Features of our aluminum planters

Color variety

Aluminum planters have the advantage of being available in a large color selection.

Lightweight

Aluminum planters weigh much less than Corten steel making them a better option for rooftop installations that cannot handle heavy weight.

Weather-Proof

The intense heating process of powder-coating enables the color to last for years even while being exposed to harsh weather conditions.

Versatile Décor

The aluminum planter is extremely popular among interior and exterior designers, who strategically use the planters to complement entire spaces of design themes.

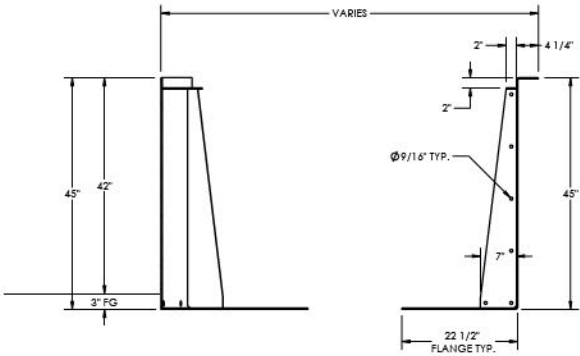

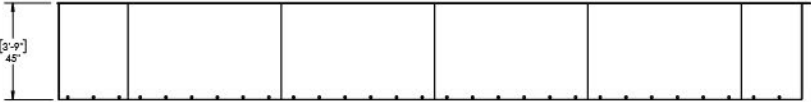

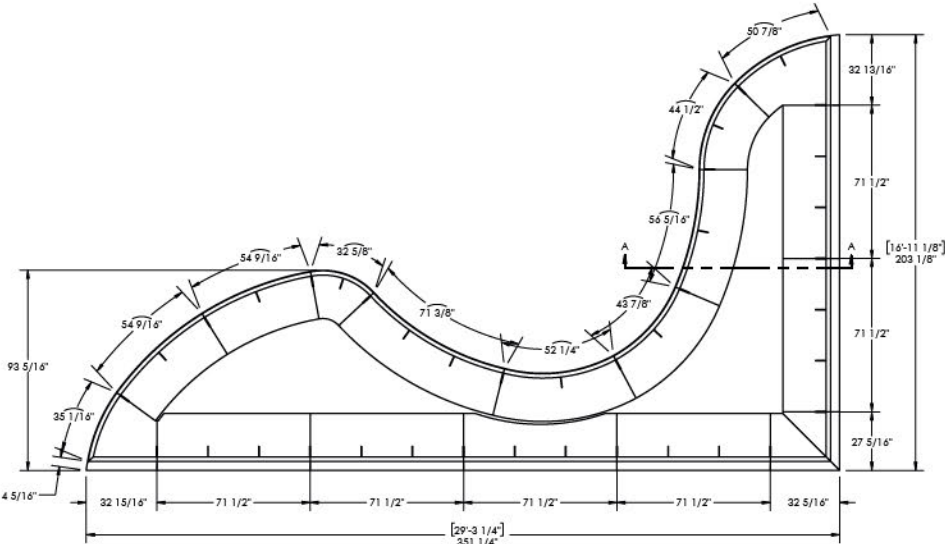

Custom planters

When inspiration strikes and you have the perfect vision of how you want your landscaping to look, having a suitable large outdoor planter can make or break your design.

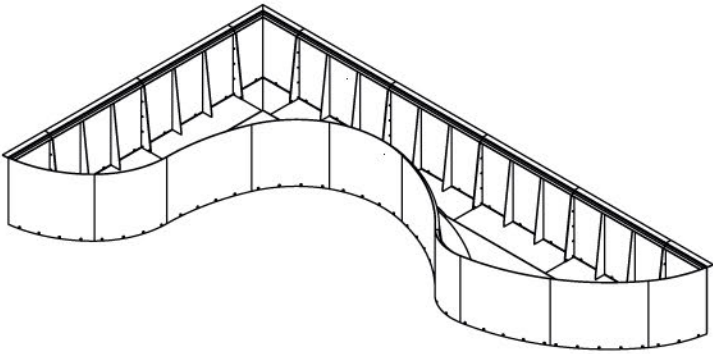

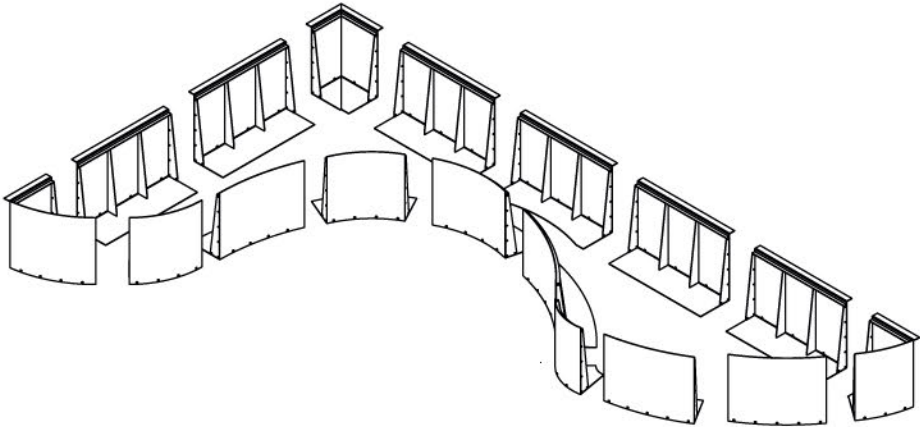

Simple—just send us your specifications, and we'll fabricate a custom planter that will turn heads and bring your vision to life.
