LANDSCAPE GUIDE

COOL CLIMATES (ZONES 2-6)

FLOWERFULL®
SMOOTH HYDRANGEA

WELCOME TO THE MOST FUN YOU'VE EVER HAD WITH SHRUBS AND TREES!

Let's face it. You've got a lot of options when it comes to plant selection for the landscape. And you've got time-tested favorites that have earned their place on your short list. So, we realize it can take a lot to try something different.

As you browse this brochure, you'll learn more about the intentionally selected varieties in the First Editions® Shrubs & Trees collection that are rewriting the book on how to talk about this foundational category.

Introduced for better flowering, greater disease resistance, mass planting appeal, native species benefits, low maintenance, and more, First Editions® provides you with plants you can trust. Plants that will perform year after year. Plants with purpose.

We invite you to take some time with this brochure, not just to look at our Rock Star plants, but also to learn the work that goes into each introduction, how they've been tested, landscape inspiration, and plants that provide solutions. Enjoy, and we look forward to working with you!

THE FIRST EDITIONS® VIEWPOINT

First Editions® works to make shrubs and trees accessible to the trade and home gardeners. Easy solutions for tough problems. Sometimes that means providing a beautiful plant for a wet spot in the landscape. Sometimes that means a water-wise, adaptable plant as climate change affects our palette for the future. And sometimes it just means narrowing plant options to what works best in your region. We want to make finding the best plant for your site easy to find, easy to understand, and easy to use.

COLLECTIONS APPROACH

To make that ease-of-use philosophy come to life, First Editions® is broken down into collections. So, if you're looking for plants for a specific region in North America, we've got you covered. If you're looking for plants for pollinators, we've broken that down for you. Have a client that wants a privacy hedge? There's a list for that! Keep flipping through these pages to find many of these tools, and head to the Resources tab on BaileyNurseries.com for even more solutions to make using First Editions® easy as can be.

SNOWDANCE™ JAPANESE TREE LILAC

THE BEST PLANTS

Removing the big challenges of shrubs and trees in the landscape starts with having the best plants on the market. We are incredibly proud of the First Editions® collection and stand behind their performance from propagation to the landscape. And we can do that because they go through such rigorous testing and trialing before introduction. If a plant is bred in-house at Bailey Innovations™, it can take seven to ten years from sowing seed to retail introduction.

Because we really want to ensure it performs as promised. Between Bailey Innovations™ breeding efforts and worldwide breeder partnerships, we are always looking for an improvement on an existing species, bringing a new species to the marketplace like we did with *Distylium*, and looking at the future needs of our landscapes as it relates to climate change. We are methodical when introducing new varieties, only bringing something to market if it truly can stand on its own and be better than what already exists. We won't flood the system with plants simply for the sake of being new.

David Roberts

Director of Plant Breeding at Bailey Innovations™

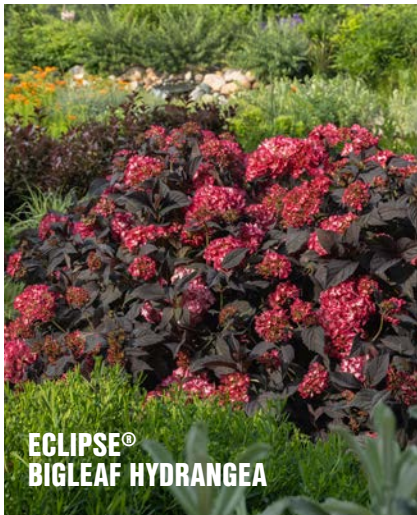

FINDING FIRST EDITIONS®

These great shrubs, trees, and more are sold worldwide through a vast network of licensed growers. Including brand owner Bailey Nurseries, there are more than 75 partners around the world that can propagate and distribute First Editions®. This allows easy access to these fantastic genetics, no matter where you grow and sell plants. To find the right grower for you, check the inside back cover of this brochure or the First Editions® tab on BaileyNurseries.com.

