We offer cleverly designed
modular aluminum profiles
that are quick and easy
to install.

Colour: Spotted Gum
Architect: Joe Adsett Architects
Photographer: Scott Burrows

All components simply clip together and don't require welding. The fixings are completely concealed for a clean and seamless finish.

Our profiles come in a variety of unique shapes and sizes and are available in an ever evolving range of woodgrain colours and finishes.

Incredible customisation with:

- _Profile shapes and sizes.
- _Spacing preference.
- _Batten and slat angle options.
- _Different backing alternatives.
- _A range of finishes.

Battens

Based on a 2 part system. The backing is fixed to the substrate, then the batten is simply clipped on to conceal the fixings.

We have over 20 different shapes and sizes that can be used with our batten extenders, spacers and backing systems.

Geometrics

Hollow sections, angles and channels that can be used independently or integrated with other systems.

Cladding

A selection of board styles that interlock together and clip to the substrate. Trims and finishing pieces provide a clean, minimal finish.

Clip in profiles can be added to our dimensional board for a striking textured effect.

Accessories

Matching end caps, spacers, joiners and additional components to complete each system.

Slats

A variety of shapes that integrate with our specially designed posts and framing systems.

Architectural Bass
Schmidt & Smith

Locally Made & Owned.

What this means for you...

- _ Buying a product manufactured to local safety, quality and environmental standards.
- _ Local customer service and prompt after sales support.
- _ Industry expertise and understanding.
- _ More options for customisation.
- _ Shorter lead times.
- _ Reliable warranties and guarantees.

15 Year Warranty*

Knotwood products can have up to a 15 year performance warranty.*

*TERMS AND CONDITIONS APPLY. CONTACT A KNOTWOOD REPRESENTATIVE FOR FURTHER DETAILS.

Non Warping

Knotwood's aluminum lengths are not only lighter, but stronger and straighter than real wood and will not warp over time.

Low Maintenance

Knotwood's specialised powder coat finish has outstanding properties to ensure ease of maintenance and longevity of your surfaces.

Lightweight

Aluminum has a density one third that of steel and a weight 50% less than wood. This means low transport costs and easy installation.

Colour Stability

All Knotwood colours have been tested to withstand the most extreme environments, ensuring that your colour choice looks better for longer.

Weather Resistant

Knotwood won't swell, grow mould or rust when exposed to wet conditions. Unlike wood, it is protected from corrosion in harsh environments.

Insect Proof

Knotwood is impervious to termites and ants, and therefore doesn't require additional chemical treatments to be protected from pests.

Non Combustible

Knotwood is non-combustible and achieves a group 1 fire rating. It complies to local standards.

Scratch Resistant

A topcoat of specially developed, exterior grade paint is baked on to provide resistance to chipping, flaking, blistering and scratching.

