

STAINLESS STEEL DRAINAGE FOR: SANITARY, CHEMICAL AND FOOD PROCESSING APPLICATIONS

Vodaland Canada specializes in providing top-quality drainage with compatible options for sanitary/chemical facilities, and food processing applications. Our STAINLESS trench drains, slot drains, and floor drains are known for their durability against harsh chemicals, temperatures, and efficiency in managing water flow. In this brochure, we will explore the benefits of using Vodaland Canada STAINLESS drainage in your project.

OUR PRODUCTS

We design our drains to find the perfect balance between reliability and cost-effectiveness. Our series of STAINLESS products include trench drains, slot drains, and floor drains.

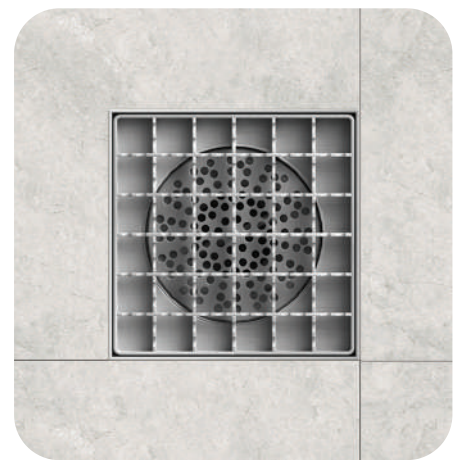

STAINLESS SERIES

STAINLESS trench drains come in a variety of sizes and are offered in both no-slope and 0.5% slope systems. The grates are reversible, featuring a no-slip side for pedestrian traffic and a smooth side for vehicle traffic.

SLOT SERIES

Stainless steel SLOT drains are designed the same as our trench drains, but instead of a flat grate they narrow into a $\frac{3}{4}$ " slot opening. This is a great option for those looking for a minimally visible system with large volume and the sanitary properties of stainless steel.

FLOOR DRAINS

Lastly, our floor drains are a great alternative to lengthy linear systems. They instead are standalone collection points that feature debris baskets and hydro-locks to improve the sanitary conditions of your facility and wastewater piping. These are often used in combination with a linear drain option to provide complete drainage capabilities to all facility floor plans.

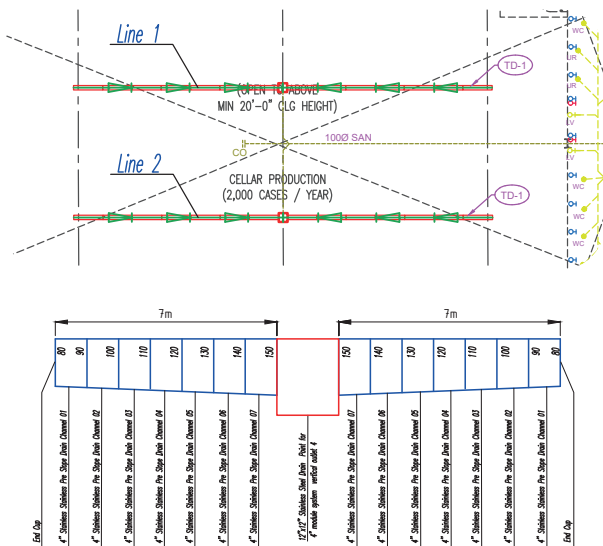

Quality and dedication from design to construction.

Vodaland Canada has its own engineer specialists that offer free advising to engineers supported with high quality documentation and technical information. With our dedicated professionals, we strive to ease the mechanical project design process and construction phase as much as we can.

ENGINEER SUPPORT AND SERVICES:

We understand the importance of accurate technical information and guidance provided in a timely manner. What we do:

- Project requirement analysis and product recommendation that meets site requirements.
- We provide:
 - Specification sheets
 - Installation specs
 - Product drawings
 - CAD files
- Trench drain run schematics and detailed product breakdown unique to each project.

CONTRACTORS:

As a contractor, Vodaland provides you with services that other brands won't. The structure of our business means that you are receiving your product on time and at the lowest price. Our customer service representatives will help you every step of the way: from design, to delivery, to installation.
