COMMITTED TO OUR CUSTOMERS

Splash your way to a cooler summer with aquatic playground equipment from Adventure Aquatic Play. At Adventure, we take pride in creating a safe environment for all children to grow and nurture their natural sense of adventure through play. We achieve this by offering innovative commercial outdoor recreation products at attractive prices, backed by an excellent warranty and superior customer service. We are committed to providing our customers with the highest quality splash pad products from our manufacturing facility in Houston, Texas. We have been creating innovative splash pad solutions for communities nationwide for more than 20 years. Our entire range of commercial splash pad features are known for their quality, durability, and fun they bring to any park, organization, or business. We also offer custom turnkey splash pad solutions specifically tailored to your available space, applications, and region. Our friendly team of Adventure Play Experts will gladly answer any questions you have as they assist you throughout your splash pad's design and installation.

COMMITTED TO OUR MISSION

With passion, creativity and integrity, Adventure Playground Systems embraces the opportunity to enhance our children's growth and learning through play. We strive to create a world where our children, our communities and our families can flourish.

COMMITTED TO OUR CORE VALUES

1. Create Fun and Play Every Day.
2. Be Adventurous and Open Minded.
3. Pursue Growth and Learning.
4. Build Open, Honest and Respectful Relationships with Everyone We Meet.
5. Be Passionate and Determined.
6. Build Positive Team and Family Spirit.
7. Be Accountable.
8. Only Offer Excellence Through Service and Communication.

COMMITTED TO PLAY

Explore the World of Adventure Aquatic Play

At Adventure, we believe that aquatic playgrounds are interactive social learning centers. Where your children can expand their horizons by developing their cognitive, imaginative and motor skills. This happens at an early age and children will carry these achievements with them through their teens and adult life. Adventure Playground Systems offers designs that will challenge your children and keep their interests high.

Founded in 1998, Adventure Playground Systems was established to provide superior commercial play products that represent the best in quality, innovation, performance, and affordability. For over 20 years we have become a leader in our industry by continuously developing new and exciting product lines that provide safe and enjoyable play experiences for our customers. This philosophy, combined with our team's ongoing commitment to providing an unmatched level of service to our projects has helped us develop strong and lasting relationships with each of our clients.

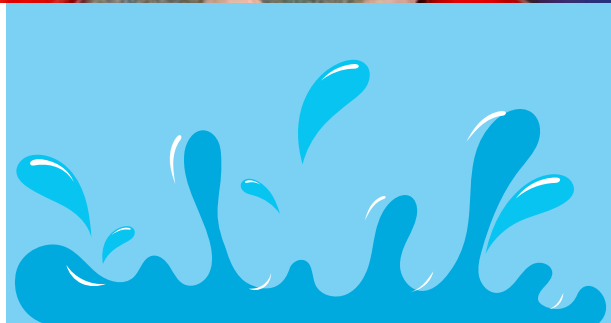

With the introduction of Adventure Aquatic Play, we have developed a large selection of splash pad products that are manufactured in the United States using only the highest quality commercial-grade materials. We offer designs of all shapes and sizes with a variety of play surfaces and aquatic elements that fit any need or budget. We are committed to providing the finest quality interactive aquatic playgrounds for your community at affordable prices. There is no project too big or small.

Our team of Adventure Play Experts is prepared to help you select the aquatic playground that best fits your school, company or community's needs. Together, we can enhance our children's learning through the love of play and build the splash pad project of your dreams. After all, putting adventure into aquatic play is what we are all about!

Sincerely,

James Contreras, President
Adventure Playground Systems Inc.

WHY ADVENTURE PLAYGROUND SYSTEMS?

1. Made in the USA

Adventure Playground System's products are manufactured in Houston, Texas at our state-of-the-art facilities that span over 2.3 acres. Our team members are passionate about creating fun and exciting play products while maintaining that quality, compliance and safety will always be our highest priorities.

2. Attention to Detail and Design

We believe every piece of equipment we create and install should be as unique and one of a kind as the children who enjoy them. That's why all of our play systems and components come fully customizable and are offered in a variety of colors sure to please any palate. Our friendly design team sincerely loves what they do, and is committed to creating smiles, and spreading happiness one park at a time. Need help making a decision? Allow our team of experts to create design layouts, generate 3D renderings and suggest modifications to accommodate your every playground adventure need.

3. Play with Peace of Mind

All of our products are designed and tested to meet and exceed all ASTM, IPEMA and United States Consumer Product Safety Standards and Guidelines. We understand that purchasing a playground is a huge decision. Our user-friendly website was designed to offer our customers the convenience of selecting from a variety of fun and exciting commercial play structures, with the peace of mind that you are purchasing quality products made here in the USA!