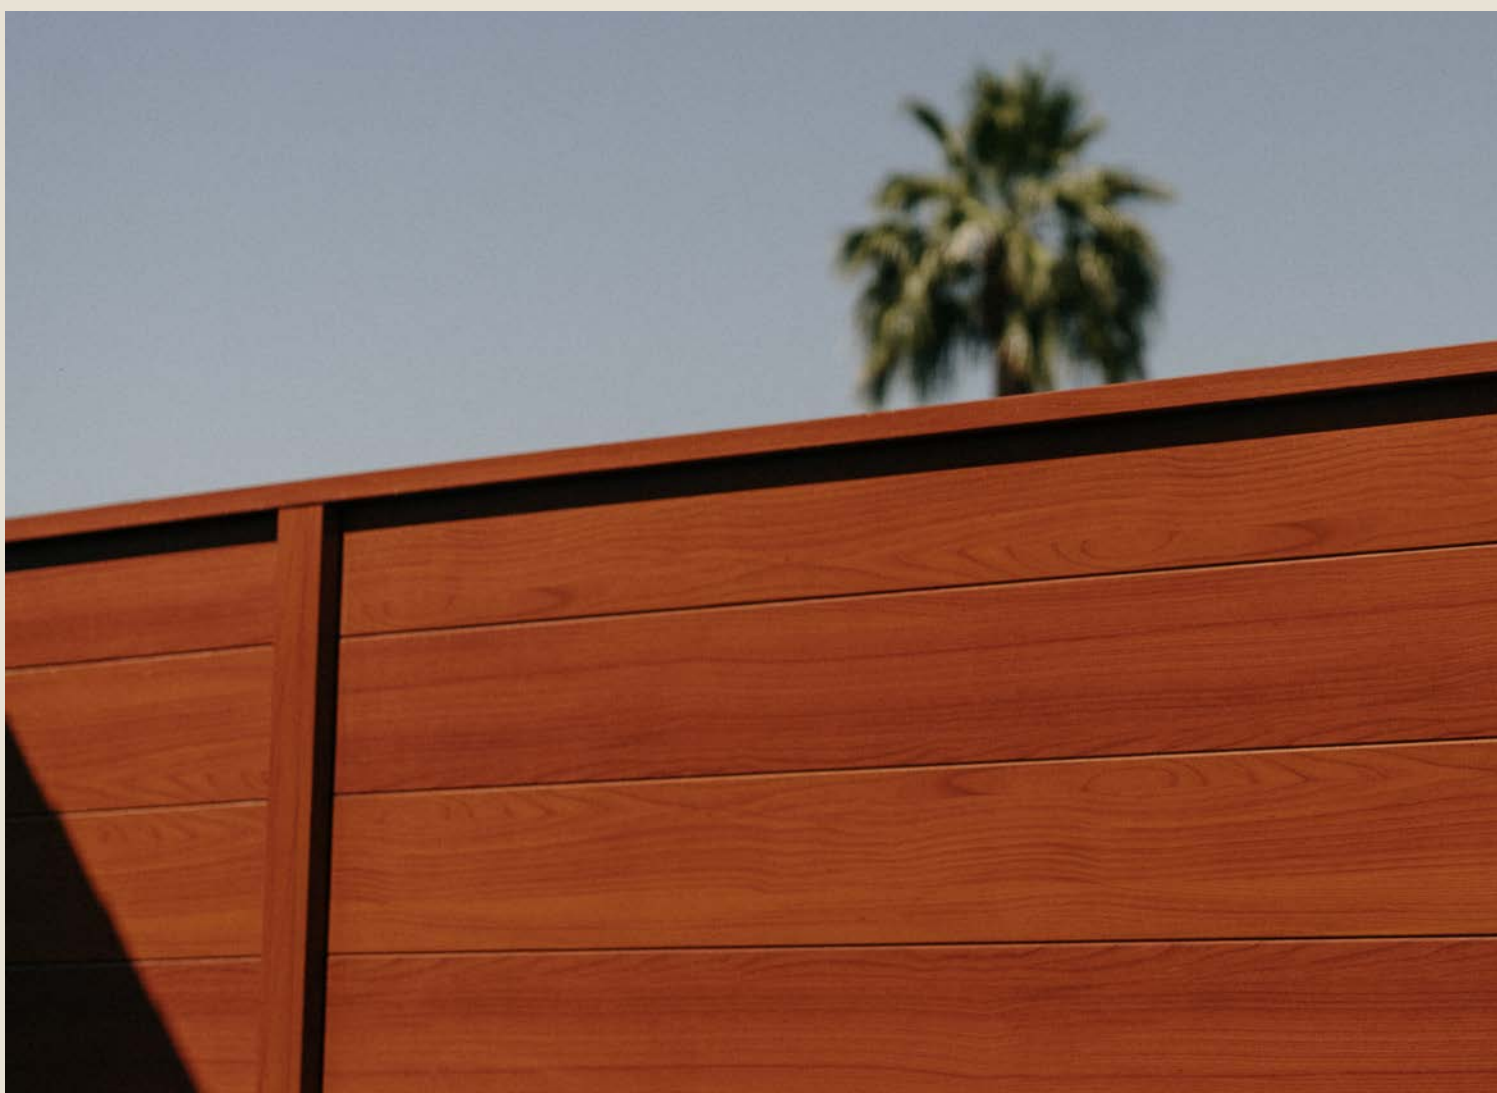

Eco Friendly

Knotwood is 100% recyclable, uses VOC free coatings and lead free finishes resulting in a smaller environmental footprint for us and for you.

- _Non Combustible.*
- _Non Warping.
- _Strong yet light.
- _Insect Proof.
- _Corrosion Resistant.
- _Scratch Resistant.
- _100% Recyclable.

