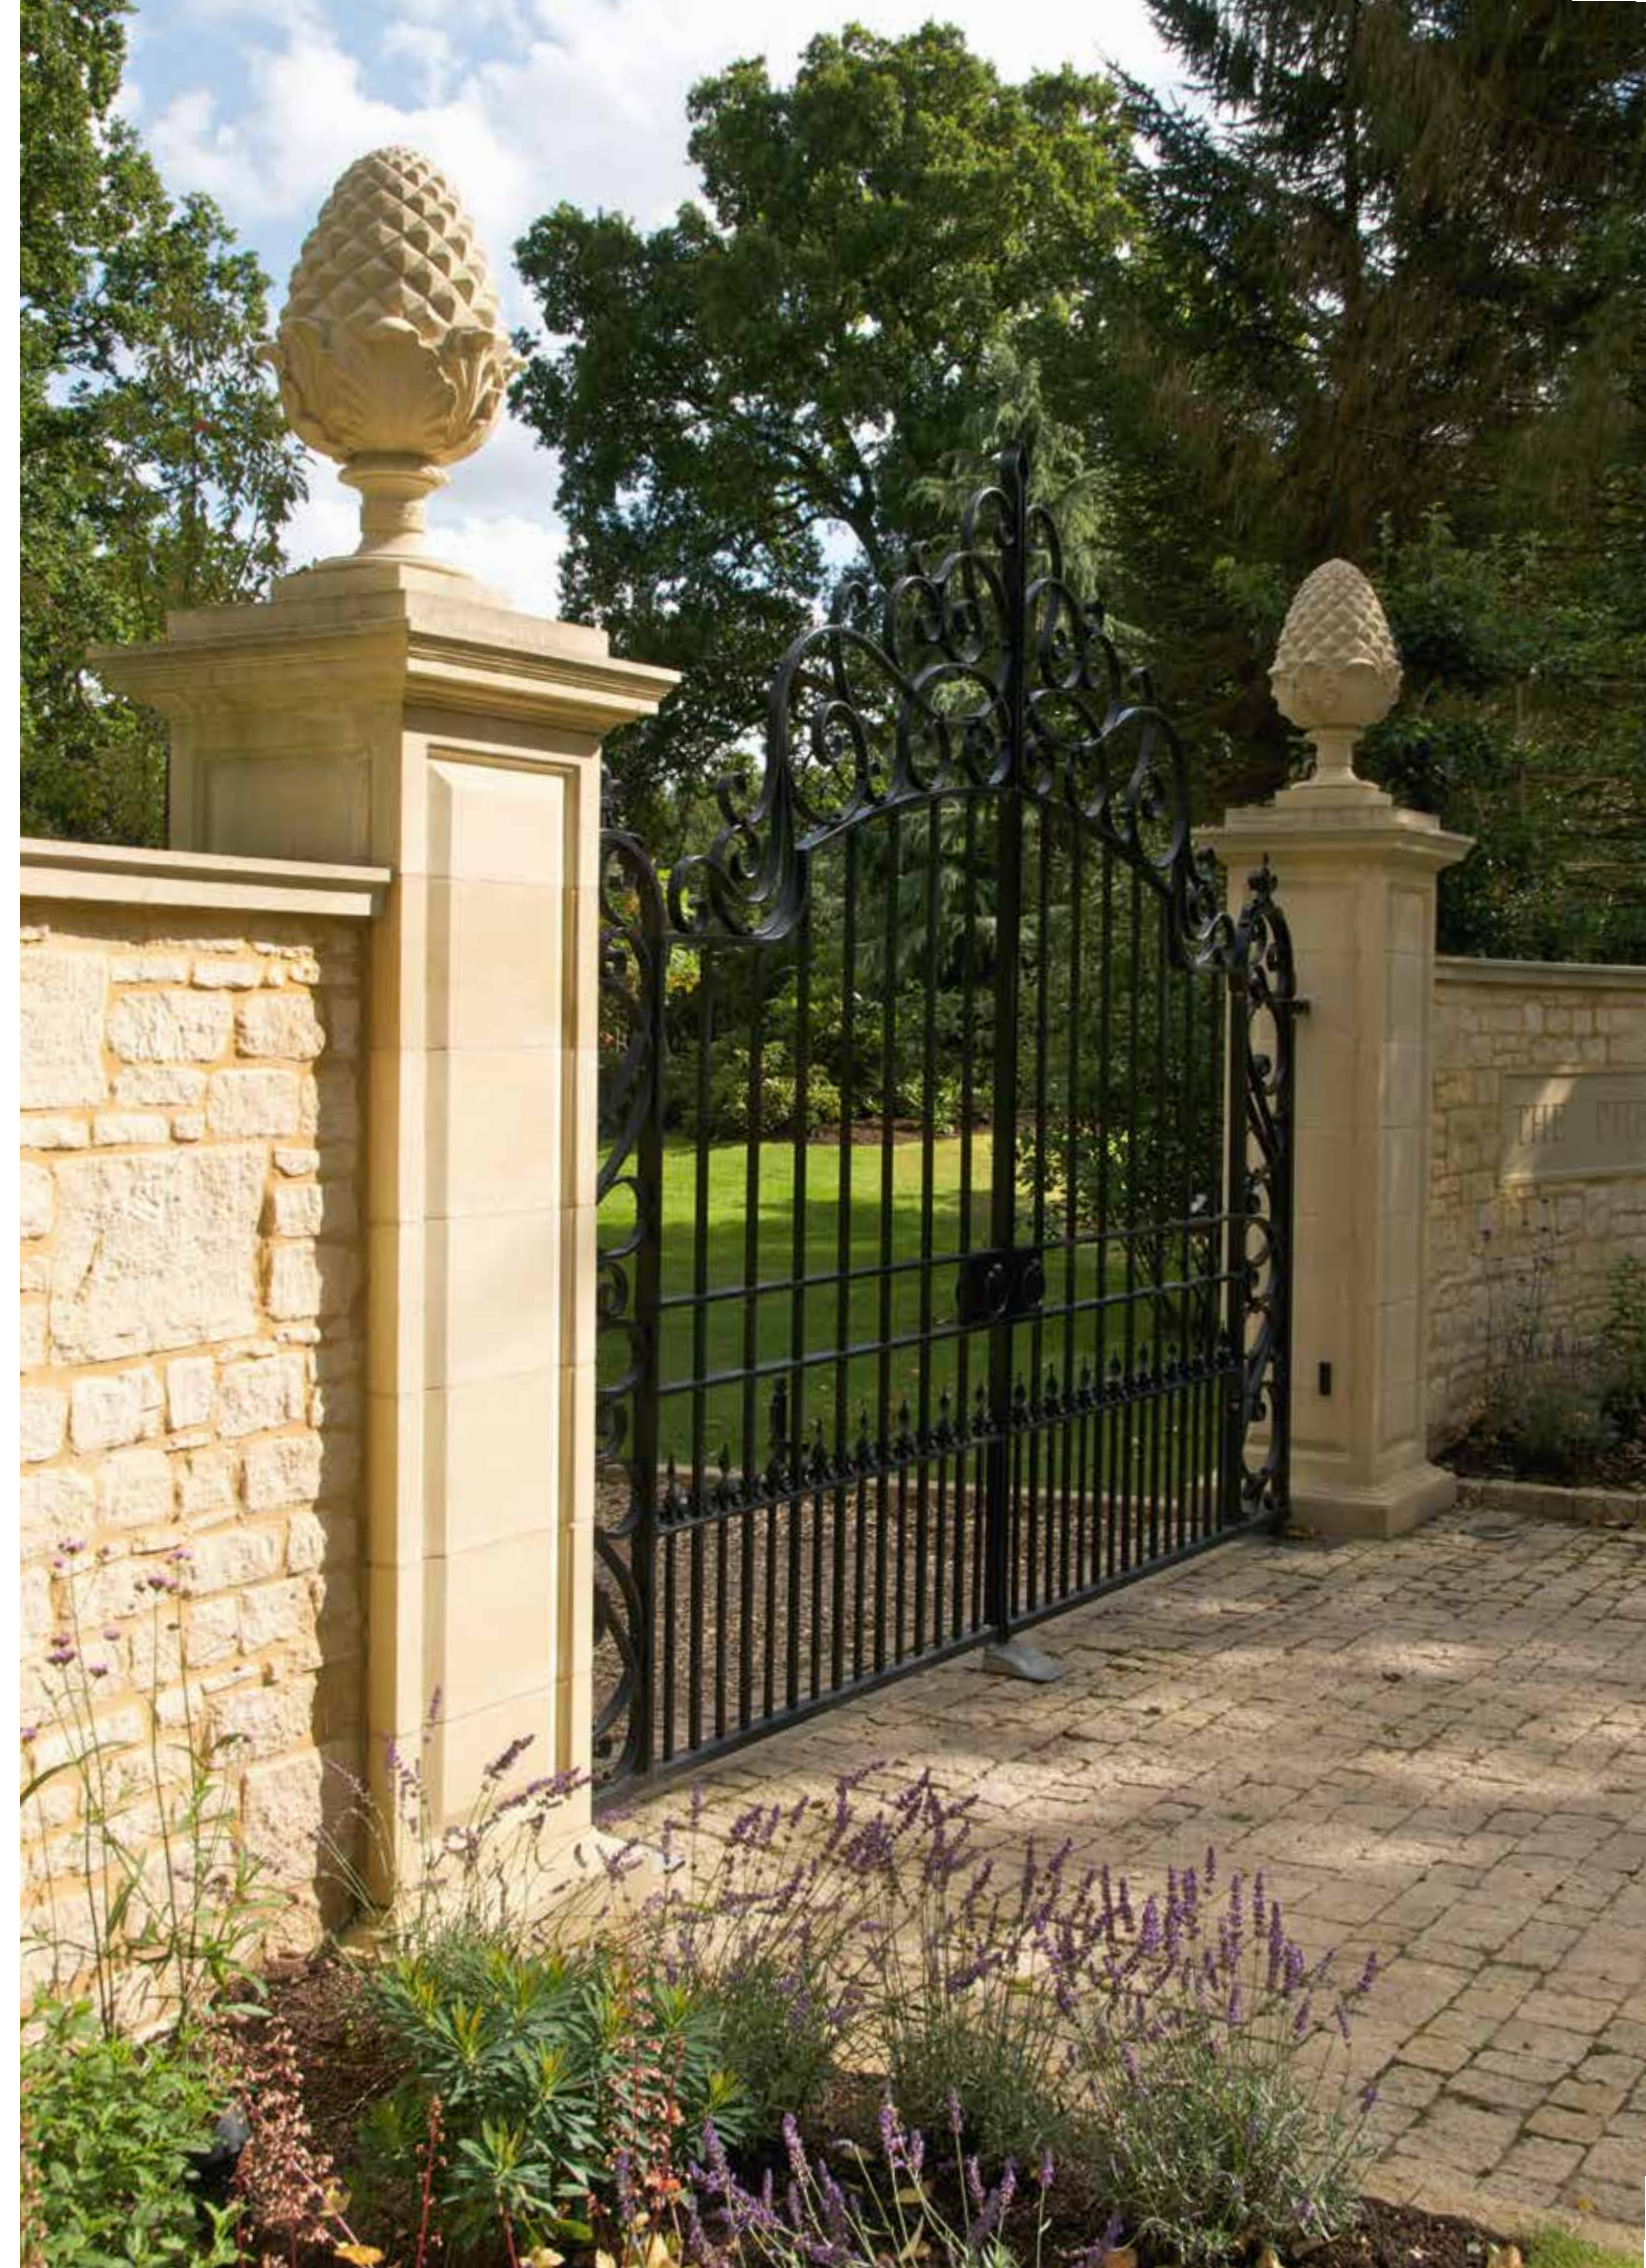

To complement our Building and Construction designs, we offer an extensive range of contemporary, traditional and classical-style cast stone landscaping designs.

Our landscaping collection features many elegant and functional components from paving, steps and balustrade to pier caps, copings and stunning garden buildings that will transform any outdoor space.

"As a masonry contractor, I often deal with poor designs and planning. Haddonstone's meticulous attention to all facets of product installation and design/build parameters makes my job as an installer far easier. Even complicated, boutique projects become clearly approachable as I begin my work."

For this mansion entranceway install, Haddonstone seamlessly emulated both the texture and color of the rare, 19th century stone from which the original structure was hewn. In doing so we recreated a previously demolished veranda that was once a major centerpiece of the mansion, and brought the residence back to life."

**Gabriel Palcic,
United Masonry, Pueblo, Colorado**

Home and Garden

As well as our comprehensive range of architectural stonework, we also offer a collection of complementary Home and Garden designs.

Our Home and Garden collection includes over a thousand standard designs, making it the most comprehensive range of its kind. With unrivalled craftsmanship, expertise and a broad range of options, we're confident that our collection includes the perfect products to suit any garden setting.

Discover the full collection on our website, or in the Product Range catalog.

Our commitment to the environment

Haddonstone is proudly committed to sustainability, and we continually strive towards reducing our impact on both society and the environment.

Sustainability policies are embedded across our production processes, including protocols to avoid the use of hazardous substances and to prevent the release of contaminants into the atmosphere, watercourses and onto land.
