- Provides excellent drainage
- Made from biodegradable and/or recyclable components
- Antimicrobial, so it doesn't support odor-causing bacteria, mold, or mildew

Lawn & Landscape

SYNTHETIC TURF
INTERNATIONAL

800.405.7455 www.synthetic-turf.com

STI's signature lawn and landscape synthetic turf, SoftLawn®, utilizes various blends of polyethylene, polypropylene and nylon UV protected synthetic fibers. Treated and tufted on a porous backing, SoftLawn® is the same quality product used in school playgrounds, play yards and lawn applications. Lush and lifelike, the synthetic surface boasts a realistic "fresh cut" appearance combined with a soft pleasing feel. As with all STI surfaces, SoftLawn® is easily maintained using a leaf blower.

SoftLawn® saves owners time and money.