★ ★ ★ ROCK STARS ★ ★ ★

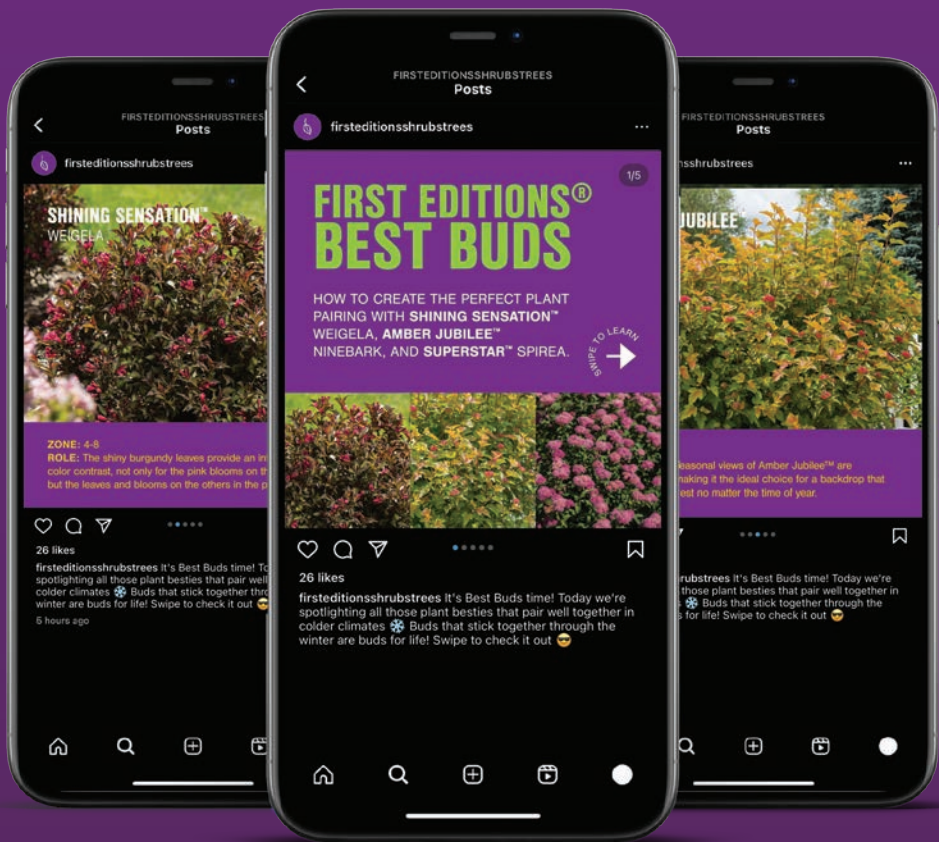

While we are confident in every plant in First Editions®, we have some top selections that have gone above and beyond, demonstrating their reliability in production, at retail, and in the landscape. With more than 100 shrubs and trees to choose from, it can be difficult to make a selection on what to grow and sell. That's why we put together our handy list of Rock Stars to help make the decision for you.

Don't know where to begin? We've got you covered. These Rock Stars have earned their title through ultimate multi-region performance, versatility, outstanding visual interest — and will undoubtedly enhance any outdoor environment with strength, texture, and color. Flip to the next few pages for even more on some of our top Rock Stars in the landscape!

BEST BUDS

Having individual Rock Stars is important, but knowing how to use them in the landscape with other plants is also a big deal. Our best-performing consumer advertising campaign is consistently what we call Best Buds. This is an easy how-to guide for pairing First Editions® plants with other perennials, shrubs, and trees. We've shared some Best Buds ideas in this guide, but even more illustrations, lists, and ideas are available at BaileyNurseries.com.

BEST BUDS

ROCK STAR FEATURE PRODUCTS

FLOWERFULL® SMOOTH HYDRANGEA - NEW FOR 2025!

FlowerFull® Smooth Hydrangea boasts superior genetics that produce significantly bolder blooms and sturdier upright stems. With two-to-three times more blooms per season than other *Hydrangea arborescens*, FlowerFull® is a major improvement to the industry standard.

