The SS500 Series™ is exclusively available through Trench Drain Systems. This shallow stainless steel drainage system is specifically designed for small commercial markets. The 6.25" (OD) 16 gauge stainless steel channels feature a built-in 0.5% slope. Stainless U-shaped channels come in 48" and 96" lengths with neutral channels to allow for longer runs. Custom sections are available.

- Up to 56' of continuous slope at .5%
- 4' & 8' channel sections
- Neutral and half channels
- Transition channel (from SS500 - SS600)
- Tee sections and 90° elbows
- 20+ grating options
- Lightweight for rapid installation
- 304 Stainless steel
- 316 Stainless available (special order)
- Utilizes standard grating
- Single concrete pour placement
- Neoprene Gaskets
- Hardware included

The TDS SS600 SeriesTM stainless steel trench drain is designed for small commercial markets. The 6.25" (OD) 16 gauge stainless steel channels feature a built-in 1.0% slope that allows the system to channel up to 470 GPM. Stainless channels come standard in 48" lengths with neutral and 24" half channels to allow for longer drainage runs.

- Up to 470 GPM flow rate
- Up to 100' of continuous slope at 1%
- 2' & 4' channel sections
- Neutral and half channels
- Tee sections and 90° elbows
- 19 grating options
- Lightweight for rapid installation
- 304 Stainless steel
- 316 Stainless available (special order)
- Utilizes standard grating
- Single concrete pour placement
- Neoprene gaskets
- Hardware included

The TDS SS1200 system comes in 24" or 48" long channels, its 14.66" wide and has a 12.5" throat. The modular channel sections are made of 16-gauge stainless steel (type 304). Channels are connected using a bolted flange that prevents channel sections from separating during install. Channels have feet to secure the trench for a patty pour to hold channels in place for final install. These are available as a neutral system or in a 1% pre-slope.

- Load class A-E grates
- 4", 6", 8" end/bottom outlets
- Neutral or continuous slope at 1%
- 2' & 4' channel sections
- Neutral and half channels
- Tee sections and 90° elbows
- Lightweight for rapid installation
- 304 Stainless steel
- 316 Stainless available (special order)
- Neoprene gaskets
- Hardware included

Stainless Steel Drainage System

SS500, SS600 (visuals shown), SS1200 Series™ offers bottom outlets and end outlets every fifth channel. To reach your run length, choose a channel with an outlet, then add channels upstream to the run length you need.

Channels	Bottom Outlet	End Outlet
601 - 605, 605N, 605H	4" (605H)	2", 3"
606 - 610		3", 4"
611 - 615, 615N, 615H	4" (615H)	3", 4"
616 - 620		4", 6"
621 - 625, 625N, 625H	4" (625H)	4", 6"

Channel Details

Half Channel

90° Elbow

The SS Series™ offers tees, 90° elbows, neutral channels and 24" half channels to aide in the design of your drainage system. Custom sections are available.

Tee

Special Project?

Trench Drain Systems can help to design custom drainage solutions. Our in-house engineering staff can provide expert consultation, guidance and layout drawings.

Catch Basins

Catch Basin 6.25" x 24"

Trench Drain Systems offers SS500, SS600 and SS1200 Series™ stainless steel in-line catch basins to help catch sediment and debris. Catch basins can be placed with the channel run at the same locations as the end outlet. Catch basins can also be placed in the center of a channel run with both channel runs sloping toward the catch basin.

SS500/SS600 Catch Basins		SS1200 Catch Basins	
Part No.	Dimensions	Part No.	Dimensions
SS650	6.25" x 24" x 24"	SS1251	14" x 24" x 24"
SS651	12" x 24" x 24"	SS1253	24" x 24" x 24"
SS653	24" x 24" x 24"		

SS650

The SS650 catch basin comes in a standard 6.25" x 24". Outlet options pertaining to size and position are configured upon ordering.

This catch basin uses the same grating options as the channel. Stainless steel debris baskets are also available.

Catch Basin 12" x 24" SS651

Catch Basin 24" x 24" SS653

Catch Basin Grates

Choose from cast iron, stainless bar or several fiberglass options.

