

TRENCH DRAINS FOR: FIRE STATION, EMS & PUBLIC WORKS

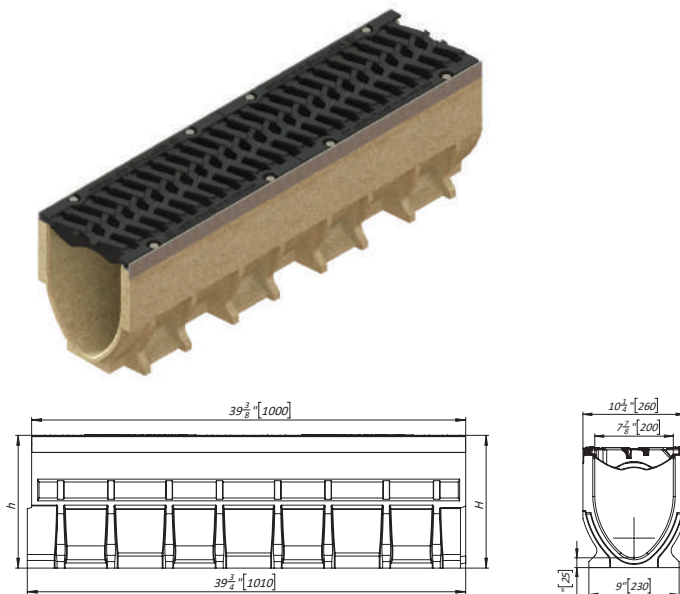

Vodaland Canada specializes in providing top-quality trench drains with compatible options for fire stations, EMS facilities, and public works depots. Our trench drains are known for their durability against heavy loads and efficiency in managing water flow. In this brochure, we will explore the benefits of using Vodaland Canada's trench drains in your project.

PRO 200PC SYSTEM

We design our trench drains to find the perfect balance between reliability and cost-effectiveness. The most commonly purchased product for this type of application is our 8" PRO polymer concrete pre sloped trench drain. This drain features a E-class ductile cast iron grate which is fitted into an 8" internal-width polymer concrete channel.

Polymer concrete is the best option in fire stations due to the resilience against the wear and tear of heavy vehicles driving over, and the resistance to chemicals that may be used for cleaning maintenance and every-day operation within these facilities.

The ductile cast iron grates are sought after for their strength against even the most extreme traffic, and the ability to withstand the damaging effects of corrosion that other materials would deteriorate from.

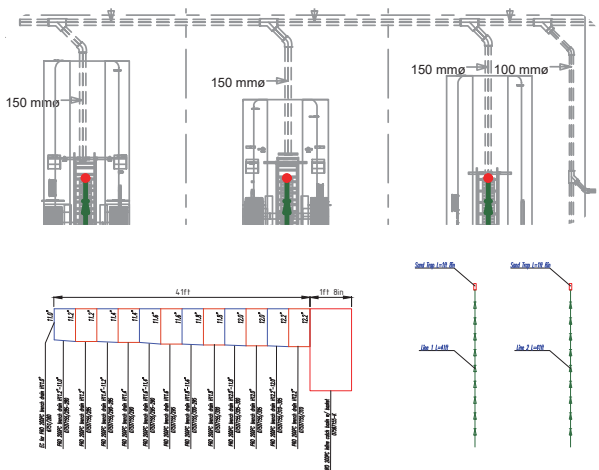

Quality and dedication from design to construction.

Vodaland Canada has its own engineer specialists that offer free advising to engineers supported with high quality documentation and technical information. With our dedicated professionals, we strive to ease the mechanical project design process and construction phase as much as we can.

ENGINEER SUPPORT AND SERVICES:

We understand the importance of accurate technical information and guidance provided in a timely manner. What we do:

- Project requirement analysis and product recommendation that meets site requirements.
- We provide:
 - Specification sheets
 - Installation specs
 - Product drawings
 - CAD files
- Trench drain run schematics and detailed product breakdown unique to each project.

CONTRACTORS:

As a contractor, Vodaland provides you with benefits that other brands can't outside of just the drainage material.

- The structure of our business means that you are receiving your product on time and at the lowest price.
- Our customer service representatives will help you every step of the way: from design, to delivery, to installation.
- Your customer will be overjoyed with the low-maintenance requirements of our drainage, and you will be able to accomplish any of their design needs due to the customizability.