That proliferation of blooms is held high on strong stems that don't flop in the wind and rain. And FlowerFull® is disease-resistant and requires fewer touchpoints from day one. Reaching heights of three to four feet, this low-maintenance marvel makes for an outstanding focal point in smaller landscapes and commercial settings alike.

Height: 3-4'		Width: 4-5'		Zone: 3-8
Shape: Rounded		Exposure: Morning Sun, Afternoon Shade		

FLOWERFULL® BEST BUDS:

- Standing Ovation™ Serviceberry
- Fireside® Ninebark
- Little Spark® Spirea
- Cotton Candy™ Phlox
- Love & Peace® Rose

The features of FlowerFull® (1) can be showcased in a foundation bed, along with Little Spark® Spirea (2), Cobalt-n-Gold™ Hypericum (3), dwarf fountain grass (4), and Biokovo Geranium (5).

FlowerFull® (1) provides an eye-catching pop of white in this otherwise monochromatic design. Surrounded by the silvery leaves of Iceberg Alley® Sageleaf Willow (2) and the dense, textured, green evergreen foliage of Tall Guy® Arborvitae, the dark green leaves and crisp white flowers of FlowerFull® will really stand out in this easy-care combination.

WITH ITS ABUNDANCE OF FLOWERS, FLOWERFULL® IS A REAL STANDOUT AS A FOCAL POINT OR IN A DIVERSE PLANTING MIX.

Build a beautiful summer display with FlowerFull® (1) providing classic beauty as the focal point, bookended by texture from ornamental grass. In front, line the border with Sapphire Surf™ Bluebeard (2) for cool tones in the summer and early fall garden.

BEST BUDS | ROCK STAR FEATURE PRODUCTS

COBALT-N-GOLD™ HYPERICUM

Cobalt-n-Gold™ has a tidy, mounded shape that makes it a breeze to grow in the landscape. In late spring, the plant is covered in sunny yellow flowers that contrasts beautifully with the narrow blue-silver foliage. In fall, the leaves become different shades of yellow, red, and orange, providing additional color to this low-maintenance plant. If that's not enough, the flowers are full of nectar for pollinators. Cobalt-n-Gold™ is a solid choice for mass plantings in residential and commercial landscapes.

Height: 3-5' | Width: 3-5' | Zone: 3-8
Shape: Rounded | Exposure: Full Sun to Part Shade

Cobalt-n-Gold™ is highly adaptable native species that tolerates dry sites and full sun. In residential landscapes it can be used for borders, cottage gardens, native areas, and erosion control. It maintains the mounded shape along the walkway without pruning, keeping the planting low maintenance for the home gardener. The finely textured blue-silver foliage and yellow flowers of Cobalt-n-Gold™ (1) complement the wider silver leaf of Iceberg Alley® Sageleaf Willow (2). Finally, Bubblegum Pink™ Phlox adds a fabulous accent color to this wholly native species cottage garden planting.

ON COMMERCIALS SITES, COBALT-N-GOLD™ CAN BE PLANTED ALONG SIDEWALKS, IN PARKING LOTS, AND ALONG OFFICE BUILDINGS TO ADD MASS APPEAL. AS A NATIVE SELECTION, COBALT-N-GOLD™ IS A SOLID CHOICE FOR SUSTAINABLE LANDSCAPES.

COBALT-N-GOLD™ BEST BUDS:

- Lucky Devil® Ninebark
- Little Hottie® Panicle Hydrangea
- Campfire Rose
- Virtual Violet® Lilac

In a commercial planting, you're probably thinking about salt tolerance, low-to-no maintenance, and drought tolerant selections. Cobalt-n-Gold™ checks all those boxes, and can stand up to the elements, even next to highly trafficked sidewalks. With Cobalt-n-Gold™ (1) as the hero in this design, add some central height and early-season flowers with Standing Ovation™ Serviceberry (2) and then alternate Shining Sensation™ Weigela (3) for season-long dark leaves and blooms that will emerge after Standing Ovation™ and before Cobalt-n-Gold™.

