WOOD. HEART. CRAFT.

EDGE

purelines – timeless – versatile

EDGE embodies a refined, timeless design language that gives structure and character to urban spaces. Its distinctive trapezoidal silhouette creates a bold, architectural presence, while the precisely crafted steel connections and the wood slats following the flow of the form highlight the collection's attention to detail. Together, these elements define EDGE's sophisticated aesthetic pure, confident, and unmistakably contemporary.

Built on a modular concept, EDGE offers limitless flexibility adapting effortlessly to the diverse demands of contemporary urban and landscape design. Its intelligent system design allows planners and designers to create spaces that are both cohesive and expressive, blending functionality with aesthetic precision.

Design: andré stocker design, Dreieich (Germany)

Crafted from FSC®-certified hardwood (SCS-COC-001802), left untreated to showcase its natural character. An optional brown stain is available upon request.

Steel hot-dip galvanized and finished with a durable color coating. Standard color DB 703 anthracite iron mica. The images feature EDGE in custom colors.

EDGE I

EDGE I embodies the essence of reduction and clarity a linear bench solution that defines space with quiet confidence. Its slender silhouette is perfectly suited for narrow walkways, intimate plazas, or as a precise line that gives rhythm and structure to open areas.

Despite its minimalist proportions, EDGE I offers inviting comfort and blends effortlessly into any architectural setting from the charm of historic environments to the sleek expression of contemporary design.

EDGE II

EDGE II brings a new dimension of creative freedom to the series. Whether envisioned as a sleek bench, a bench with an integrated planter, or a standalone planter module, it invites designers to shape spaces that are both functional and alive. With its signature trapezoidal form, EDGE II maintains a strong architectural identity while adapting effortlessly to a variety of spatial concepts. The dialogue between steel, wood, and vegetation creates more than structure it breathes life into public spaces, offering places to pause, to find shade, and to reconnect with nature.

In every configuration, EDGE II transforms urban environments into living, breathing landscapes of calm and character.

RIVER PEBBLES

unique – exceptional – harmonious

Shaped by gentle, flowing curves, each form feels as if it were sculp-ted by nature itself. Its organic silhouette brings a sense of softness and balance to urban environments, turning every piece into a natural focal point that invites calm and connection.

RIVER PEBBLES can be used flexibly as a seating element, a planter, or a thoughtful combination of both. Whether placed individually or arranged in clusters, it brings a sense of playful lightness to plazas, promenades, and green spaces.

Each piece invites interaction and creativity, transforming everyday settings into welcoming places of rest and inspiration.
Design: Sandro Plonka, Freiburg i. Br.

Crafted from FSC®-certified hardwood (SCS-COC-001802), left untreated to highlight its natural warmth and authenticity. An optional brown stain is available on request.
Steel hot-dip galvanized and finished with a durable color coating. Standard color DB 703 anthracite iron mica. The images feature DOT in custom color yellow.

DOT

elegant – durable – welcoming

Design and function in perfect harmony
DOT captivates with its clean, contemporary lines and a continuous seat surface made from powder-coated perforated stainless steel.

The material lends the bench an appearance of lightness, almost as if it were floating, while offering exceptional durability and low maintenance ideal for high-traffic public spaces.

With a wide range of color options, DOT can be tailored to suit any design concept whether making a subtle statement or adding a bold, expressive accent to the urban landscape.

DOT is available in two versions: one with a backrest for enhanced comfort and relaxed seating over longer periods, and one without a backrest wider in proportion and inviting more casual, easy lounging.

Both versions reflect the same clear design language and effort-less elegance that define the series.