4. Adventure Installation Experts

We understand there are many options when it comes to aquatic playgrounds and deciding on the best aquatic solution for your splash pad can be difficult. For more than 20 years, Adventure Playground Systems has been helping local businesses, communities and organizations create quality aquatic splash pads. We take pride in offering innovative splash pad equipment at attractive price points. We strive to bring cutting-edge innovation and the highest possible safety standards to the aquatic playground industry. We offer customizable and attractive splash pad products, and a 100% turnkey operation, from conception to design and installation.

5. Building Customer Relationships to Last

We start with a promise to uphold the very highest standards of quality and safety. We back this promise with comprehensive quality, excellent customer service and one of the best warranties on the market. Our extensive customer service program makes sure you'll never have to worry if you encounter challenges while planning, installing and maintaining your playground products, or during safety inspections at your playground. When it comes time to purchase your next playground, we want you to rely on the friendly Play Experts at Adventure Playground Systems for all your sales, service and installation needs.

AN INTRODUCTION TO AQUATIC PLAY

SPLASH PAD BENEFITS

NO STANDING WATER

Our splash park equipment doesn't have any areas of standing water but instead uses fountains, nozzles, and other splash pad accessories to allow kids to play in an aquatic system. This way, children get all the advantages of water without the risk factors or regulations attached to swimming and wading pools.

LOW MAINTENANCE COSTS

Unlike commercial swimming pools which can cost tens of thousands of dollars a year to professionally maintain and hours of staffing work a week. Splash pad equipment only requires cleaning and maintenance a few times a quarter and supplies are often a fraction of the price. Additionally, commercial splash pads do not require lifeguards to be present during operation hours reducing operating costs substantially.

THE COOL DOWN

Splash pads are one of the most practical play solutions for summer days. Summer weather can get very hot, and extended time on unshaded playground equipment can make it easy for kids to overheat. Commercial splash pads give communities a space to cool down and prevent overheating, helping them stay safe and more comfortable in the sun.

INCLUSIVITY

No need for special lifts, ramps, or handrails. Aquatic play areas offer ADA compliant play experiences for all ages and abilities. Adventure Playground System's water park playground equipment is always ADA accessible. Fun in the water is a wonderful equalizer to encourage inclusive play among children of different ability levels.

CHILD, IT ALWAYS
WANTS TO BE IN
MOTION."

- ALBERT EINSTEIN

THE AQUATICS NEED TO KNOW

WHAT IS AN AQUATIC PLAYGROUND?

An aquatic playground is a recreational area designed specifically for interactive water play. Known to some as commercial splash pads, these refreshing spots are the hit of every park and recreation facility frequented in warmer months. Unlike swimming or wading pools, aquatic playground equipment has no standing water. They are a safe and economical option to provide aquatic fun with a various of “cool” interactive water park playground equipment to choose from. A splash pad installation is an ideal community recreational attraction that adds value and excitement to any outdoor destination.

BENEFITS OF AQUATIC PLAY

1

SENSORY-RICH EXPERIENCE

Aquatic play is important for children's sensory integration and development. While kids are busy having fun, they also begin to learn and experiment with the physics of water.

4

INCLUSIVE PLAY

Designed for inclusive play, aquatic playgrounds encourage physical, functional, and social development in children of all abilities.

2

DEVELOP MOTOR SKILLS

Water play gives many opportunities to develop gross and fine motor skills across all age ranges. Hand-eye coordination and large muscle strength are developed as children splash, kick and sweep their arms, hands, and legs through the water.

5

SOCIAL ENGAGEMENT

Aquatic play brings people of all ages together to create engaged communities. Additionally, striking color palettes and eye-catching water choreography are designed to draw a crowd and leave a vivid impression on families and communities.

3

RELEASE ENERGY

Children can find water play both calming or invigorating depending on the activity being presented. Water can be an excellent outlet for pent-up energy.

WATER MANAGEMENT SOLUTIONS

Water management is a vital component to the success of every splash pad installation. With options of any size, our water management solutions are specifically engineered for your project. Adventure Aquatic Play offers a range of sustainable water management solutions with the best operating efficiency and the highest standards of water quality in the industry. Need help deciding which option is best for you? We have created a helpful guide to the features, benefits, and requirements of each.

RECIRCULATION SYSTEMS

Recirculation is a closed-circuit system that recycles and disinfects the water to and from the play area through the advanced water quality management System. Manufactured for the highest efficiency in water recirculation, this system provides the highest quality water filtration and disinfection for busy aquatic play areas. Recirculation Systems' underground tanks feature auto-fill capabilities, filtration system pump, filter, and chemical controller. Though these systems do have a higher initial cost, long term they are more cost-effective than both drain-away systems and standard commercial pools.

