

TERRAflex

► ARS Poured-in-Place

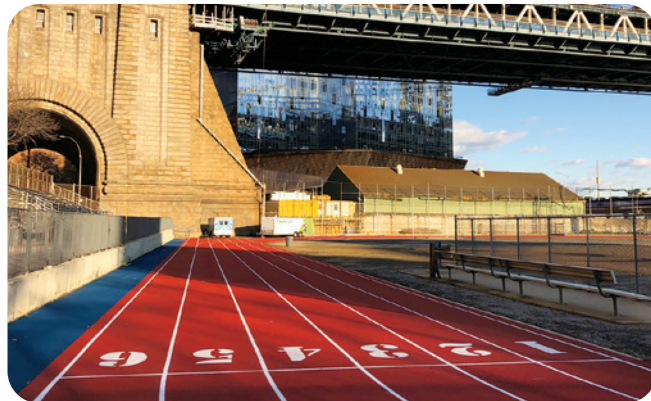

Poured-In-Place is our specialty. It is a highly versatile product that is extensively customizable. Our PIP system is designed to be durable, with lasting aesthetics and fall protection. **TERRAflex** requires minimal maintenance to stay in good condition over its lifespan.

Applications

- Playgrounds
- Fitness Areas
- Gyms
- Daycares
- Leisure Areas

TERRAtrack

► ARS Fastrack Single-Pour

Our durable running track and sport court system is a single-pour application commonly used for a wide variety of athletic surfaces. While running tracks are the most popular, this system is also excellent for low impact basketball courts, ADA accessible baseball fields, outdoor patios, and other general recreational spaces. **TERRAtrack** marginally lowers impact on the body, while offering attractive aesthetics and athletic performance compared to other sports surfaces.

Applications

- Running Tracks
- Walkways
- Jogging Paths
- Pump Tracks
- Sport Courts
- Basketball Courts
- ADA Baseball fields

TERRAturf

► ARS Synthetic Turf

Our synthetic turf systems provide an aesthetic space for sports areas, gardens, rooftops, dog runs, playgrounds and much more! ARS **TERRAturf** is a proprietary play turf system with exceptional shock attenuation properties and lasting durability.

Our Story

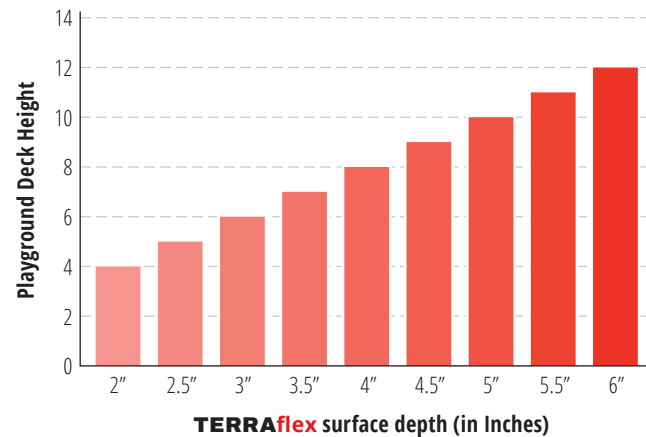

► Providing Safety Surfacing & Playground Installations Nationwide

Since we joined the rubber safety surfacing industry, we have committed ourselves to providing the ultimate customer service experience while offering highly competitive prices for our surfacing. We know how many problems can arise on a project and ARS has you covered from the sale all the way through the surface lifespan. ARS originated in Long Island, New York completing work in NYC and the Tri-State area. We now have a presence that spans throughout the Northeast, Midwest, and Southeastern United States. As we continue to grow it is our primary focus to work closely with our customers to

keep projects on track and on budget, whether it is a school district, town, city, or private business. We are committed to working our hardest each and every day to give our customers a high quality, long lasting surface.

TERRAflex Fall Protection

ARS **TERRAflex** provides excellent and lasting fall protection at all ranges of fall heights. As the industry evolves, play equipment is getting taller and more complex.

GMAX and head impact criteria (HIC) testing provided by a third party laboratory has shown that **TERRAflex** PIP can help to prevent head injuries from heights up to 14 feet.

Standard Colors

ARS offers twenty-four standard colors, all able to be combined to create any shade imaginable. Our wearing course can be customized to implement a wide array of patterns, designs, or even logos of your choosing.

With the use of a half-color and half-black granule mixture, projects can be kept in a cost-effective range and still have the vibrant, eye-catching effect that was initially desired.

Create your own PIP Color Mix!

Mix and Match up to 4 of the colors below to create endless color combinations! Experiment with color mixutres in real time on our website at www.ARSRUBBER.com

Recycle, Reuse, **Resurface!**

How we contribute to a happier, healthier planet

In New York State alone, an estimated 18-20 million waste tires are generated each year (approximately one tire-per-person-per-year)

The average **TERRAflex** system base layer is made from 100% recycled rubber. By utilizing recycled materials, our surfacing solutions prevent massive amounts of tires from reaching landfills each year, contributing to a healthier planet.