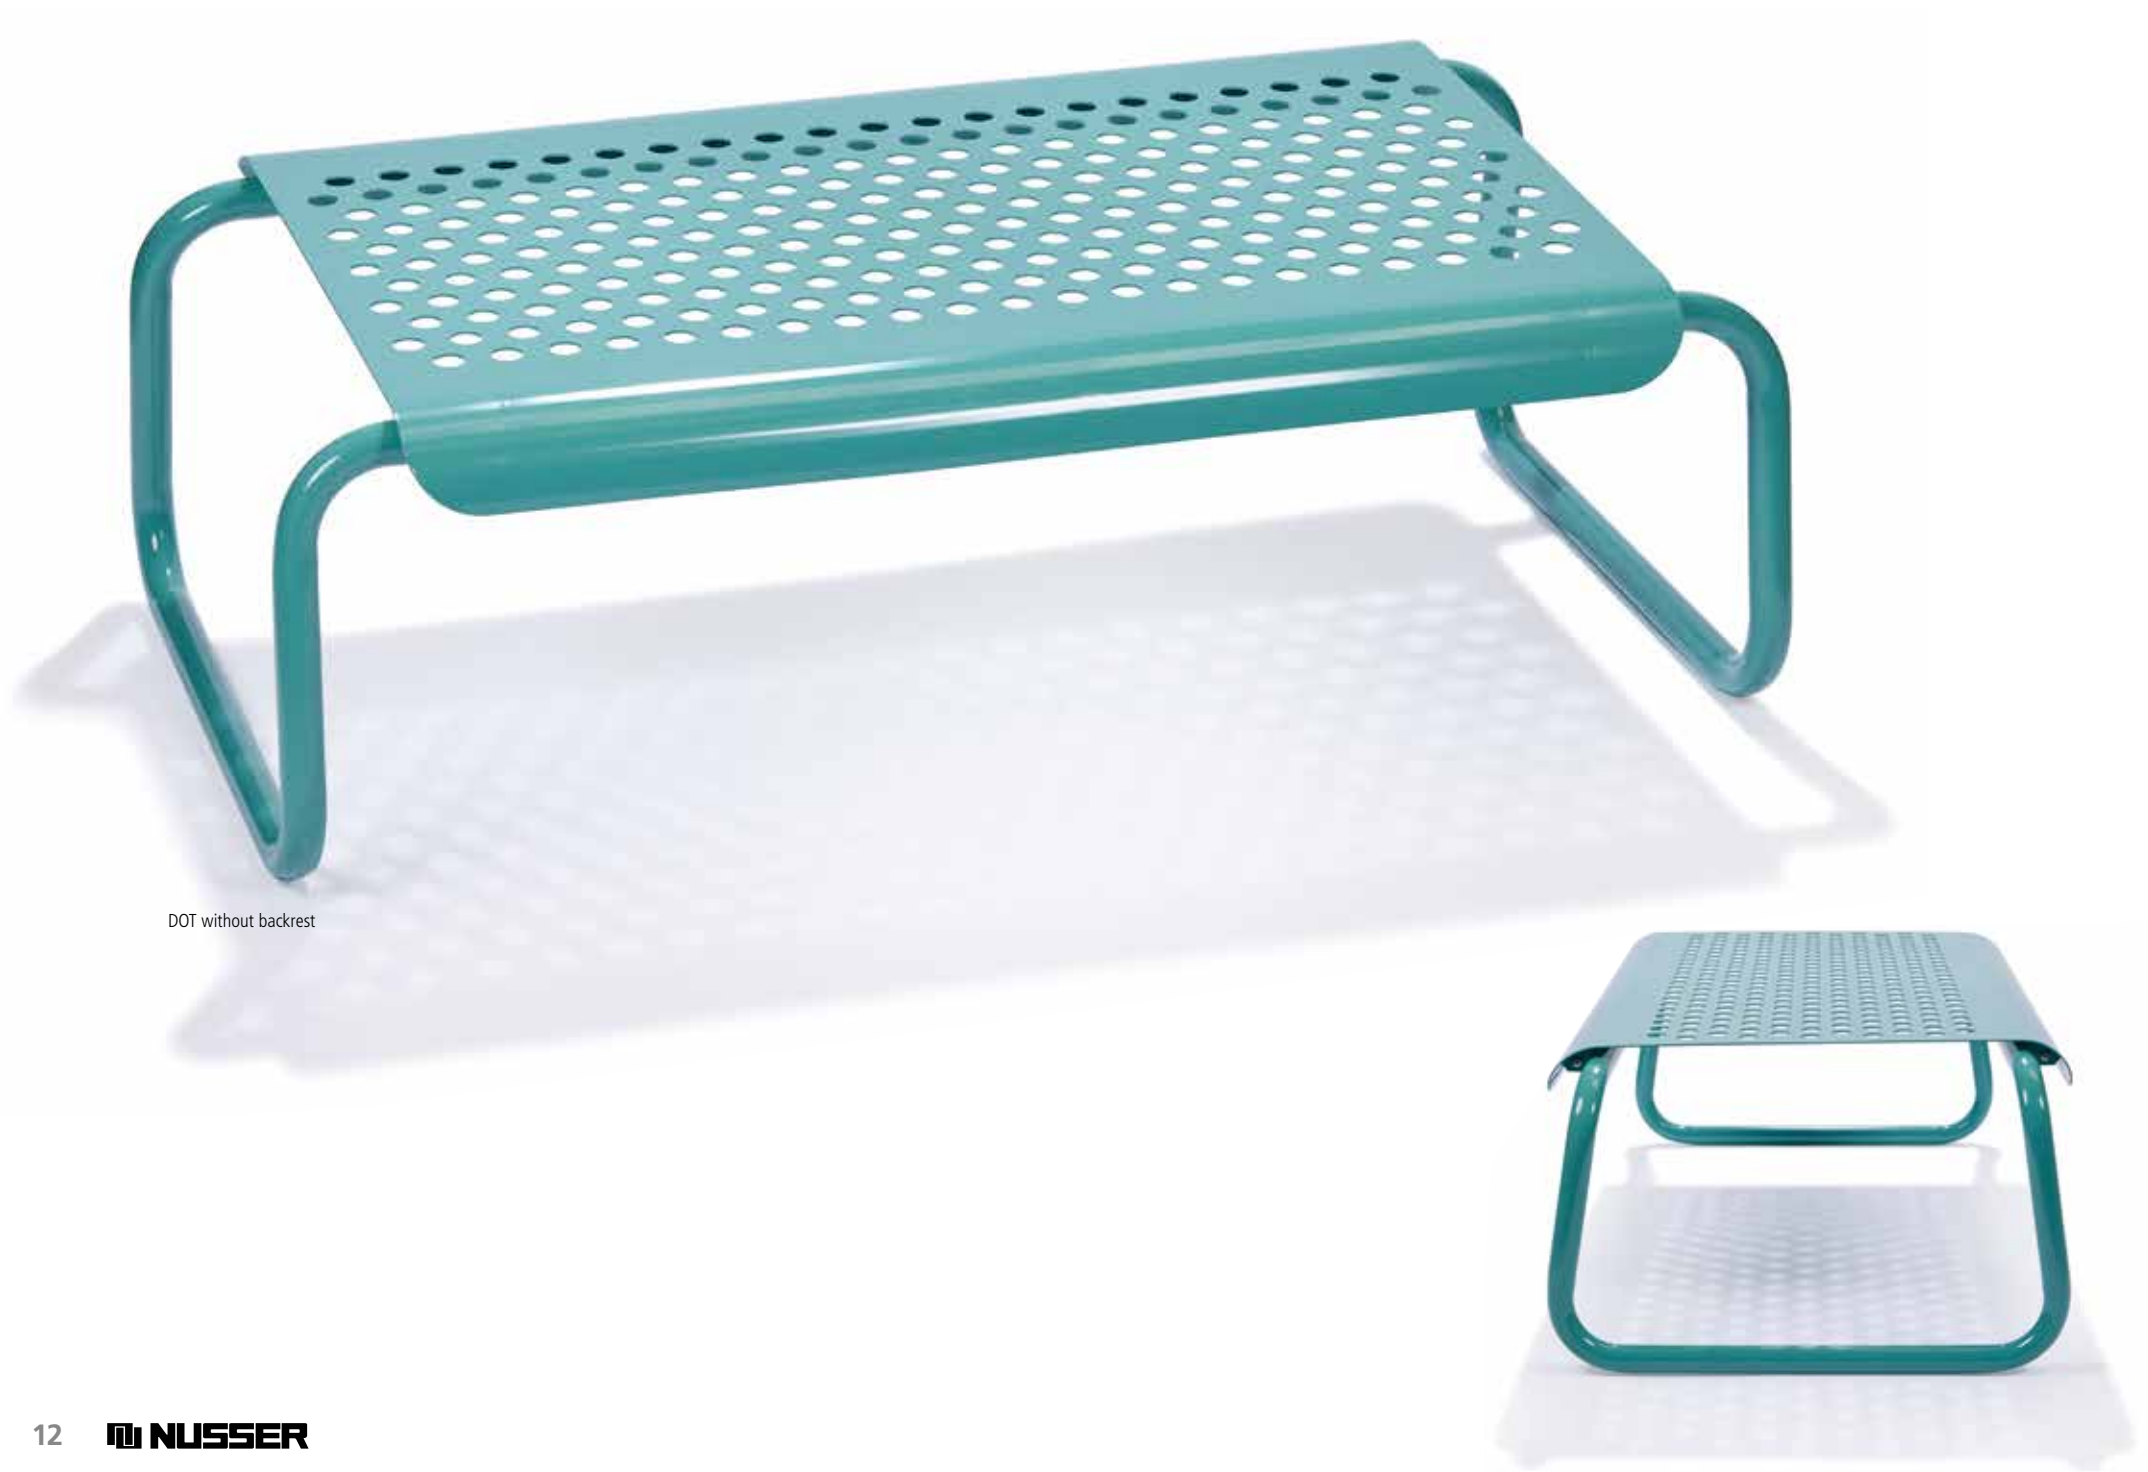

Design: eckedesign, Berlin (Germany)

Steel hot-dip galvanized and finished with a durable color coating. Standard color DB 703 anthracite iron mica.

The images feature DOT in select custom colors highlighting the series' versatility and expressive design potential.

DOT with backrest

LOOP

urban – adaptable – full of character

LOOP Bench with Backrest, Metal

With its sculptural form and flowing lines, LOOP stands as a statement piece in the urban landscape strong in character, graceful in motion, and unmistakably contemporary. It defines space not only through its presence, but through the sense of movement and connection it creates.

A defining feature of the series is its option for two-tone design: the seat and base areas can be color-accented to create subtle contrasts or bold visual highlights. This interplay of color adds depth and individuality, turning each piece into a vibrant statement within the urban environment. Design: GP designpartners, Vienna

The series is available either entirely in metal or with seat and tabletop surfaces made from warm, FSC®-certified hardwood slats creating a compelling dialogue between technical precision and natural expression.

This fusion of materials gives LOOP its distinctive character: refined yet approachable, contemporary yet deeply connected to nature. LOOP Bench with Backrest, Metal In addition to the version with a backrest, the series includes a bench without a backrest and a matching table elements that can be freely combined to create flexible and inviting seating landscapes. Together, they give planners and designers the freedom to shape open, social spaces with a strong architectural identity and timeless appeal.

Galvanized steel frame and stainless-steel seat and tabletop surfaces, or alternatively in FSC®-certified hardwood (SCS-COC-001802) left untreated to showcase its natural beauty. An optional brown stain is available on request.

Color coating available in single or two-tone finishes offering endless possibilities for creative expression. Standard color DB 703 anthracite iron mica.

RADIUS

adaptable – sculptural – colorful

Seven different outer radii—from 1.50 m to 5.00 m along with a straight segment, open up virtually unlimited possibilities for creating circular benches, partial arcs, or freely composed configurations.

Public plazas, green spaces, and especially educational environments can be designed and enhanced in truly individual ways.