Installation Brackets

Simplify your installation with the SS500/SS600/SS1200 installation brackets. The brackets bolt to the bottom of the support legs. Holes accept #4 or #5 rebar (not included). Side bolts allow for easy channel height adjustment and secure alignment of channels during concrete pour.

Gaskets

Gaskets are made of neoprene rubber 40A durometer and are designed to fit between two connecting channels for a tight seal. These are available in different sizes to accommodate for sloped channels and for in line catch basins.

Hold Down Devices

Stainless steel hold-down devices securely fasten your stainless steel or fiberglass grates.
SS500/SS600

SS1200

Debris Outlet Strainer

Keep leaves out of your outlet pipes with the debris strainer. Made from stainless steel for longevity. Fits 4" outlet holes.

Our Selection of channels handle drainage capacities ranging from 30 to 6,700 Gallons Per Minute (GPM). Whether you're installing a pool, starting a brewery or working on a major transportation project, we can recommend the right drainage solution.

Light/Residential Traffic

**Patios • Pools • Parks • Spas
Residential • Memorials**

- 3" Plastic Channels
- High End Look
- Grate Options in Bronze, Cast Iron and Stainless Steel
- 3 Styles of Metal Edging
- 12 Grate Designs
- Connects to PVC Schedule 40

**Patios • Pools • Parks • Spas
Courtyards • Residential**

- 2" Options for NDS® Slim Channel
- 3" Options for NDS® Mini Channel
- 4" Options for NDS® Spee-D Channel
- 6" Options for POLYCAST® 600
- Exclusive Patterns
- Grate Options in Bronze, Aluminum, Stainless Steel, Galvanized Steel, and Ductile Iron
- ADA/Heel Friendly Options
- Over 111 Variations Available

Medium/Commercial Traffic

**General Commercial • Auto
Pedestrian • Sports • Hotels
Kennels • Walkways • Parking Lots**

- Metric Polymer Concrete Channels
- Built-In Edge Options - Stainless Steel/Galvanized/Ductile Iron
- Decorative Grate Compatible
- .5% Pre-Sloped & Neutral
- Shallow Channels Available
- Resistant to 50+ Chemicals
- Slot Drain Grate Option
- Economic Options Available

**Commercial • Breweries • Kennels
Loading Docks • Sports Fields
Parking & Garages**

- Polymer Concrete - Polyester or Vinyl Ester
- Stainless Edge Cover Option
- Decorative Grate Compatible
- .6% Pre-Sloped & Neutral
- Shallow Channels Available
- Chemical Resistance
- Heat Resist - Polyester 120°, Vinyl Ester 180° Continuous Flow
- Made In the USA

**Restaurants • Breweries • Wineries
Hospitals • Industrial • Beverage**

- 304 Stainless Steel/316L (Special Order)
- Decorative Grate Compatible
- 1% Pre-Sloped, Shallow & Neutral
- Chemical Resistance
- Heat Resist - 212° Continuous Flow
- SS500, SS600, SS1200
- 5" shallow, 6", 12" Channel Widths

Heavy/Industrial Traffic

**Refineries • Industrial • Ports
Transportation • Airports • Rail
Military Bases • Loading Docks
Highways • Firestations**

FP Series

- Stainless/Galvanized Steel Frames
- Fiberglass Channels
- Channel Lengths of 4', 6' & 8'
- Channel Widths 6", 8" & 12"
- Frame Supports 1.5" Thick Grates
- Grates are Class A thru F Load Rating
- 1% Pre-Sloped & Neutral
- 6", 8" or 10" Outlets
- Chemical Resistant
- Lightweight/Easy to Handle

FF Series - Frame & Grate

- Stainless/Galvanized Steel Frames
- Frame Lengths 4', 6', & 8'
- Frame Width Set w/ Spanner Bar: 8", 10", 12", 14" & 17"
- Frame Supports 1.5" Thick Grates
- Grates Are Class A thru F Load Ratings

FE Series

- Stainless/Galvanized Steel Frames
- EPS Channel Form
- Frame Lengths 4', 6', & 8' Lengths
- Frame Width Set w/ Spanner Bar: 8", 10", 12", 14" & 17"
- Frame Supports 1.5" Thick Grates
- Grates Are Class A thru F Load Ratings
- Form Widths: 6", 8", 10", 12" & 15"