FEATURES

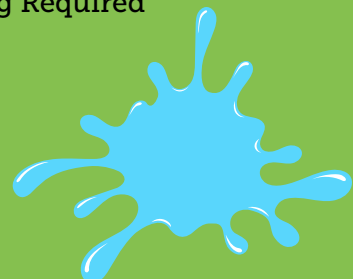

- Treated Water
- Fits Into Any Space
- Engineering and Permitting Required
- Eco-Friendly Option That Continuously Recycles Water Supply

DRAIN AWAY SYSTEMS

Drain Away systems make easy-to-operate and low-maintenance Aquatic Playgrounds. These systems use potable water that goes through the play area. Effluent water is then returned to the municipal wastewater system, or percolated back to the water table. Consideration should be given to monthly fees associated with public water.

FEATURES

- Low Initial Capital Investment
- Low Maintenance Costs
- Drains Into Storm or Sanitary System
- Engineering and Permitting Required

TYPES OF WATER FEATURES

COMMERCIAL ABOVE GROUND FEATURES

Our commercial-grade splash pad equipment is constructed from powder-coated stainless steel that has been engineered specifically for larger, high-volume outdoor aquatic play areas. They are manufactured with heavy-duty components and use the highest quality materials to ensure durability. This equipment is perfect for homeowners' associations, community pools, municipalities, and hospitality venues, that are high-traffic areas that are frequently used. Our commercial-grade above-ground features will stand up to the test of time and the test of play. Fully customizable, these features fit into every theme. While heavy commercial equipment costs more up-front, it holds up to higher levels of activity.

- Engineered for Large High Volume Splash Pads
- Powder Coated Commercial Grade Stainless Steel
- Perfect for City Parks, Apartment Complexes, Hospitality Venues, Master Planned Communities, Amusement Parks and Zoos.

GROUND SPRAYS

Ground Spray Elements may not have the visual impact of a dumping bucket or brightly colored mushroom but they hold tremendous play value anyhow. Located at or below grade level, designer jets made of stainless steel cast water flow in a multitude of ways. From bubblers, rooster tails, and fans every spray nozzle creates a new effect. Ground Spray Elements are perfect cost-effective options that integrate nicely into otherwise traditional settings. Introduce a whole splash pad area to your community or create a scenic fountain path to be enjoyed year-round.

- Cost-Effective, Seamless Design
- Inground Spray Feature
- Perfect for Larger High Volume Splash Pads and Light Commercial Aquatic Play Areas.

LIGHT COMMERCIAL ABOVE GROUND FEATURES

Our light commercial aquatic play equipment is engineered to be budget-friendly attractive components with outstanding play value. They are a fantastic option for any daycare, church or shopping center looking for a low-liability way to beat the heat. Constructed of PVC, light commercial grade equipment is cost-effective and easily maintained. Bright, bold, and fun, our light commercial above-ground features add a pop of color and a splash of water to every project. Because light commercial grade equipment is constructed of PVC, a more brittle lightweight material, we recommend these products for private businesses where the splash pads have a lot of supervision and controlled access, such as those at a daycare.

- Cost-Effective
- Made from Commercial-Grade PVC Pipe
- Perfect for Small HOA/Community Centers, Daycares, Churches, and Other Faith-Based Facilities.

AQUATIC SURFACING

DURA SPLASH

DuraSplash Water Play Surface combines UV-resistant TPV rubber granules and our proprietary chlorine resistant aliphatic binder making DuraSplash the most durable, long-lasting water play surface available. For use on pool decks, zero entry pools and spray grounds, this non-slip surface is ADA compliant and easy to maintain. DuraSplash comes in a wide array of fun colors and endless design options adding play value, and excitement to any aquatic area!

BENEFITS:

- Slip-resistant
- Low Maintenance
- Proven Durability
- Endless Design Options
- UV and Chlorine Resistant

WATER FLECKS

Our Water Flecks® system is comprised of our U.V. resistant thermoplastic rubber granules mixed with our two-part chlorine resistant, aliphatic urethane which is designed to withstand long-term exposure to chlorinated water. Flecks Systems are safe for children and the environment. Our systems do not leach out any harmful chemicals, contain no VOCs, carcinogens and are metal-free. Due to its unique non-slip properties when wet, Water Flecks® is the ideal safety surface for wet play areas.

BENEFITS:

- Applied at an average 3/8" thickness
- Non-slip when wet
- Chlorine resistant
- Long-term color stability in the harshest of climates
- Resistant to fungal attack
- Excellent U.V. Resistance
- Safety cushion base for added fall protection
- 100% recyclable
- Available in 15 colors & unlimited blended patterns

SUN SPLASH

SunSplash is a spray-textured acrylic coating that is sprayed and not trowelled, thus leaving an "orange peel" effect. SunSplash can be applied directly to an existing concrete surfaces or depending upon the condition of the concrete an optional base coat can be applied. SUNDEK's water-based acrylic finish coat is applied to provide the final color and create a non-porous surface. SunSplash will provide a safe, durable, attractive and maintenance friendly coating at one of the most economical investments you can find. The acrylic finish coat will allow a wide choice of colors and will make maintenance a snap.

BENEFITS:

- Cost Effective
- Low Maintenance
- Proven Durability
- UV and Chlorine Resistant
