Experience a **GREENER WORLD[®]**

Treat your pet to STI's Pet Turf. Its beautiful, lush feel will leave your pet feeling **safe, clean, and comfortable.**

Pets love synthetic turf.

In addition to being found in many residential settings, pet turf is also used at doggie day care, veterinarian and other commercial dog facilities. Pet turf is found in large areas such as a backyard or smaller side yards and play areas. Synthetic turf is also configured as mats for use in indoor and outdoor patios, poolside, aboard boats or in rooftop settings.

Pet turf is the perfect solution for many pet applications because all of the pet turfs that we manufacture are comprised of non-absorbent materials, so that odors and waste are not held within the turf. In addition to the nonabsorbent materials, every pet turf is perforated in order to ensure that any material that works its way into the turf will easily drain through and out of the product.

There is no need to mow, reseed, fertilize or use pesticides on any of these high quality pet products. Your area will only need to be kept clean of solid wastes and occasionally rinsed as needed. So make the smart decision and choose pet turf to make your life and your pet's life that much better.

**Maintaining a
beautiful yard or a
simple pet area has
never been easier.**