BEST BUDS | ROCK STAR FEATURE PRODUCTS

LITTLE HOTTIE® PANICLE HYDRANGEA

This compact hydrangea makes a big statement in the landscape, with massive white blooms that cover the plant from top to bottom. Little Hottie® thrives in cold climates and can be used in almost any landscape. It remains 3-5' tall and wide, making it the perfect companion for annuals, perennials, and other shrubs. This hydrangea can be grown as a specimen or planted in groups to maximize the bloom power. Little Hottie® has a natural branching habit that minimizes the need for pruning while creating a full plant.

Height: 3-5'		Width: 3-5'		Zone: 3-8
Shape: Rounded		Exposure: Full Sun to Part Shade		

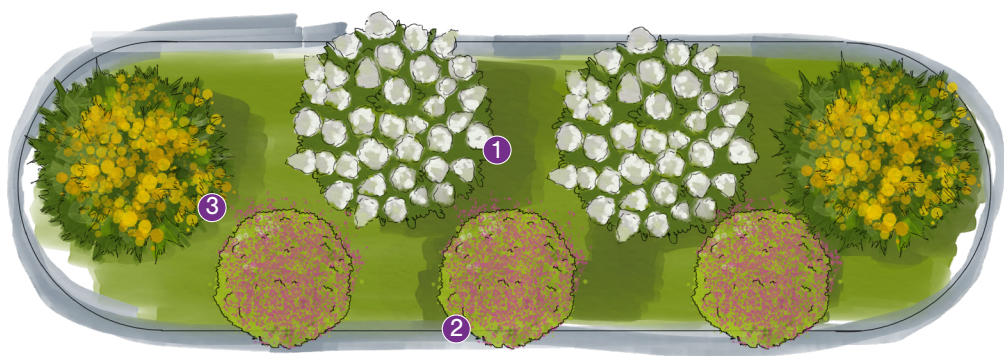

In residential sites, Little Hottie® (1) shines in foundation beds and borders. Plant it with foliage shrubs like Firedance® Dogwood or Spicy Devil® Ninebark (2) to highlight the vibrant white blooms. In a cottage garden, Little Hottie® is the right size for mixing with other plants, like Kashmir Rose (3), Pop Star® Reblooming Hydrangea (4), and Rozanne Geranium.

LITTLE HOTTIE® BEST BUDS:

- Parkland Pillar® Birch
- Cobalt-n-Gold™ Hypericum
- Fireside® Ninebark
- Superstar™ Spirea

Little Hottie® has many landscape applications, including commercial properties. It's compact stature and salt tolerance is excellent for use along sidewalks and parking lot areas. Little Hottie® (1) is an excellent companion plant for Superstar™ Spirea (2) and Cobalt-n-Gold™ (3) Hypericum.

PROBLEM SOLVERS

Adding shrubs to your landscape is an excellent way to provide structure, frame buildings, anchor designs, and create year-round interest. Check this handy chart when designing to take advantage of all these Rock Stars have to offer.

FIRST EDITIONS® ROCK STARS	SIZE		SUN NEEDS	ZONE

BERRY WHITE®

PANICLE HYDRANGEA

Hydrangea paniculata 'Renba' PP28,509

WHY IT ROCKS:

- Strong stems hold flower heads upright
- Incredible fall color – the best we've seen on any panicle hydrangea
- Low maintenance – just needs a trim in late winter

HOW TO USE IT:

- Colorful hedge / privacy screen
- Specimen plant or back-of-border grouping

BEST BUDS:

- Cobalt-n-Gold™ Hypericum
- Superstar™ Spirea
- Sapphire Surf™ Bluebeard

HEIGHT	WIDTH	SHAPE
6-7'	4-5'	Spreading
ZONE	EXPOSURE	
3-8	Full Sun to Part Shade	

JADE PARADE[®]