Facades

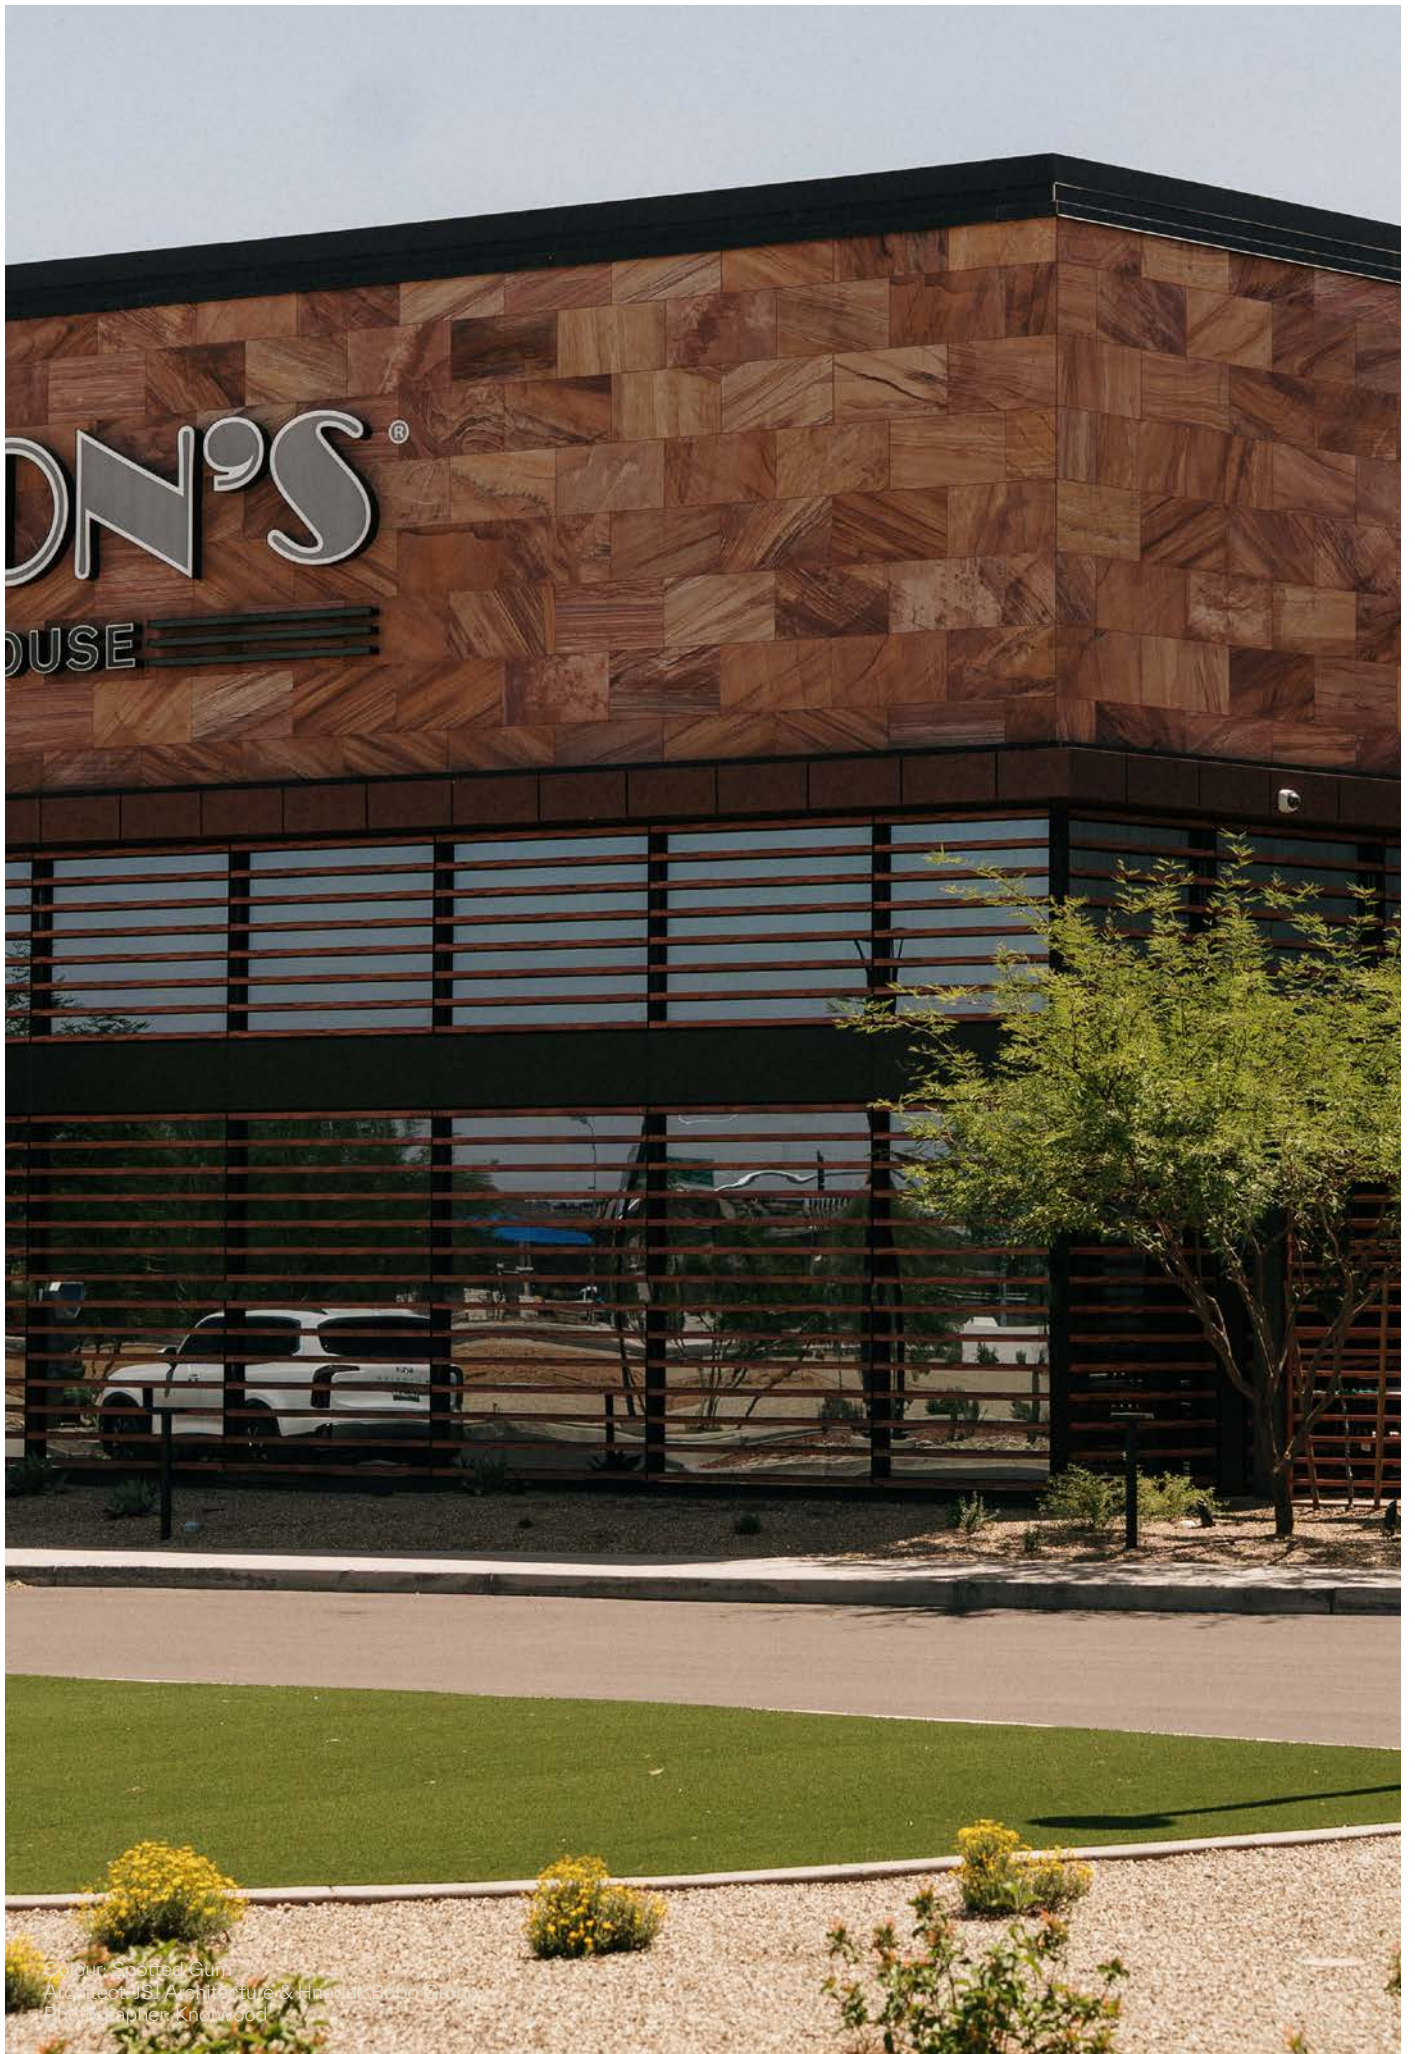

Colour: White Ash
Architect: John Contoleon Architecture
Builder: Kasso Constructions
Photographer: Brock Beazley