The result is durable, versatile seating solutions that enrich public spaces, invite people to linger, and add a distinctive architectural accent to their surroundings.

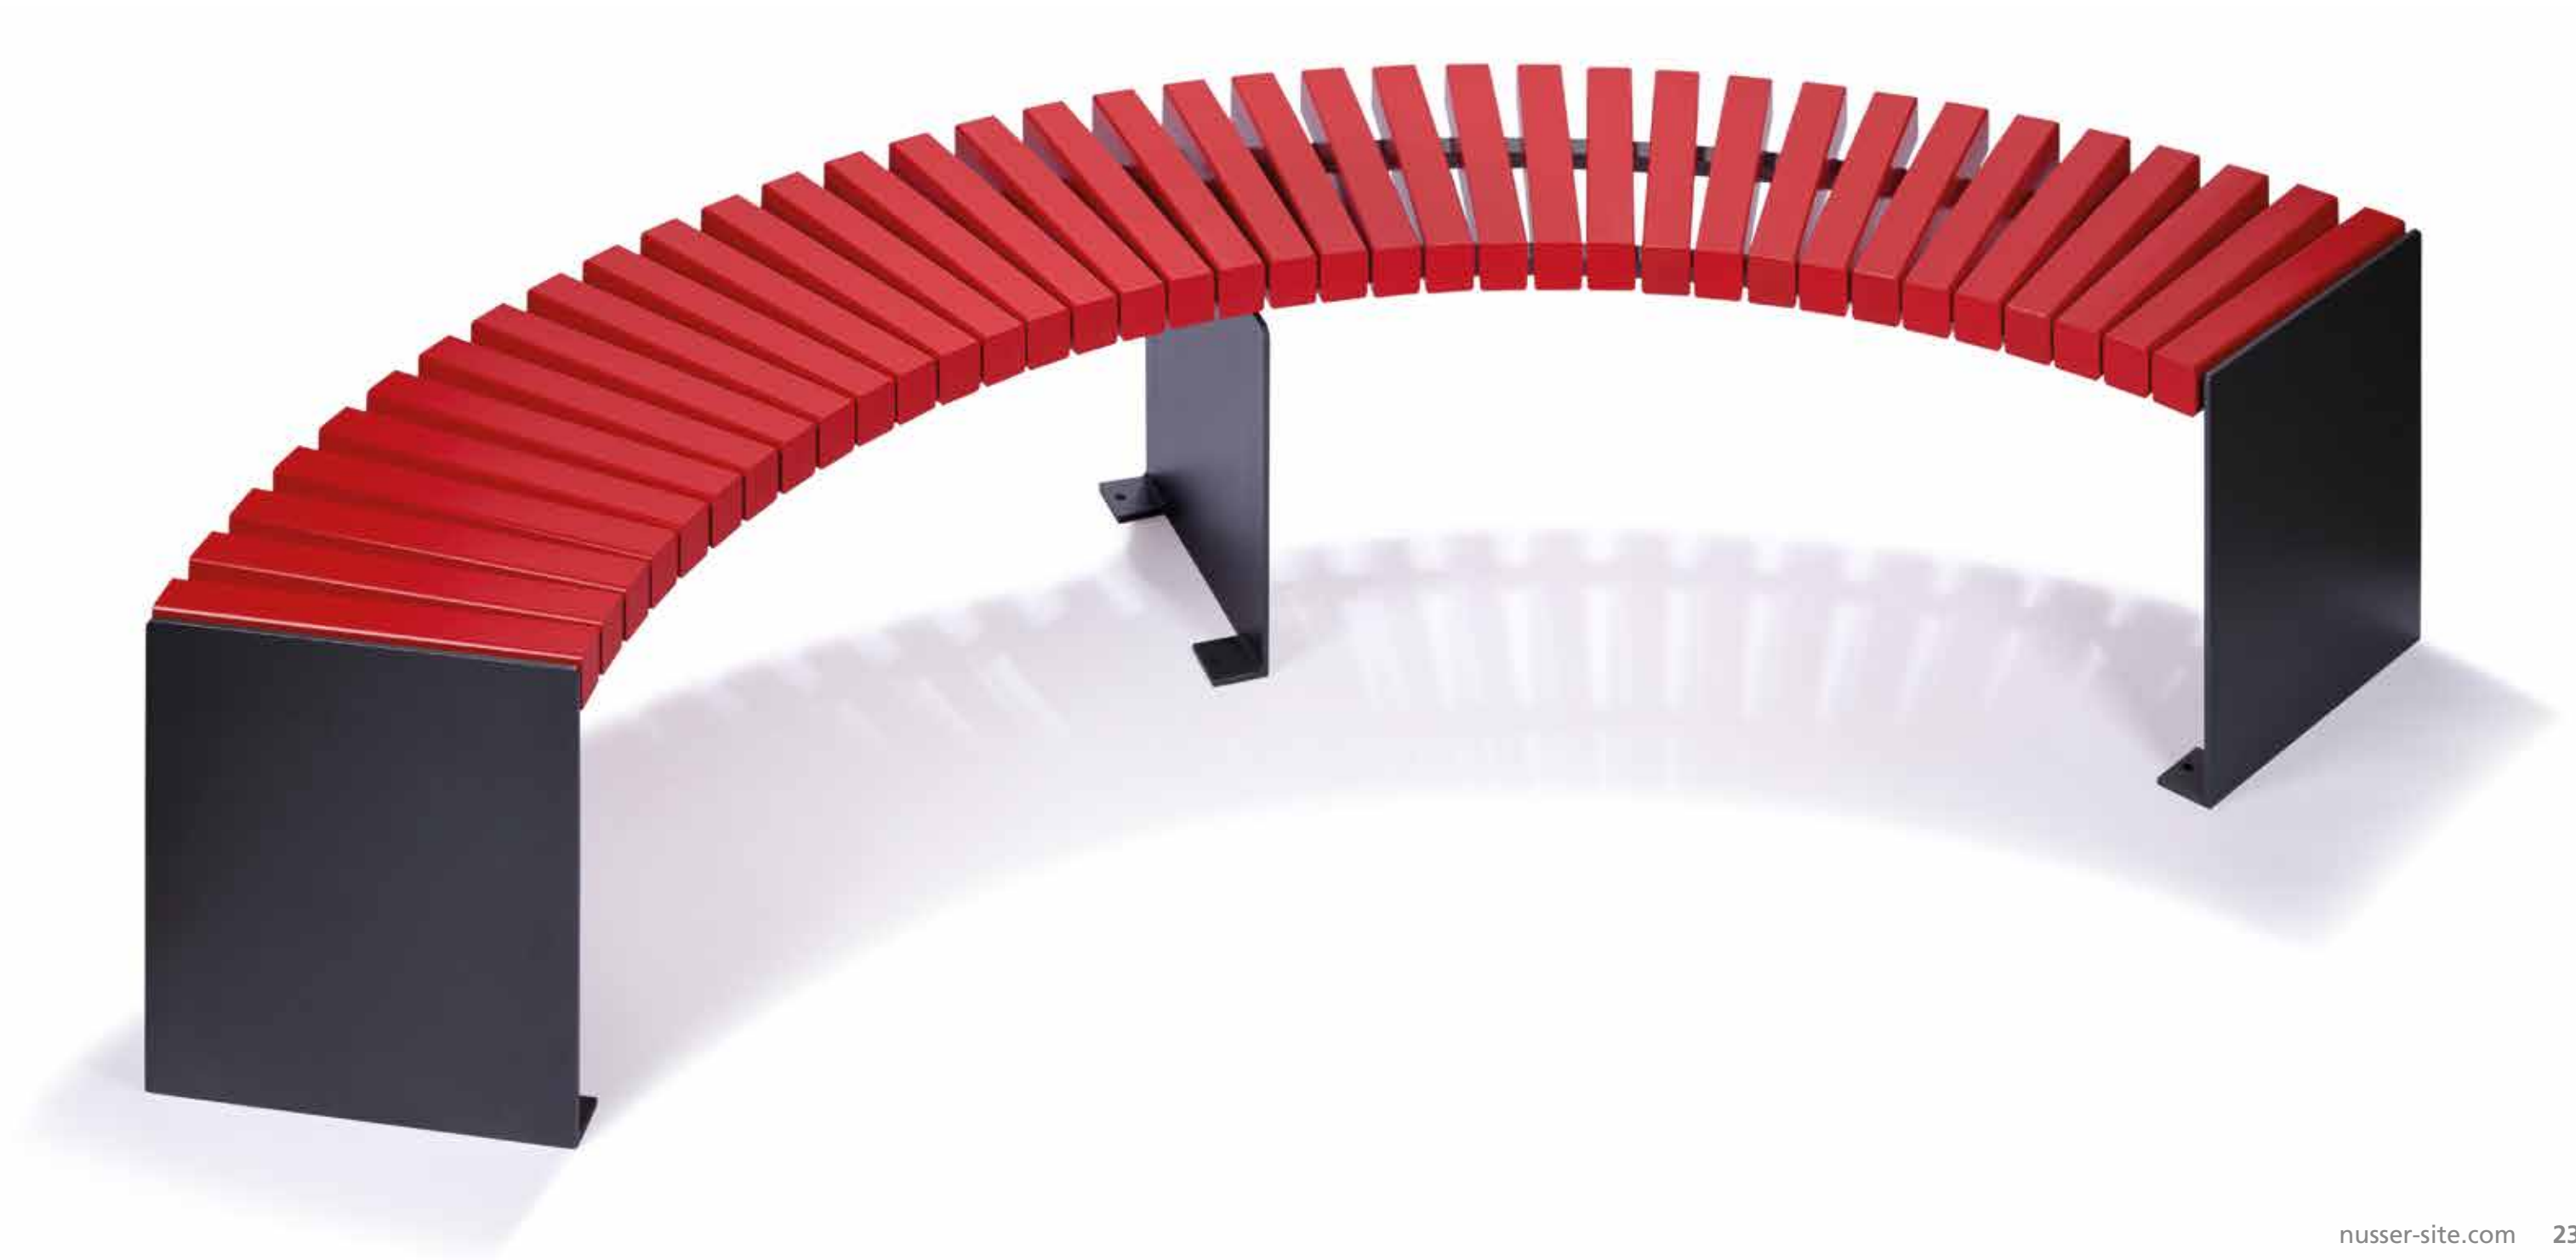

The seat slats, made of colorfast acrylic, are weather-resistant, low-maintenance, and offer the freedom to bring vibrant color into urban furniture design. Alternatively, FSC®-certified hardwood slats are available, lending a warm, natural character that blends seamlessly into both contemporary and traditional environments.

