SYNTHETIC TURF
INTERNATIONAL

800.405.7455 www.synthetic-turf.com

"I have putted on many synthetic surfaces and yours stands out among them all. The consistency rivals even the best greens we play on tour."

- Trevor Immelman, 2008 Masters Champion

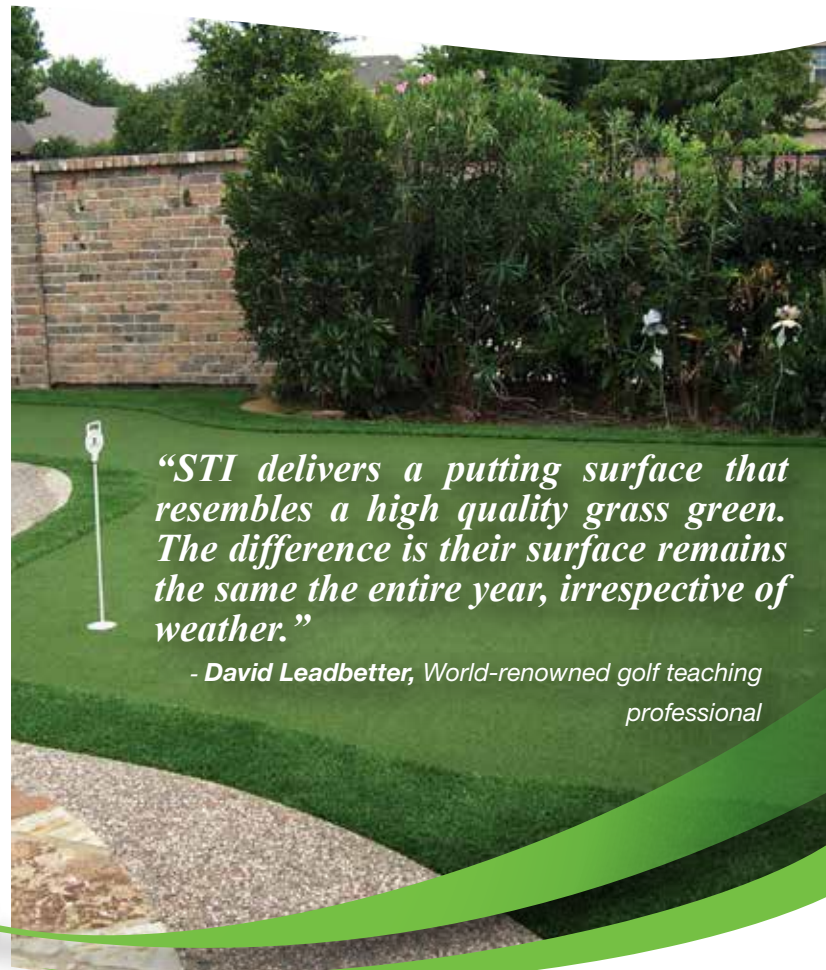

Manufactured to perform perfectly every time, Synthetic Turf International's putting, chipping and target greens are used by professionals, amateurs and golf instructors worldwide such as the David Leadbetter Academies in Florida, Hawaii and California. Our extremely durable turf has a high performance signature "true roll" characteristic that makes it a favorite among low handicappers, touring and teaching professionals.

We recognize that the most important aspect of the game is putting. That's why our synthetic turf greens are designed to produce results-

oriented practice and reinforce the underlying mechanics of good putting.

We offer texturized nylon and polypropylene sand-filled putting greens as well as a comprehensive line of synthetic target greens, range turfs and tee line surfaces. In addition to traditional outdoor putting greens, STI produces indoor and modular greens.

Our team can also enhance aesthetics and impact by installing sand bunkers, chipping stations and fringe grass chosen from an array of indigenous and native grass turfs.

"STI delivers a putting surface that resembles a high quality grass green. The difference is their surface remains the same the entire year, irrespective of weather."

- David Leadbetter, World-renowned golf teaching professional