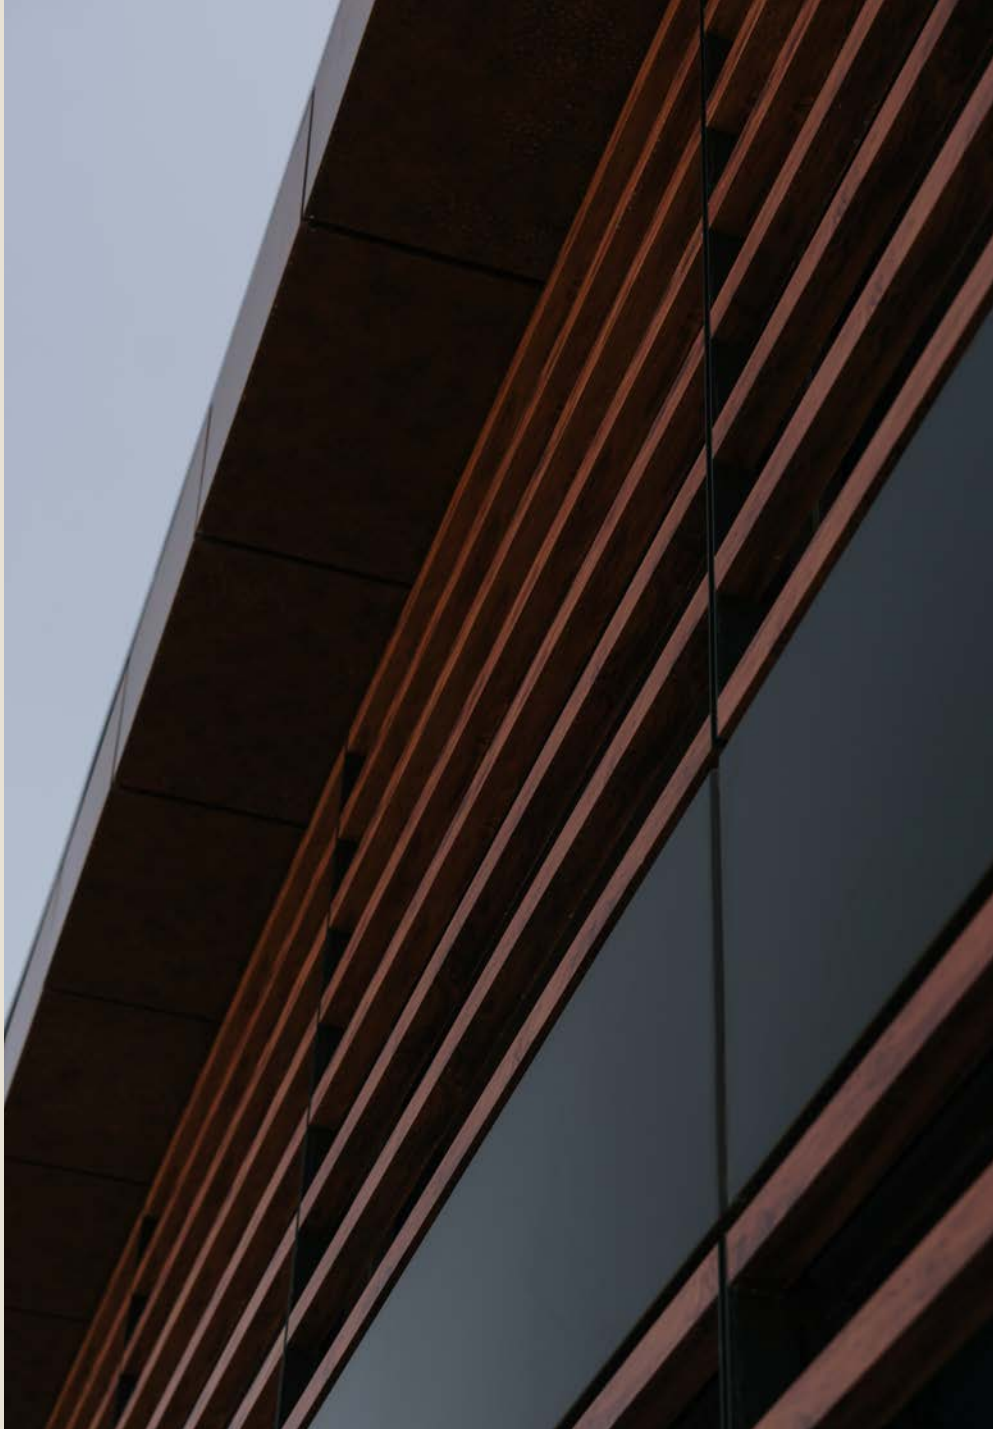

First impressions count. A striking architectural facade will attract attention, create curiosity and set the tone of your building.

Our unique shapes, sizes and finishes offer endless creative opportunities.

Garage Doors

Be the envy of your neighbours by giving your garage door street appeal.

Flush mount battens seamlessly conceal the garage door and highlight the facade's geometry with linear lines. Choose from various shapes and sizes which can be used horizontally, vertically or diagonally.

Ceilings & Walls

Colour: Kwila
Architect: BN Group
Photographer: Mark Syke

Create a stunning architectural feature by adding smart linear lines and the warmth of wood. Use them to conceal an unsightly building structure, to define a space or to add acoustic properties.

30+ Wood Grain Colours

View the current range at
knotwood.com

A modern expression of natural wood tones, bringing together gentle neutrals and rich deep hues.

Our specialised sublimation process transfers our unique wood grain designs onto a powder coated surface. The result is a natural timber aesthetic with a textured matt finish.

Other Finishes.

Rust, Copper & Concrete

Earthy industrial textures that celebrate imperfection. The natural variation in the layers of colour give a three dimensional effect that adds character and drama.

Solid Colours

Inspired by traditional hues with a modern contemporary twist. Our refined tones are easy to pair and compliment raw modern day materials.

Anodised

A contemporary colour range of subtle shimmering, textural hues that enhance the natural metallic lustre of aluminum.

Specialty Coatings.

Anti Mar

We have performed rigorous testing to create the ultimate scratch, scrub and abrasion resistant finish. The advanced powder coating technology withstands high traffic areas and harsh environments.