Modern base frames made of flat steel designed for installation either below or at ground level ensure stability while blending seamlessly into the overall aesthetic.

Available in acrylic or FSC®-certified hardwood (SCS-COC-001802), left untreated to preserve its natural character. An optional brown stain is available on request.

Steel hot-dip galvanized and finished with a color coating. Standard color DB 703 anthracite iron mica.

The image shows two RADIUS segments with red acrylic slats. Many additional colors available upon request.

COMIDO Kids

tailored for children – welcoming by design

Perfectly tailored to the needs of children, this version of the successful COMIDO seating group features adjusted proportions and a child-friendly height. Seat and table-top surfaces are available in either colorfast acrylic or FSC®-certified hardwood, ensuring a durable, low-maintenance solution that combines functionality with inviting design.

Ideal for kindergartens, schools, recreation areas, and public playgrounds, COMIDO Kids offers children a functional, safe, and inviting place to draw, play, and gather together. It creates small worlds of interaction and joy – spaces where design meets imagination.

Available in acrylic or FSC®-certified hardwood (SCS-COC-001802), left untreated to preserve its natural character. An optional brown stain is available on re-quest.

Steel hot-dip galvanized and finished with a color coating. Standard color DB 703 anthracite iron mica.

MONSA with SmartBeam solar module

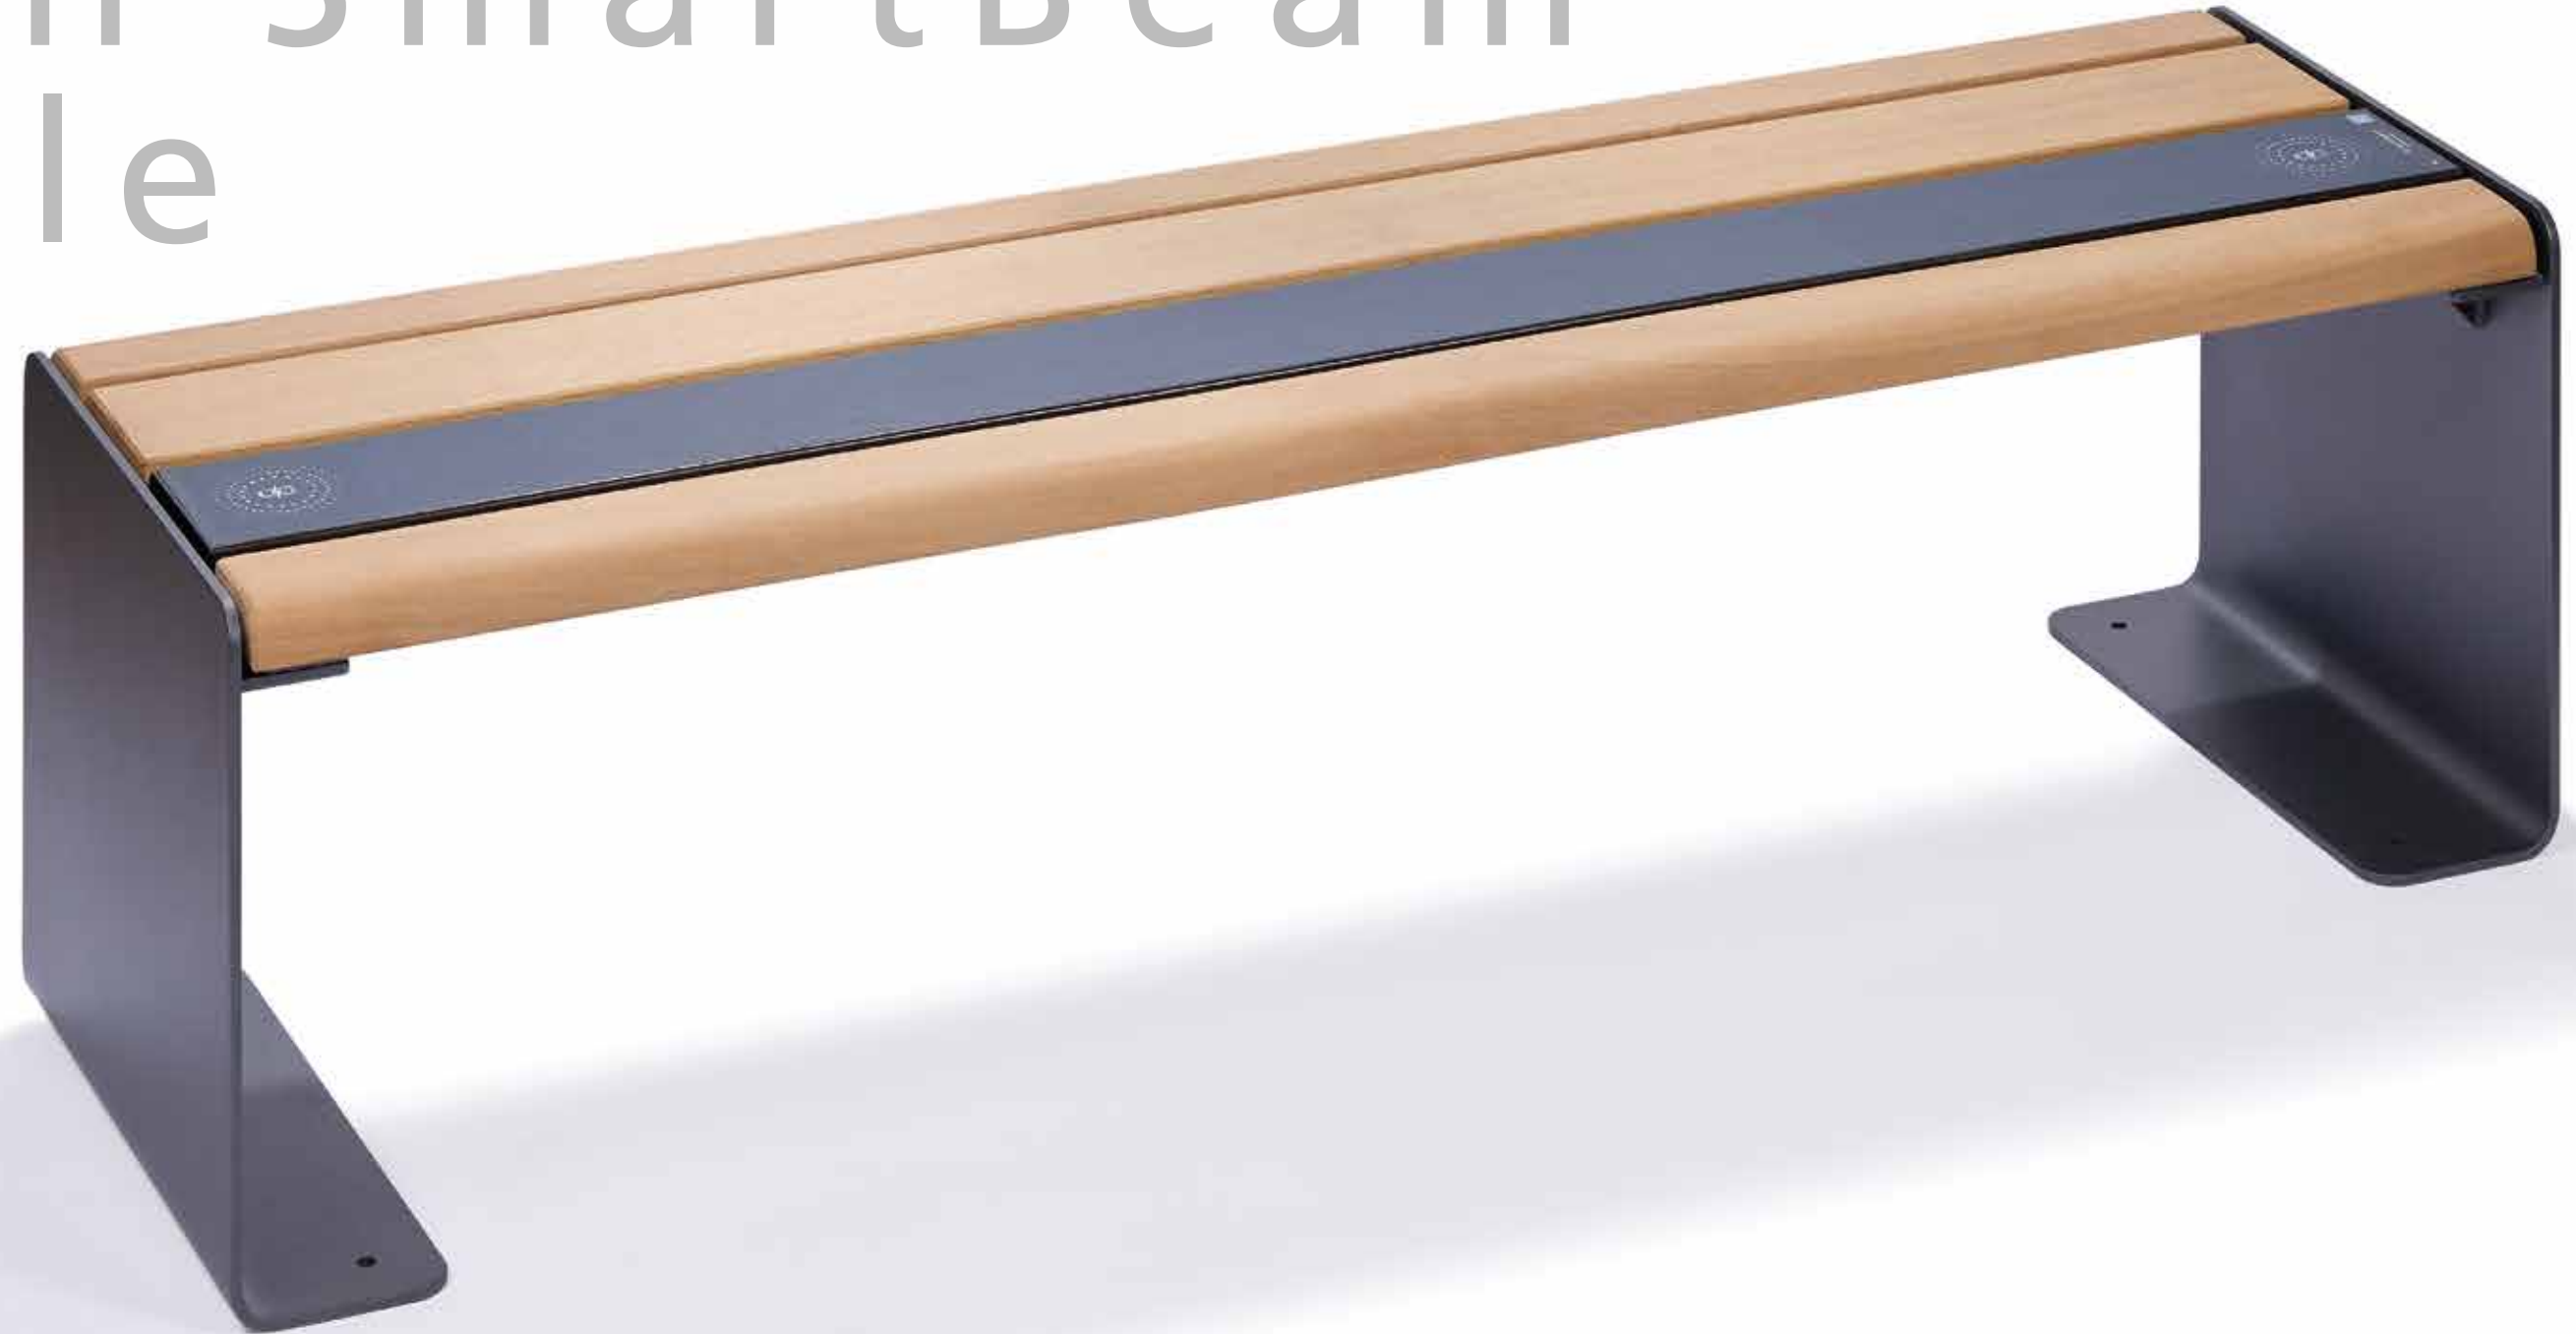

energized – seamless – smart

Energy where it's needed most. SmartBeam turns benches and tables into elegant sources of energy and light in public spaces. By day, it captures the sun's power to charge mobile devices wirelessly. By night, subtle underseat lighting adds atmosphere and orientation combining design, safety, and smart functionality in one seamless experience.