SAND CHERRY

Prunus pumila 'UCONNPP002' PP33,014

WHY IT ROCKS:

- Profuse spring bloomer
- Low-growing with glossy blue-green foliage turns shades of yellow, orange, and red in fall
- Tolerant of dry conditions once established

HOW TO USE IT:

- Mass planting or groundcover as an alternative to Gro-Low Fragrant Sumac
- Hillside erosion control, parking lot islands, and high-traffic landscapes

BEST BUDS:

- Little Hottie[®] Panicle Hydrangea
- Shining Sensation[™] Weigela
- Eclipse[®] Bingleaf Hydrangea

HEIGHT	WIDTH	SHAPE
2-3'	4-6'	Spreading
ZONE	EXPOSURE	
3-7	Full Sun	

LITTLE SPARK[®]

SPIREA

Spiraea japonica 'Minspil04' PP30,819

WHY IT ROCKS:

- Retains colorful foliage all season without reversion, offering a substitute for 'Goldflame'
- Orange new growth, yellow summer foliage, and charming pink flowers give way to leaves with shades of pink in fall
- Compact, low-maintenance, and hardy selection

HOW TO USE IT:

- Low border planting
- Decorative pots for multi-season, easy-care interest

BEST BUDS:

- Spicy Devil[®] Ninebark
- Technito[®] Arborvitae
- Tianshan[™] Seven-Son Flower

HEIGHT	WIDTH	SHAPE
18-24"	18-30"	Rounded, Spreading
ZONE	EXPOSURE	
3-8	Full Sun to Part Shade	

ICEBERG ALLEY®

SAGELEAF WILLOW

Salix candida 'Jefberg'

WHY IT ROCKS:

- Incredibly cold hardy to Zone 2
- Thrives in moist soil and is great in rain gardens
- Colorful spring catkins add early-season interest and nectar for pollinators

HOW TO USE IT:

- Soften or balance a colorful display
- Mid-size hedge or adding a pop of light color as a specimen

BEST BUDS:

- Fireside® Ninebark
- White Diamonds® Panicle Hydrangea
- Rainbow Sensation™ Weigela

HEIGHT	WIDTH	SHAPE
3-6'	3-6'	Upright, Rounded
ZONE	EXPOSURE	
2-6	Full Sun	

AMBER JUBILEE™

NINEBARK

Physocarpus opulifolius 'Jefam' PP23,177

WHY IT ROCKS:

- Multi-season foliage interest: orange, yellow, and gold new growth followed by mildew-resistant green summer leaves and then red and purple tones in fall
- Spring flowers add early-season pops of color in especially cold climates
- Dense habit creates an impressive backdrop

HOW TO USE IT:

- Back-of-border or privacy hedge
- Dramatic addition of height to a mixed display

BEST BUDS:

- Strawberry Sundae® Panicle Hydrangea
- Lotus Moon™ Pearlbush
- Snowdance™ Japanese Tree Lilac

HEIGHT	WIDTH	SHAPE
5-7'	4-6'	Upright, Rounded
ZONE	EXPOSURE	
2-7	Full Sun	

ECLIPSE®

BIGLEAF HYDRANGEA

Hydrangea macrophylla 'Bailmacseven' PP34,544, US Patent Pending

WHY IT ROCKS:

- Intense dark purple leaves hold their color even in sunny warm climates
- Cranberry or amethyst-colored blooms make dramatic impact
- Because it's low maintenance, Eclipse® is suitable for residential and commercial landscapes

HOW TO USE IT:

- Its contrasting colors make it perfect for pairing with anything in the garden.
- Perfect as a focal point in the garden or in decorative containers either by themselves or mixed with seasonal plants.

BEST BUDS:

- Neon Burst™ Dogwood
- Campfire Rose
- Cool Splash® Dwarf Bush Honeysuckle

HEIGHT	WIDTH	SHAPE
3-5'	3-5'	Mounded
ZONE	EXPOSURE	
5-9	Morning Sun, Part Shade