Anti Graffiti

A unique powder coat finish that allows for simple and easy removal of most forms of marks and graffiti.

Anti Microbial

A hospital grade coating with silver ion technology designed to provide protection against microbial growth. Perfect for high human traffic areas eg. medical/dental, shopping centres and public amenities.

OUR SPECIALTY COATINGS CAN BE REQUESTED WITH ALL OF OUR COLOURS AND FINISHES. SPEAK TO A KNOTWOOD REPRESENTATIVE FOR MORE INFO.

Environmentally safe
& sustainable.

We have invested in a chromate free wash system, filters and chemical tanks that neutralise acids, allowing for safe water management. We strictly use VOC or volatile organic compound free powder and film. We have a powder reclamation system in place to minimise waste. Any powder waste that is collected during the application process is recycled and reused.

Our aluminum is 100% recyclable. It can be recycled over and over again without any loss of quality. We are committed to reducing our environmental impact by continuing to develop and implement effective green practices and procedures.

Consulting

We offer expert advice on which products and components will best suit your project. Our recommendations factor in the competitive price market and the need to design to industry standards while not compromising on aesthetics.

BIM & CAD

Our products can be requested in various file types. Drawings include product componentry to general detailing for a wide range of applications. Basic 2D DWG are also available.

Project costings

Our experienced sales and estimating team provide itemised quotes, enabling cross-reference of quantities.

Samples

We use overnight express and aim to deliver samples to your premises within 48 hours. Custom samples can take between 1-3 weeks.