The SmartBeam fits seamlessly into the seat surface crafted from FSC®-certified hardwood slats, uniting technology and design in one elegant gesture. It can be integrated into a variety of bench and table models, and on request retrofitted to existing products. A forward-thinking solution for contemporary urban spaces where design, comfort, and smart technology converge to create meaningful experiences.

Crafted from FSC®-certified hardwood (SCSCOC-001802), left untreated to highlight its natural warmth and authenticity. An optional brown stain is available on request. Steel hotdip galvanized and finished with a color coating. Standard color DB 703 anthracite iron mica.

Our technology partner for the PV solution is Strawberry Energy, a pioneer in the field of smart benches.

Crafted for Life

We are ...

... an independent company within the NUSSE GROUP. For more than 90 years, we have stood for the creation of forward-looking living spaces through innovative site furnishing. Guided by our vision "Creating living spaces for tomorrow," we develop solutions and products with wood, heart, and craft.

Traditional craftsmanship was instilled in us by our founder, Wilhelm Nusser, and we have carried this commitment to the careful processing of both natural and technical materials into the present day.

We offer a wide range of urban furniture distinguished by quality, functionality, and design. Sustainability and environmental awareness are central to our production processes – using high-quality materials and eco-friendly methods.

With a strong focus on quality, innovation, and customer satisfaction, we develop tailor-made solutions for cities and municipalities. By working closely with urban planners and architects, we help shape public spaces that are both functional and aesthetically appealing.

All our products are manufactured exclusively in our own production facilities by our own employees. This enables us to guarantee the highest level of quality while maintaining flexibility – for long-lasting durability. Made for Life. Built to Last.

Sustainability ...

... begins right at our own doorstep. With our photovoltaic systems, we now generate nearly 530,000 kWh of electricity per year – about twice the annual energy consumption of the entire NUSSE GROUP. All wood shavings produced during manufacturing are compressed into briquettes and automatically fed into our heating system. Our vehicle fleet is gradually being converted to electric mobility, and at our sites in Winnenden and Waldbröl, we have installed partially public charging stations.

Since 2009, we have been an FSC®-certified company, processing only wood from responsibly managed forests.

Our certificate number is SCS-COC-001802, and our license code is FSC® C012729.

This certification guarantees that our wood comes exclusively from responsibly managed, sustainable forests. Please ask specifically for our FSC®-certified products.

Color & Finish Options

The color design of urban furniture is becoming increasingly important. That's why our products are available not only in our standard color DB 703 anthracite iron mica but also in all common RAL/DB color shades. To protect against graffiti and stickers, we can equip all products with an appropriate protective coating.

You'll find our complete product range, our sales and delivery terms (GTC), and further information on the materials we use on our website. We are on CADdetails and also provide BIM files free of charge to support your planning. We're happy to advise you personally as well if you have questions or would like a consultation, please email or call us.
